LIST OF TOOLS
SHOWN IN ILLUSTRATION

A —Step Inside Corner Trowel.
B —Step Outside Corner Trowel.
C —Beading Tool.
D —Radius Tool.
E —Gutter Trowel.
F —Adjustable Handle Groover.
G —Regular Groover.
H —Adjustable Sidewalk Edger.
I —Driveway Groover.
J —Curved Outside Corner Trowel.
K —Outside Gutter Trowel.
L —Inside Gutter Trowel.
M—Roller Groover.
N —Indentation Roller.
O —Edger.
P —Tamper.
Q —Gutter Plates.

SIDEWALK BUILDING

Excavate for Foundation to a Depth of From 6 to 8 inches Below the Surface of the Proposed Walk, Depending Upon the Soil and Climate Conditions; Where the Soil is Clayey or is Subject to Heavy Frosts, the Foundation Should be of Good Depth, to Allow a Drainage and to Take Up Frost Expansion. After Excavation has Been Made, the Same is Filled to Within 4 inches of the Top of Proposed Walk With Well Tamped, Coarse Gravel, Broken Stones, or Cinders; then, After a 4 inch Framework is Placed in Position, a 4 in. Coat of Thoroughly Tamped Grout is Laid on the Foundation. This Grout Consists of Gravel or Crushed Stone, Sand and Cement Sufficiently Moistened, so that Water Will Show at the Top When Solidly Tamped. The Grout is then Cut in Blocks or Sections About 5x5 or 6x6 Feet; then, Before this Layer has Lost its Moisture or Become Set, the Top Dressing or Wearing Coat, Consisting of Sand and Cement, with Enough Water to Make a Stiff Mortar, is Laid Onto the Grout. After Troweling Sufficiently to Work the Air Out, this Coat is Struck Off Level with Top of Frame and Smoothed with a Float, Always Being Careful to Cut into Blocks Corresponding with Those of the Grout. The Joints Between the Blocks are then Finished With a Jointer and the Edges Finished with a Neat, Rounding, Bevel or Square Effect, With an Edger Properly Made for that Purpose. The Surface is then Rolled With an Indentation or Fine Line Roller, Which Prevents the Walk from Becoming Slippery and Gives it a Neat Appearance.

CURB AND GUTTER BUILDING

Excavate from 26 to 32 inches Below Top of Proposed Curb and a Little Wider than Combined Curb and Gutter, Fill with Well Tamped, Coarse Gravel or Broken Stone to Within 6 inches of Top of Gutter, then Place in Position Framework, 6 inches High and the Width of the Combined Curb and Gutter, Back Side of Which Extends to the Top of Proposed Curb. Into this Tamp Concrete, Consisting of One Part Cement, Two Parts Sand and Five Parts Gravel, to a Depth of 5 inches, Separating into Sections Not Longer than 6 feet. A 1½ inch Blank, Forming the Face of the Curb, is Placed in Position with Spreader Boards of the Desired Width or Curb Between this and Back Frame, this Plank Being Firmly Held in Position by Curb Clamp; into this is Tamped a Grout Mixture to Within ¾ inch of Top of Curb. If the Grout has Been Firmly Tamped, the Face Form can be Removed by Releasing the Clamps and a ¾ inch Facing, Consisting of Three Parts Cement, Five Parts Sand, Immediately Applied to Top and Sides of Curb and a 1 inch Coat to Top of Gutter, Increasing the Thickness Towards Outside of Gutter to Give Proper Drainage Slope. This is Worked to an Even Surface by Drawing a Straight Edge, Laid Parallel with Curb, from Top of Curb to Street Side of Gutter; After Smoothly Floating, the Upper Face Edge of Curb is Finished with a Curbing Edger Having the Desired Shape, and the Angle Between Curb and Gutter with a Curb-Gutter Finishing Tool, the Outer Edges being Finished with a Regular Sidewalk Edger. The Joints, Which are Cut to Correspond with Those of the Grout, are Finished with a

CURB AND GUTTER BUILDING—(Continued)

Short Sidewalk Jointer, or Preferable, with a Roller Jointer, as a Jointer of this Kind is More Easily Operated in the Angle Formed at the Juncture of Curb and Gutter. Another Convenient and Popular Way of Making a Curb is to Plaster the Finishing Coat on to the Frame and then Tamp Grout in Back of Finishing Coat to Within ¾ inch of Top, Which Space is Filled with Finishing Coat and Struck off Even with Frame, the Edges Being Finished with a Curbing Edger Before Framework is Removed.

MIXING

The Secret of Mixing Material for Both Grout and Top Dressing Lies in Determining the Voids of the Materials Used, Which Must be Filled in Order to Make the Mixture as Dense and Strong as Possible. For the Grout the Voids in the Gravel Must be Filled with Cement. For the Top Coat, the Voids in the Sand Must be Filled with Cement, but as it is Sometimes Impossible, if Not Impracticable, for One to Determine Exactly the Voids of Each of the Materials Used, We Give the Following Rules for Mixtures Which, if Adhered to and Thoroughly Tamped, a Cement Will be Obtained With a Crushing Strength of 1,000 pounds per square inch of Surface.

MIXTURE FOR GROUT

Where Medium Sized Gravel or Crushed Stone is Used, One Part Cement; Two Parts Sand, Five Parts Gravel or Stone.

MIXTURE FOR TOP DRESSING

One Part Cement, Two Parts Sand. Both in the Grout and the Top Dressing the Materials should be Thoroughly Mixed Dry and Again Mixed After Adding Water. We Would Add that the Above Formulas Will Only Apply Where Medium Sized Gravel or Crushed Stone is used, for if the Gravel is Very Coarse it Will be Readily Seen that it Will Require More of the Finer Material to Fill the Voids, and the Only Correct Mixtures are Those in Which the Finer Materials Will Exactly Fill the Voids of the Coarser.

COLORING

Where a Special Color is Desired, We Would Recommend for **Black**—2 per cent Carbon Black; **Red**—10 Per Cent Raw Iron Oxide; **Blue**—6 Per Cent Ultramarine; **Brown**—6 Per Cent Roasted Iron Oxide; **Buff**—10 Per Cent Ochre.

CEMENT SIDEWALK TOOLS

★ DIAMOND EDGE

TRADE MARK REGISTERED DE IN THE U.S. PAT. OFFICE

Special Steel Blades; Polished Face and Back; Japanned Steel Brace Riveted to Blade; Ebonized Hardwood Handle Mortised and Fastened with Screws; Light in Weight and Durable.

TROWELS

Block; special iron, japanned finish; tool steel cutter; iron handle.

Each

No. 102—Planes; 5½ inches long; 1⅝-inch tool steel cutter; weight, ⅞ lb. . $0.90

Block; special iron, japanned finish; tool steel cutter; iron handle.

Each

No. 103—Planes; lever adjustment; 5½ inches long; 1⅝-inch tool steel cutter; weight, ⅞ lb. $1.30

Block; special iron, japanned finish; tool steel cutter; iron handle.

Each

No. 110—Planes; 7½ inches long; 1⅝-inch tool steel cutter; weight, 1¾ lbs. $1.25

Block; special iron, japanned finish; tool steel cutter; iron handle.

Each

No. 203—Planes; screw adjustment; 6¼ inches long; 1⅝-inch tool steel cutter; weight, 1½ lbs. $1.60

Made entirely of steel; cutter seat and handle are of one piece of steel, electrically welded to the base; cutter hardened and ground; japanned finish.

Each

No. 205—Planes; 6¼ inches long; 1⅝-inch cutter; weight, ½ lb . . . $0.50

Six in a box.

Block; special iron, japanned finish; tool steel cutter; iron handle.

Each

No. 220—Planes; screw adjustment; 7 inches long; 1⅝-inch tool steel cutter; weight, 1½ lbs. $1.85

Screw and lever adjustment; japanned finish; tool steel cutter.

Each

No. 9½—Planes; 6 inches long; 1⅝-inch cutter; weight, 1½ lbs. $2.45

No. 15—Planes; 7 inches long; 1⅝-inch cutter; weight, 1⅝ lbs. 2.75

Extra Caps—For No. 9½ block planes. .15

See page 68 for price on extra caps.

LOW ANGLE.

Screw adjustment; japan trimmed; tool steel cutter.

Each

No. 60½—Planes; 6 inches long; 1⅜-inch cutter; japanned trimmings . . . $2.60

No. 65½—Planes; 7 inches long; 1⅝-inch cutter; japanned trimmings 2.80

Weight, 1¼ and 1⅝ lbs.

KNUCKLE JOINT.

The knuckle joint in the cap makes it a lever also, and placing the cap in position will clamp the cutter securely in its seat; tool steel cutter; nickel trimmed.

Each

No. 18—Planes; 6 inches long; 1⅝-inch cutter; Bailey lateral adjustment; nickel plated trimmings $3.05

No. 19—Planes; 7 inches long; 1⅝-inch cutter; Bailey lateral adjustment; nickel plated trimmings 3.25

Weight, 1½ and 1⅝ lbs.

STEEL.

Similar in construction to the No. 18, but the bottom, adjustable front and cap made of steel.

Each

No. 18S—Planes; 6 inches long; 1⅝-inch cutter; weight, 1¼ lbs. . . . $3.50

Screw and lever adjustment, steel base or bottom, malleable iron frog; practically indestructible, tool steel cutter, handles and knobs of rosewood.

Each

No. B-S4—Planes; smooth; 9 inches long; 2-inch cutter; weight, 3 lbs. . . $4.85

Screw and lever adjustment, steel base or bottom, malleable iron frog; practically indestructible, tool steel cutter, handles and knobs of rosewood.

Each

No. B-S5—Planes; jack; 14 inches long; 2-inch cutter; weight, 3¾ lbs. $5.55

All above one in a box, except Nos. 101 and 205 half dozen in a box.

Screw and lever adjustment; special iron, japanned finish; tool steel cutter; rosewood handle and knob.

	Each
No. 1—Planes; smooth; 5½ ins. long; 1¼-in. cutter	$3.55
No. 2—Planes; smooth; 7 ins. long; 1⅝-in. cutter	4.60
No. 3—Planes; smooth; 8 ins. long; 1⅝-in. cutter	4.80

Nos.	605	605½	606	607	608
Weight each, lbs.	4⅝	6½	7⅝	8¾	9¾

LOW ANGLE JACK.

Specially adapted for cutting cross grain on heavy work. Fitted with adjustable throat which enables the user to work either on hard or soft wood.

	Each
No. 62—Planes; screw adjustment; japanned finish; 14 inches long; 2-inch tool steel cutter; rosewood handle and knob; weight, 3⅝ lbs.	$6.70

STANLEY ALUMINUM.

BLOCK.

Knuckle Joint.

The knuckle joint in the cap makes it a lever also, and placing the cap in position will clamp the cutter securely in its seat; tool steel cutter. The bottom and adjustable front are made of aluminum; this makes it rust proof and extremely light in weight.

Each

No. 18A—Planes; 6 inches long; 1⅝ inch cutter; Bailey lateral adjustment; weight, 1 lb..... $3.50

BENCH.

Screw and lever adjustment; bottom and frogs are of aluminum, which provides an exceptionally light tool, will not rust; tool steel cutter; rosewood handle and knob.

Each

No. 4A—Planes; smooth; 9 inches long; 2 inch cutter; weight, 2¼ lbs..... $5.80

Each

No. 5A—Planes; jack; 14 inches long; 2 inch cutter; weight, 2⅝ lbs..... $6.60

Each

No. 6A—Planes; fore; 18 inches long; 2⅜ inch cutter; wgt., 3½ lbs..... $8 80

BAILEY ADJUSTABLE.

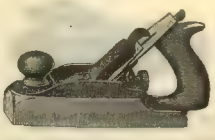
WOOD BOTTOM.

Screw and lever adjustment; beechwood bottom and knob; japanned finish trimmings; tool steel cutter. Each

No. 22—Planes; smooth, 8 ins. long, 1¾ in. tool steel cutter $3.30

No. 24—Planes; smooth, 9 ins. long, 2 in. tool steel cutter... 3.45

Weight, 2½ to 2⅞ pounds.



Screw and lever adjustment; beechwood bottom and knob; japanned finish trimmings; tool steel cutter. Each

No. 35—Planes; handled, smooth, 9 inches long, 2 in. cutter.. $4.05

No. 36—Planes; handled, smooth, 10 ins. long, 2⅝ in. cutter.. 4.55

Weight, 3¼ to 4 pounds.

Each

No. 26—Planes; jack, 15 in. long, 2 in. cutter; wt. 3¼ lbs... $3.60 tly

No. 27½—Planes; jack, 15 in. long, 2¼ in. cutter; wt. 4¼ lbs..... 4.15

No. 28—Planes; fore, 18 in. long, 2⅝ in. cutter; wt. 5½ lbs.. 4.55 tey

No. 31—Planes; jointer, 24 in. long, 2⅝ in. cutter; wt. 6½ lbs..... 4.85

No. 32—Planes; jointer, 26 in. long, 2⅝ in. cutter; wt. 7⅝ lbs..... 5.25

EXTRA HANDLES.

Plane Handles—For No 27½ wood bottom jack plane..... .20

All above one in a box.

STANLEY.

IMPROVED SCRUB.

With these planes, the user can quickly plane down to a rough dimension, any board that is too wide to conveniently rip with a hand saw, an operation that is sometimes called "hogging". The cutting edge is rounded instead of square.

Each

No. 40—Planes; special iron stock, japanned finish; 9½ inches long; 1½-inch tool steel cutter; beech handle and knob; weight, about 2½ lbs. $2.65

CARRIAGE MAKER'S RABBET.

Specially designed for heavy work and framing and will be found to be an excellent tool for a wide variety of work. The cutter is of the double cutter type and has endwise and lateral adjustment.

Each

No. 10½—Planes; rabbet; special iron, japanned finish; 9 inches long; 2⅛-inch tool steel cutter; rosewood handle; weight each, 3 lbs. $6.35

No. 10—Planes; rabbet; special iron, japanned finish; 13 inches long; 2⅛-inch tool steel cutter; rosewood handle; weight each, 4¼ lbs. 7.70

RABBET AND BLOCK.

A detachable side will easily change this tool from a block plane to a rabbet plane, or vice versa. Cutter is set at an angle.

Each

No. 140—Planes; special iron, nickel trimmed; tool steel cutter; detachable side; 7 inches in length; 1¾-inch cutter; rosewood knob; weight, about 1½ lbs. $3.20

VENEER SCRAPERS, ADJUSTABLE.

No 12

No 12½

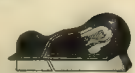
Especially designed for scraping veneer, cabinets and floors. Made of special iron; tool steel blades. The angle of scraper blade can be easily adjusted.

Each

No. 12—Planes; iron bottom; japanned finish; double rosewood handles; tilting screw; length, 6¼ inches; width of cutter, 3 inches; weight each, 3¾ lbs. $5.85

No. 12½—Planes; rosewood bottom; japanned finish; double rosewood handles; tilting screw; length, 6¼ inches; width of cutter, 2 inches; weight each, 4 lbs. 7.90

EDGE TRIMMING.



Designed especially for trimming or smoothing the ends of boards, such as siding, etc., for a square or close fit. It has a right angle rest or guide from the cutter edge, and the cutter works on a skew, giving an easy shaving cut. In the rest or guide are two screw holes to which wood blocks of various bevels may be attached, thus enabling the user to make a slanting cut.

Each

No. 95—Planes; special iron stock, japanned finish; length, 6 inches; ⅝-inch steel cutter; weight each, 1¼ lbs. . $2.50

BULL-NOSE RABBET.

Made for working up close into a corner and will be found a very convenient tool.

Each

No. 75—Planes; special iron stock, japanned finish; 4 inches long; 1-inch tool steel cutter; weight, ⅝ lb . $0.90

CIRCULAR.

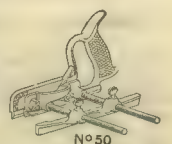
This plane has a flexible steel face, which can be readily shaped to any required arc, either concave or convex, by turning the knob on the front of the plane. Has graduated scale.

Each

No. 113—Planes; adjustable circular, high grade steel bottom; special iron stock, japanned finish; screw and lever adjustment; 1¾-inch tool steel cutter; 10 inches long; weight, 3⅛ lbs. $8.85

COMBINED BEADING AND MATCHING.

A small combination plane for light work, adapted for plow, beading, matching and rabbet work. Fitted with spurs, depth gauge and a fence with a five-inch adjustment.



No 50

Each

No. 50—Planes; nickel plated; 9¼ inches long; complete with 15 cutters as follows: plow and dado, ¼, ⅛, ⅜, ⅛, ½, ⅝, ⅞ inches; beading, ⅛, ⅛, ¼, ⅛, ⅜, ⅛, ½ inches; tonguing, ¼ inch; weight complete, 3⅛ lbs . $10.25

All above one in a box.

PLANES.

STANLEY.

IMPROVED RABBET.

This plane will lie perfectly flat on either side, and can be used with right or left hand equally well, while planing into corners or against perpendicular surfaces. Fitted with depth gauge.

	Each
No. 190—Planes; special iron stock, japanned finish; special iron handle; 8 ins. long; 1½ ins. wide; with spur . .	$3.50
No. 191—Planes; as No. 190, but 1¼ ins. wide.....	3.30
No. 192—Planes; as No. 190, but 1 inch wide.....	3.10

Weight 2 to 2½ pounds.

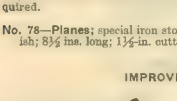
DUPLEX FILLETSTER AND RABBET.

The arm to which the fence is secured can be screwed into either side of the stock, thus making a superior right or left hand filletster, with adjustable spur and depth gauge.

Remove the arm to which the fence is secured and a handled rabbet plane is had, and with two seats for the cutter, so that the tool can be used as a bull-nose rabbet if required.

	Each
No. 78—Planes; special iron stock and fence, japanned finish; 8½ ins. long; 1½-in. cutter; weight each, 3 lbs. .	$3.95

IMPROVED DADO.

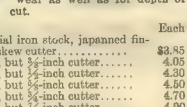


The cutter is set on a skew. Plane is fitted with a depth gauge, adjustable by means of a thumb screw. Also with two adjustable spurs, which can be adjusted to take up wear as well as for depth of cut.

	Each
No. 39¼—Planes; 8-inch; special iron stock, japanned finish, ¼-inch cutter, and spur skew cutter.....	$3.85
No. 39⅜—Planes; as No. 39¼, but ⅜-inch cutter.....	4.05
No. 39½—Planes; as No. 39¼, but ½-inch cutter.....	4.30
No. 39⅝—Planes; as No. 39¼, but ⅝-inch cutter.....	4.50
No. 39¾—Planes; as No. 39¼, but ¾-inch cutter.....	4.70
No. 39⅞—Planes; as No. 39¼, but ⅞-inch cutter.....	4.90

Weight each, 1¾ to 2¼ pounds.

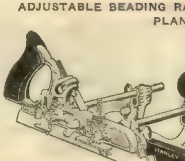
SKEW CUTTER, FILLETSTER AND RABBET.



Has an extra wide cutter set on a skew. The fence and depth gauge can be attached to either side so that the plane can be used equally well for right or left-hand work. The fence slides under the bottom, regulating the width of cut. The plane has two adjustable spurs, one on each side. By removing the depth gauge, fence and arm, a superior Rabbet Plane is obtained.

	Each
No. 289—Planes; iron stock and fence; 8½ inches long; 1¾-inch tool steel cutter; japanned finish; weight each, 3¾ lbs.....	$4 55

ADJUSTABLE BEADING RABBET AND MATCHING PLANE.



Combines a main stock and a sliding section; cutters of different widths can be used. Fitted with an adjustable fence or guide and a depth gauge, also with spurs for use in working across the grain.

Can be used right or left hand.

This plane embraces (1) Beading and Center Beading plane; (2) Rabbet and Filletster; (3) Dado; (4) Plow; (5) Matching Plane; (6) Sash Plane; and (7) a superior Slitting Plane.

Each plane has seven Beading Tools (⅛, 3/16, ¼, 5/16, ⅜, 7/16, and ½ inch), ten Plow and Dado Bits (⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝ and ¾ inch), a Slitting Blade, a Tonguing Tool, a Sash Tool and a Filletster.

	Each
No. 45—Planes; nickel plated, special iron stock and fence, with 22 tool steel tools, bits, etc.; endwise and lateral adjustment; rosewood handle; weight, 9½ pounds.....	$15.00

HOLLOWS AND ROUNDS.

For No. 45 Planes.

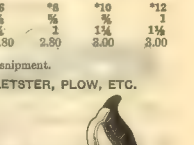
These hollows and rounds can be attached to any No. 45 plane, but are not included with the plane.

The full width of each cutter is indicated in the following list and also the full diameter of the circle to which each cutter will work an arc. The numbers correspond with the regular lists of common hollows and rounds.

Hollows and Rounds.....	*6	*8	*10	*12
Cutter, inches wide.....	⅜	½	⅝	¾
Works circle, inches.....	⅝	1	1¼	1½
Per pair.....	$2.80	2.80	2.00	3.00

*For factory snipment.

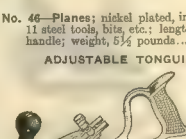
ADJUSTABLE DADO FILLETSTER, PLOW, ETC.



This tool is accompanied by 8 Plow and Dado Bits (3/16, ¼, 5/16, ⅜, 7/16, ½, 9/16, ⅝ and 1¼ inch), a Filletster Cutter, a Slitting Blade, and a Tonguing Tool. All (except the Slitting Blade) are secured in the main stock on a skew.

	Each
No. 46—Planes; nickel plated, iron stock and fence, with 11 steel tools, bits, etc.; length, 10½ inches; rosewood handle; weight, 5½ pounds.....	$11.75

ADJUSTABLE TONGUING AND GROOVING.



Has two separate cutters. When the guide, or fence, is set as shown, both cutters work, and a tongue can be made. The fence is hung on a pivot and can be reversed end for end. This movement covers one of the cutters and furnishes a guide for grooving an exact match for the tongue.

	Each
No. 48—Planes; nickel plated; special iron stock and fence for ¾ to 1¾ inch boards; iron handle; tool steel cutter, ⅝ inch; length, 10½ inches; centers on ⅞ inch; weight, 3¾ lbs.....	$6.30

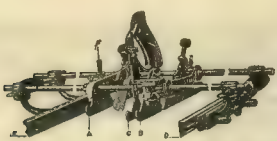
All above one in a box.

PLANES.

List adopted Dec. 10, 1921.

STANLEY.

UNIVERSAL.



Plane consists of a Main Stock (A), with two sets of transverse sliding arms, a depth gauge (F) adjusted by a screw, and a Slitting Cutter with stop, a Sliding Section (B) with a patent vertically adjustable bottom.

The Auxiliary Center Bottom (C) is to be placed in front of the Cutter, as an extra support, or stop, when needed. This bottom is adjustable both vertically and laterally.

Fences (D) and (E). Fence D has a lateral adjustment, by means of a screw, for extra fine work. The Fences can be used on either side of the Plane, and the rosewood guides can be tilted to any desired angle, up to 45°, by loosening the screws on the face. Fence E can be reversed for Center Beading wide boards.

An Adjustable Stop to be used in beading the edges of matched boards is inserted on the left-hand side of Sliding Section (B). This Plane takes the place of a full assortment of so-called "Fancy Planes."

Each

No. 55—Planes; nickel plated, with 53 cutters, arranged in four separate cases and the entire outfit packed in a heavy fibre board box. Consists of a main stock, sliding section, auxiliary center bottom, two fences and adjustable stop; rosewood handle; weight, 15¼ lbs. $30.00

All above one in a box

WOOD WORKERS' HANDY ROUTERS.

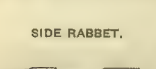
Because of its small size it is useful on very narrow work for pattern and cabinet makers, also carpenters in letting in lock plates, etc. It is so constructed that either a closed throat for regular work or open throat for bull nose work can be had. By reversing cutter it can be used as a depth gauge.

Each

No. 271—Planes; case hardened thumb screw; ¼-inch cutter; 3 inches long; nickel plated; weight each, ¼ lb. .$0.75

All above one in a box.

SIDE RABBET.



A convenient plane for side rabbeting, in trimming dados, mouldings and grooves of all sorts. A reversible nose piece allows it to be worked up into close corners when required. Nickel plated finish.

Each

No. 79—Planes; cutters, ½ inch; length, 5½ inches; weight each, ½ lb. $2.75

One in a box.

PLANE IRONS.

STANLEY.

It will be noted that in many cases the same single iron fits a number of different planes, but the cap iron (which combined with the single iron makes the double iron), is not the same on the iron, wood and circular planes and consequently is not interchangeable. In ordering, it is necessary to give the number of the plane, size of iron and state whether single or double iron is required.

SINGLE DOUBLE

Size	Plane Irons Single. Each	Double. Each
*1¼-inch, for plane No. 1	$0.45	$0.80
*1⅝-inch, for plane Nos. 2, 602	.50	.85
1¾-inch, for plane Nos. 3, 3C, 20, 22, 25, 113, 603, 603C	.55	.90
2-inch, for plane Nos 4, 4C, 5, 5C, 9, 24, 26, 35, 604, 604C, 605, 605C	.60	.95
2⅛-inch, for plane Nos. 10, 10¼, 10½	.65	1.00
2¼-inch, for plane Nos. 5½, 5½C, 27½, 605½, 605½C	.70	1.10
2⅜-inch, for plane Nos. 4½, 4½C, 6, 6C, 7, 7C, 11, 28, 31, 36, 604½, 604½C, 606, 606C, 607, 607C	.75	1.20
2⅝-inch, for plane Nos 8, 8C, 32, 37, 608, 608C	.80	1.30

*For shipment from factory.

NO. 1 STEWART BALL BEARING, ENCLOSED TYPE CLIPPING MACHINE FOR HORSES, MULES AND COWS

The gearing is all enclosed in a dust and dirt proof case and runs in oil constantly.

It has a solid tripod base, a strong upright and its gears are all cut from solid steel made file hard.

A slow turning of the handle is transformed by the ingenious mechanism of the gears to a high speed in the knife.

It turns so easily that it is mere play to run it.

The entire machine is sturdy, compact and perfect in every detail of material and workmanship.

The price puts it within reach of every farmer and horse owner.

No. C1—Ball bearing, complete with 6 ft. of flexible shaft and Stewart clipping knife and handle, shipping w't 36 lbs. .....each *$14.00*

STEWART ELECTRIC CLIPPING MACHINE

PEDESTAL TYPE

For Horses, Cows and Mules.

Where there is considerable clipping to do this machine quickly pays for itself. Equipped with ½ H. P. motor, at a speed of 1800 R. P. M., it clips very fast and takes care of a large amount of work. Clips horses, mules and cows.

For the efficiency and smooth, easy running required in clipping, no machine equals the Stewart.

Pedestal Type.

The 6½-ft flexible shaft is connected by universal joint to armature shaft of motor, making a positive drive with no chance for lost motion.

Fitted with improved Stewart Single Tension Clipping Head, requiring less tension than any other style of head; knives stay sharp longer and give more efficient service.

Used for sheep shearing by fitting with a Special Sheep Shearing Attachment.

Has good length cord and convenient switch for starting and stopping.

Furnished in 32, 110 or 220 volt, direct current; 110 or 220 volt, 60 cycle alternating current.

No. F85P.T.—Stewart electric clipping machine, shipping w't 100 lbs.★.....each *$80.00*

No. F3250—Stewart sheep shearing attachment, shipping w't 15 lbs.★.....each *$32.50*

No. F11250—Stewart combination electric shearing and clipping machine, shipping w't 115 lbs., each★ *$112.50*

Specify on orders whether machine is for direct or alternating current, also if 32V, 110V, or 220V.

STEWART SHEEP AND GOAT SHEARING MACHINE

The gearing is all enclosed in a dust and dirt proof case, and runs in oil constantly.

Solid tripod base, strong upright, and gears cut from steel made file hard.

A slow turning of the handle is transformed, by the ingenious mechanism of the gears, to a high speed in the knife.

Solid core shaft with universal joints, may be turned in any direction.

Shears are of simple adjustment and of equal tension throughout. Perfectly balanced, will shear all grades of wool.

No. C9—Ball bearing, each joint in the shaft and the shear is fitted with ball bearings, the large balance wheel aids in easy turning, fitted with No. C7 Stewart ball bearing shear, 2 combs and 2 cutters, w't boxed 50 lbs., each *$24.00*

STEWART ELECTRIC SHEARING MACHINES

PEDESTAL TYPE

This machine is especially adaptable where a large flock of sheep is to be shorn.

Includes ½ H. P. motor, at a speed of 1800 R. P. M. It saves time in shearing and removes the wool in one unbroken blanket, leaving a smooth, even stubble for the following year's growth.

The universal jointed shaft that drives the shear is connected direct to armature shaft of motor, driving shearing head smoothly without any lost power. Equipped with Stewart Air Cooled Shearing Head. For fast shearing, economy and durability it cannot be equalled. It gets the wool faster, and because of its perfected mechanism runs absolutely smooth.

Pedestal Type.

Used as a clipping machine, by fitting with a Special Clipping Attachment.

Has good length cord and convenient switch for starting and stopping.

Furnished in 32, 110 or 220 volt, direct current; 110 or 220 volt, 60 cycle alternating current.

No. F95PS—Stewart electric shearing machine, shipping w't 100 lbs.★.....each *$95.00*

No. F1750—Stewart clipping attachment, shipping w't 15 lbs.★.....each *$17.50*

No. F11250—Stewart combination electric shearing and clipping machine, shipping w't 115 lbs., each★ *$112.50*

Specify on orders whether machine is for direct or alternating current, also if 32V, 110V, or 220V.

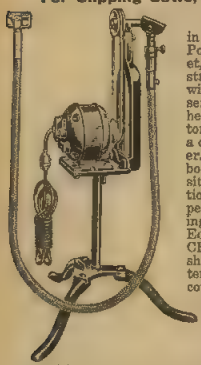
STEWART "STOCKMAN" ELECTRIC CLIPPING MACHINE

For Clipping Cows, Horses and Mules



Here is an amazing value in an electric clipping machine. Powerful, smooth running, quiet, and vibrationless. It is a strong sturdy machine that will give years of satisfactory service. Equipped with a heavy duty ¼ H.P. electric motor. It is belt driven insuring a constant smooth flow of power. Operates efficiently from both hanging and pedestal position To use in hanging position, simply remove it from pedestal and suspend from ceiling by eye-bolts in motor base. Equipped with famous Stewart CB1 clipping head. Flexible shaft is made of strong spring tempered coil steel which is covered with heavy canvas. Extension cord is 15 ft. long, and is fitted with a through switch.

Shipping w't 95 lbs.

STEWART "STOCKMAN" ELECTRIC GOAT AND SHEEP SHEARING MACHINE

Similar to "Stockman" Electric Clipping Machine except that it has shearing attachment for shearing sheep and goats. It is a fast, quiet, vibrationless electric shearing machine which will quickly pay for itself. Made for use on any current from socket power or home light plants. Furnished complete for shearing sheep or goats. With its surplus power, its quiet vibrationless operation, it makes shearing easy. Power is turned on or off with a push on through switch which is on 15 ft. extension close to machine and within reach of shearer. Shaft is Stewart cog-driven type which gives great freedom of shearing motion and delivers full power at all times. Shearing hand piece is easy running ball bearing Stewart No. C7 hand piece.

IMPROVED STEWART HAND OPERATED BALL BEARING CLIPPING MACHINE

For Clipping Cows, Horses and Mules

The best hand power clipping machine made. It has the same surplus power as the No. C9 Shearing Machine and is the same in every respect except that it has a clipping attachment instead of the shearing attachment.

Built throughout of strong, wear-resisting parts. Cuts fast and clean. Turns easily with ball-bearing smoothness.

No. C10—Ball-bearing, complete with 6 ft. flexible shaft and No. C1B clipper head, w't 30 lbs. . each *$15.00*

ONE IN A SHIPPING CONTAINER

POWER SHEARING MACHINE

STEWART "ONE MAN"
Belts to Any Farm Engine

Has complete clutch bracket with 3½ inch pulley. Readily belted to any engine. When not shearing, simply throw the clutch lever over to put out of gear. The bracket is of heavy cast iron made to fasten to a post or side of building.

A very high grade sheep shearing machine operated by one man and designed especially for the farmer who has an engine and from a few up to 200 or 3000 sheep.

Three universal joints give a wide range of flexibility to the shaft so that operator can shear any part of the sheep without changing his position.

No. C25 O. M. S.—Stewart One-Man Power Shearing Machine, complete with 66 in. jointed shaft, No. C7 Shear, 2 Combs, 4 cutters and bolts for attaching the clutch bracket. . . . . each *$27.50*

SHIPPING WEIGHT 40 LBS.

CLIPPING ATTACHMENTS FOR CLIPPING HORSES, MULES AND COWS

For Use on Nos. C6, C8, C9 and "New Model" Sheep Shearing Machines.

No. C1050SC—Clipping attachment, complete with 6 ft. of high grade flexible shaft and chain, eye spindle, Stewart horse clipping knife and handle and connecting parts as illustrated, shipping w't 10 lbs., each *$10.50*

SHEEP AND GOAT SHEARING ATTACHMENTS

For use on Stewart Nos. C1 or C2 Chicago horse clipping machines.

No. C77—Ball bearing, for Nos. C1 and C2 Chicago horse clipping machines or on any hand power Stewart sheep shearing machines, consists of solid core shearing shaft fitted with ball bearings, No. C7 Stewart ball bearing shear and 2 combs and 4 cutters, w't 20 lbs., complete, each *$16.00*

In ordering ball bearing sheep shearing machine attachments mention number of machine and when it was purchased.

THE IMPROVED STEWART NO. C11 GRINDERS

For use on the No. C1 horse clipping machine and on the No. C9 sheep shearing machine. Constructed of metal throughout, may be attached to the machine in place of the shaft by means of an ingenious mechanism. This attachment makes is possible to put a perfect edge on the knives of No. C1 horse clipper or Nos. C8 or C9 sheep shearer in a few seconds time, obviating the time and expense incurred in sending them away to be sharpened.

No. C11—Grinder attachment complete, w't boxed 8 lbs., each *$6.75*

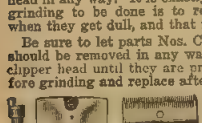
PARTS FOR STEWART CUTTING HEAD FOR HORSE CLIPPING MACHINES

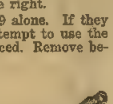
Patented.

AS SUPPLIED SINCE JANUARY 1, 1915

Caution—Do not file or grind any part of the clipping head in any way. It is exactly right to cut best. The only grinding to be done is to re-sharpen the cutting plates when they get dull, and that must be done right.

Be sure to let parts Nos. C358 and C359 alone. If they should be removed in any way, do not attempt to use the clipper head until they are properly replaced. Remove before grinding and replace after.





Complete.

This clipping handle and knife will fit **only the square end type of shaft** as furnished with all Stewart horse clipping machines since January 1, 1915.

No. C1B—Handle and knife, complete	each	$4.50

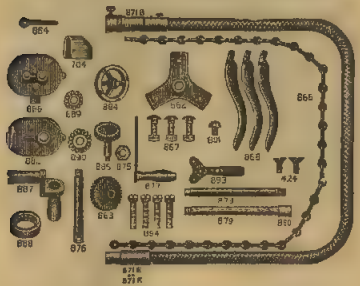
No. C2710T—Stewart Safety Comb, especially designed for close clipping without pricking animal ..... each $1.50

PARTS FOR STEWART NO. C1 BALL BEARING ENCLOSED GEAR CLIPPING MACHINES



AS SUPPLIED SINCE AUGUST 1, 1908

No. C704—Gear cap ..... each $0.75
No. C862—Leg bracket ..... each .75
No. C864—Cotter pin ..... each .02
No. C866—Chain, 6 ft. long ..... each 3.00
No. C867—Bracket, stud and nut ..... each .08
No. C868—Legs ..... each .50
No. C871—Shaft, without chain, 6 ft. long, **old style, with round end ferrule to fit No. C1C clipping head,** each 3.50
No. C871A—Shaft, without chain, 6 ft. long, **new style, with square end ferrule to fit No. C1B clipping head,** each 3.50

IMPORTANT NOTE—When shaft is for machine purchased since Jan. 1, 1915, specify it as No. C871A.

No. C871E—3 in. ferrule for No. C871 shaft..each $0.35
No. C871F—3 in. ferrule for No. C871A shaft, each .35
No. C871B—5 in. ferrule for No. C871 or No. C871A shaft ..... each .50
No. C875—Handle nut ..... each .05
No. C876—Eye spindle ..... each .55
No. C877—Crank, complete ..... each .75
No. C879—Either section of upright, 13 in. long, each ..... .60
No. C880—Coupling for upright ..... each .30
No. C882—Gear case cover ..... each 1.00
No. C883—Intermediate gear and pinion ..... each 2.50
No. C884—Balance wheel and spindle ..... each 1.50
No. C885—Drive gear and spindle ..... each 2.00
No. C886—Gear case ..... each 1.50
No. C887—Gear head ..... each 1.75
No. C888—Balls and ball cup ..... per set .85
No. C889—Small cog ..... each .50
No. C890—Large cog ..... each .60
No. C891—Gear cap screw ..... each .05
No. C424—Grip handle screws ..... each .05
No. C893—Grip handle ..... each .35
No. C894—Gear case screw ..... each .05

ACCESSORIES FOR ALL STEWART HORSE CLIPPING MACHINES

No. C897G—Shaft **with chain,** 6 ft. long, with **old style, round end ferrule to fit No. C1C clipping head** for No. C1 horse clipping machines, each $6.50
No. C898G—Shaft **with chain,** 6 ft. long with **new style, square end ferrule to fit No. C1B clipping head** for No. C1 horse clipping machine, each $6.50
No. C722G—Shaft **with chain,** 6½ ft. long, with **old style, round end ferrule to fit No. C1C clipping head** for No. C2 horse clipping machine, each $8.75
No. C723G—Shaft **with chain,** 6½ ft. long, with **new style, square end ferrule to fit No. C1B clipping head** for No. C2 horse clipping machine, each $8.75

All horse clipping machines supplied since January 1, 1915 have been fitted with square end shafts, which fit only the No. C1B clipping head with square shank. The No. C1C, old style, round shank clipper head will fit only the old style, round end shaft.

No. C866A—Chain links, separate, for flexible, per dozen $0.75

THE NEW NO. C5 STEWART POWER GRINDER

This new STEWART No. 5 Power Grinder is strong, sturdy and efficient—does a good job on clipping and shearing plates as well as barber plates. Attach it to any shearing or clipping machine in a jiffy. It makes expert clipping easy. Uses grinding compound.

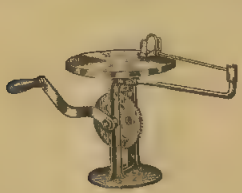
At these low prices, it is a fast moving item that will appeal to every clipping or shearing machine owner. When ordered for use with a clipping machine, a special attachment is furnished.

No. C5—For grinding sheep shearing plates only, each $17.00

No. C555—Complete for grinding sheep shearing and horse clipping plates..... each $19.50

SHIPPING WT 35 LBS.

THE NEW STEWART NO. C4 HAND OPERATED GRINDER



This Grinder does wonderfully fine work in sharpening clipping plates for horses, cows, mules, and dogs, and sharpening plates for sheep and goats.

It is made in accordance with precision standards and is strongly built to give years of good service. The Stewart No. C4 uses a grinding powder and does not take emery circles. It is simple to use and very efficient in results.

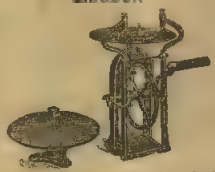
No. C4—Equipped with holders for sheep shearing combs and cutters ..... each $12.00

No. C441—Equipped with holders for horse clipping plates ..... each $12.50

No. C443—Equipped with holders for both sheep shearing and horse clipping plates..... each $13.75

SHIPPING WT 32 LBS.

THE NEW NO. C2 STEWART AUTOMATIC GRINDER



The best hand operated sharpening device made for horse clipping or sheep shearing machine plates.

Grinding disc is covered with emery cloth on the same principle as the large power grinding machines used in large shearing plants. This emery cloth surface can be renewed any time at very little expense. Grinder is practically everlasting. It is the most practical grinder for dealers or others who have considerable grinding to do and who do not wish to purchase a power grinder.

In ordering give our names and numbers of plates to be sharpened so proper clamp rods will be supplied. No cams to change on this grinder. Each grinder shipped complete with emery cloth, liquid cement, clamp block and clamp rod. Diameter of disc 14½ in., height of grinder over all 2 ft., w't boxed for shipment 110 lbs.

No. C2—Automatic grinder, complete as described, each $45.00

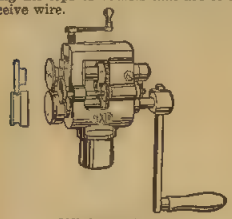
SHIPPING · FACILITIES

With our immense stock and very modern facilities for shipments we are enabled to fill orders with unequalled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipment made in the regular way.

PEXTO TINNERS' MACHINES

TURNING

Turning machines are used for turning the tops of vessels that are to receive wire.



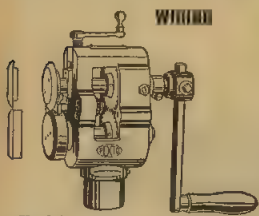
Without Stand.

COLUMBIAN. Solid frame. Furnished with extra pair of thick turning rolls. For 22 iron and lighter.

No. D541—Small. Diam. of rolls 2⅞ in. For wire size 11 to 7 ,w't 25 lbs. .....each $44.45

No. D542—Large. Diam. of rolls 3 in. For wire size 9 to 4, w't 31 lbs., each $51.10

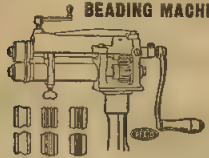
WIRING



Used for rolling sheet metal tightly around wire after its seat has been prepared by turning machine.

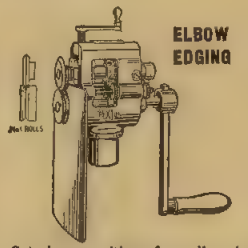
No. F525—Diam. of rolls 3 in. For No. 0 wire and smaller. W't 31 lbs., each .....$51.10★

BEADING MACHINE

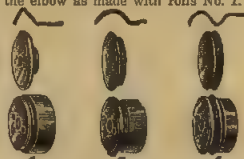


No. F620—Light Beading Machine. For No. 24 gauge iron and lighter. Depth of throat 6¼ in., diam. rolls 1⅛ in., width of rolls 1/7 in. Furnished with four pairs of rolls; one pair each ogee ⅝ in., triple ⅝ in., single ⅛ in. and 1/7 in. Furnished with standard. W't each 50 lbs. each★ $62.20

ELBOW EDGING



Cut shows position of an elbow in turning the edge; also the form of the crease made by the machine to enter corresponding section in completing the elbow as made with rolls No. 1.



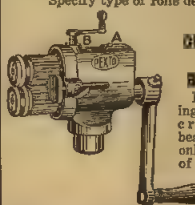
Rolls type No. 1 for V-shape edges on both elbow sections. No. 3 and 4 for elbows riveted or grooved with loose joint. Faces adapted to Columbia or Encased small turning machine.

Diameter of faces 2¼ in.

COLUMBIAN. For 24 ga. iron and lighter. Furnished with stand and one pair of rolls.

No. F551—Diam. of rolls 2¼ in., w't each 25 lbs.★.....each $44.45

Specify type of rolls desired.



PEXTO CRIMPERS AND BEADERS

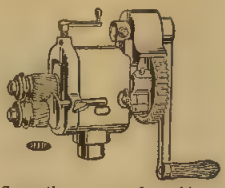
For making a uniform crimp and bead or crimp only in pipe of black or galvanized iron. Furnished with pair of steel blank collars making machine convertible into cornicemakers' crimper.

Width of crimping rolls 1⅜ in., width of beading rolls 1 in., diam. beading rolls 1⅛ in., diam. crimping rolls 1⅛ in., size ogee bead ¼ in. Cap No. 24 ga. iron and lighter. W't 30 lbs.

No. F0581—Furnished with rolls for **straight crimp**★ ...each $29.45

No. D581—Furnished with rolls for **spiral crimp** .....each $29.45

PEXTO CRIMPERS AND BEADERS



Connecting gears of machine cut steel. Rolls high grade steel, scientifically hardened. Adjustments provided for regulating depth of crimp and bead.

Two speeds are provided for; back geared for heavy stock and direct drive when lighter gauges of material are used.

No. H585—Cap. 20 ga. iron and lighter. Diam. beading rolls 1⅛ in.; diam. crimping rolls 1⅛ in. Gear ratio 3 to 1. Furnished with crank screw for depressing rolls. W't each 65 lbs.....each $57.75

CRIMPING

No. H285—Packham's for stove and conductor pipe, with standard, w't 24 lbs., each... $26.65

COMPANION HAND PIPE CRIMPER

Pexto

A needed companion tool for the mechanic engaged in pipe making or hanging, in the shop and outside jobs. To crimp a piece of pipe with machine-like effect and precision simply slip the end of the pipe to be crimped between the crimping rolls. Close the rolls by pushing down lever with an up-and-down movement of the handle by means of a ratchet the rolls rotate, making a perfect crimp in the pipe. The depth of crimp is regulated through a simple adjustment of a screw.

No. D788—Cap. 26 ga. iron and lighter, length overall 8 in., w't each 1¼ lbs. .....each $8.90

★Items Marked Thus ★ Are Shipped from Factory Only.

STOVE PIPE CUTTER AND CRIMPER

Will cut a joint of stove pipe of any diameter in FIFTEEN SECONDS. It will CUT and CRIMP a piece of stove pipe in THIRTY SECONDS.

No. F40—Standard Style, New Model, Black with Gold Letters and Figures, Special Tool Steel Cutters, 12 in. scale cast on machine, extreme length 26 in., extreme height 15¼ in., shipping w't 60 lbs., steel crimping rolls 1¼ in. wide.★.....each $38.90

STEEL CORNICE BRAKES

The Apron or Bending Leaf reinforced by angular shaped strengthening plate. Substantial truss rods provided for additional support and adjustment.

A Steel Angle Bar is bolted to apron to give additional leverage when bending extra heavy material.

Stop Gauges furnished free of cost.

The Clamping of material is done by means of an eccentric on each end.

When ordered with Eccentric Levers, connected brakes are so fitted without additional cost.

Set Screws provided on ends which move the upper jaw forward and back to accommodate heavy or light material and for sharp or rounding bends.

An Eccentric Bushing in lower part of connecting link allows for greater or less pressure on material.

The Angle Bar, as well as the special steel bar, is removable from the apron and narrow opposing members can then be formed. Apron edge is ¼ in. from which ¼ in. is detachable.

No. F4—Forming edge 8 ft. 1 in. long, for cornice and other light work as well as ¾ in. and more, bends on No. 18 gauge, **complete with angle bar** and five formers, w't 1000 lbs.★.....each $366 65

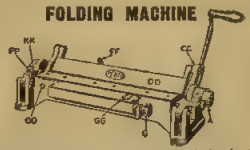
TURNING MACHINE

WRIGHT'S, 30 in., improved, for No. 24 iron and lighter.

This machine will turn locks of different widths on any length of sheet.

No. F1—Will turn locks ¼ and ⅜ in., w't 80 lbs.....each $66.65

FOLDING MACHINE



Improved patterns represent the last word in Bar Folder Construction. Intended for forming the edges of sheet metal at various angles. Will produce closed locks as well as open or round locks for inserting a wire in the flat-sheet. Where speed and great durability are essential, especially in tinware and other light manufacturing.

Cap. 3/16 in., locks on No. 22 ga. iron and lighter.

Cap. ¼ in., locks on No. 24 ga. iron and lighter.

Cap. 3/16 in., locks on No. XX tin.

Will form closed and open locks ⅛ to 1 in. to receive a wire up to ¼ in.

No. H62—20 in., w't 140 lbs., each $122.20

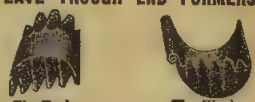
No. H63—30 in., w't 220 lbs., each $144.45

COMPENSATING GEAR FORMERS

Solid housings fitted with machine cut Steel Compensating Gears. Grooves cut in rolls to allow work with a wire to be formed. For 22 gauge iron and lighter.

No. H373—Length rolls 30 in. Diam. rolls 2 in., w't each 140 lbs., each .....$.....

EAVE TROUGH END FORMERS



The Tool. The Work.

For closing end of eave trough in corrugations as shown in illustration.

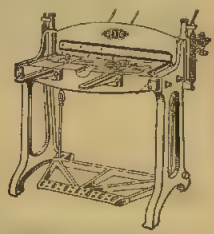
No. D6—Bishop's, cast iron Trough, 5 in., w't each 5 lbs., each $1 75

PEXTO IMPROVED MACHINE STANDARDS

No. D975—For use with **all except wiring machine,** size of hole 1⅜ in., height over all from bench 9⅜ in., w't each 10½ lbs.....each $3.90

No. D976—Wiring machine, size of bole 1⅜ in., height over all from bench 9⅜ in., w't 11 lbs..each $3.90

SQUARING SHEARS



Capacity No. 18 Gauge Iron and Lighter.

Furnished with complete gauge equipment, one pair front arms. No. 137 has hold-down attachment.

No. H132—Cuts 30 in., w't 510 lbs., each $211.10

No. H137—Cuts 36 in., w't 600 lbs., ch $277.75

WIZARD HAND PUNCH

No. D789—A powerful, single, well constructed hand punch. Furnished with three punches and dies; ⅛, 3/16 and ¼ in. Length overall 8¼ in. Depth of throat 1⅜ in. W't 3 lbs. each $16.65

TINNERS' HAND SHEARS OR SNIPS

SHEAR OR SNIPS

Crocus Finished Blades, Gun Metal Handles, Steel Laid and of Superior Finish.

Snips are Forged from the Best Material Obtainable. They are Accurately Fitted and in Every Way Designed for the Workmen who Demand the Best to be had.

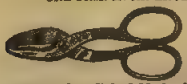
Illustrations show left hand shears, which have the lower blade on left side—Left hand shears are generally used and are always sent unless otherwise specified.

TINNERS' SHEARS OR SNIPS

HOUSEHOLD

No. D18 — Cruso, solid forged steel, length 10½ in., cut 2⅜ in., w't per pair 1 lb., per pair $1.35
A good serviceable snip. suitable for general use, at a low price.
ONE PAIR IN AN ENVELOPE

Cast iron, ground blades, black handles.
No. D20—Length 10¼ in., cut 2⅜ in., w't 2 lb., per pair $0.55
ONE PAIR IN AN ENVELOPE



POOLEY

Solid forged steel, polished blade, length 7 in., cut 2 in., w't per pair ¾ lb.
No. D514 OLIVER—**Polished and blued handles,** per pair $1.10
ONE PAIR IN AN ENVELOPE; SIX PAIRS IN A BOX

TROJAN

Adapted for cutting sheet metal, pasteboard, mica, linoleum, veneering, etc. Straight or curved lines.
No. D79—High grade steel, japanned handles, length 13 in., 3 in. cut, w't per pair 1⅝ lbs.....per pair $5.75
ONE PAIR IN A BOX

HAWK'S BILL

Improved pointed curved hand shears.

Capable of cutting in sheet metal trimmings of any size and shape. Letters easily cut. Especially adapted for cutting off the bottoms of metal vessels and openings in pipes or cylinders.

No. D15—Pointed snips, blade 3 in., entire length 11½ in., w't per pair 1⅛ lbs.....per pair $5.75
ONE PAIR IN A BOX

COMPOUND LEVER

BEAUMONT PATENT

Finest quality crucible steel tempered by the most approved process.

Nos.	D108	D110	D112	D114
Length, in.	8	10	12	14
Length cut, in	1⅛	2	2½	3½
W't. pr., lbs.	⅝	1¼	2	2½
Per pair	$8.45	10.55	13.65	16.60

Has three times the power at the point as the ordinary snip and is but a trifle heavier.

OLIVER COMBINED SHEARS AND PIPE CRIMPERS

Polished blades, gun metal handles, drop forged steel.
No. D92 OLIVER—Combined double cutting shear and pipe crimper, interchangeable parts, steel crimping jaws, length 13 in., actual cut 1½ in., w't 2⅜ lbs., per pair $5.55
ONE PAIR IN A BOX

BENCH

Japanned handles, forged steel blades, bent heels.

Nos.	D00	D0	D1	D2
Cut (catalog), in.	11½	10½	9	8½
Capacity gauge iron	18	18	18	19
W't, lbs.	37	29	24	19
Per pair	$42.55	38.09	27.20	24.55

Nos.	D4	F5	F6
Cut (catalog), in.	7⅜	6¼	5¼
Capacity gauge iron	20	21	22
W't, lbs.	12	9¼	8¼
Per pair	$20.20	19.10	16.00

WISS SNIPS

Made of forged steel with extra hard cutting edges of high carton crucible steel that will not break and remains sharp for a long time.

The blades are perfectly shaped, the points are strong, and the handles are well formed so they will not tire the hand.

Each pair guaranteed as to workmanship and material.

Tinners
Wiss Regular Pattern

Gun Metal Finish Handles.

Nos.	D66½	D67	D68	D69	D610	D611	D612

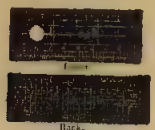
No. D791—Japanned, length 7 in., width 3⅜ in.....per dozen $32.00

★Items Marked Thus ★ Are Shipped From Factory Only.

RULES AND STRAIGHT EDGES



36 In. Long.

Laid off on one side with two rows of figures, the first like an ordinary steel square, by eights and inches up to three feet. The second is a line of circumferences divided into 113 equal parts; each of these divisions is again sub-divided into 8 equal parts, the large divisions representing an inch to a scale and sub-divisions an eighth of an inch. Therefore, against any diameter the circumference in this line to a scale in inches and eighths of inches can be found.

The reverse side of rule gives dimensions of measures and cans. The first two tables are for flaring measures. 1st. Liquid measures, 1 to 5 gal. 2d. Dry measures, 1 to 2 bu., giving diameter of top and bottom and height of each size and kind.

Third table is for cans with pitch or cone tops, 1 to 10 gal., giving diameter of top and body and compass marks for striking breast.

Fourth table is for flat top cans from 100 to 200 gal. (thirty-one different sizes), giving height and diameter.

Fifth table is for dry measure, from 1 qt. to 3 bu., giving height and diameter.

No. D5—Plain polished, w't 2 lb., each $7.20

No. D95—Nickel plated, w't 2 lb. each .....$8.

MAGIC PATTERN RULES

Marked in circumference inches on the front and in inches and eighths on the back. The two slides have set screws into which trammel points are fastened. Particularly convenient for laying out elbow patterns.

No. D7—Lufkin's, nickel plated steel bar, length 4 ft. ⅞ in., square, with two slides, trammel points and flexible steel ribbon, with pattern chart mounted on linen, 19×28 in., hinged wooden case, w't 6½ lbs., each $28.90

LOOSE

SOLDERING COPPER HANDLES

No. D111—Soft wood, wire bound, assorted, w't per doz. 1 lb., per dozen $0.75

This new patented handle with the reinforced steel band inserted in the end makes the Soldering Iron Handle very much stronger than the old type of handle with the twisted wire end, and has proven to outlast them three to four times.

There is no metal exposed on the handle to get hot and burn the operator's hand, and the air space around the ferrule eliminates the possibility of the ferrule getting hot and charring the wood.

No. D400—W't per doz. 2 lbs., per dozen $1.35

TWO DOZEN IN A BOX

TINNERS' ROOFING AND PLUMBERS' SCRAPERS

Forged from the highest grade of steel, well tempered and finely finished.

No. D996—Solid steel, size 4×1×9 in., w't per doz. 4½ lbs. per dozen $8.35

Per dozen	$30.00	35.00

SIXTH DOZEN IN A BOX

TINNERS' TOOLS

FIRE POTS

Fire Pots that embody an entirely new principle of combustion. Meet the most exacting requirements of skilled mechanics. Start quickly. Intensely hot. Concentrated flame, circular in shape, can be turned up or down at will—which control feature holds coppers or metal at desired temperature. Noiseless, smokeless and odorless. Not affected by weather conditions. Very economical in fuel consumption. Shut-off valve has BLUNT POINT, making it impossible to enlarge the orifice.

Fire pot with combination tinners' hood for gasoline is a general utility fire pot. Top section will hold a pair of heavy coppers and melt a pot of metal at the same time.

No. H70—Cap. 1 gal., shipping, w't 17 lbs. .....each *$35.55*

Fire Pot with standard plumbers' shield is fitted with a detachable standard plumbers' shield.

No. H60—Cap. 1 gal., shipping w't 15½ lbs. .....each *$35.55*

FIRE POTS

Coil Fire Pot for Gasoline

A popular Fire Pot because of its easily understood design, sturdy construction and its powerful blast. Tank is made of heavy gauge seamless drawn steel, heavily tinned inside and out (rust-proof), and around bottom of broad base is a protection band Has a powerful brass pump, large funnel and filler plug with dust proof cap, also fitted with latest three-piece coil cup and top plate, which enables operator to easily remove and quickly replace top section. All small fittings made of brass.

No. H22—Cap. 1 gal., shipping w't 12¾ lbs. .....each *$25.00*

No. H3—Gem, gasoline, aluminum bronze, cast iron furnace, removable top, feed regulator, needle valve, all cast brass fittings, japanned wood handle, sliding drip cup, rubber pump bulb 21x7 in. sheet steel base, 10½x4¶ in. sheet steel reservoir, w't 24 lbs. .....each $29.55

No. H15—Gasoline, seamless drawn steel tank, capacity 1 gal., brass air pump, needle valve, cast hood with opening for melting pot, cast "horse shoe" burner, w't 20 lbs. each $23.75

FIRE POTS

So constructed that ashes fall into pan beneath coal; fire is kept clear and draft is good.

BUTTLES Pattern

No. H76—Charcoal sheet iron japanned, height 14 in., diam. at base 6 in., top 8 in., w't 32 lbs., each $11.65

ONE IN A BOX

RUBBER BULBS

No. D45—For gasoline fire pots, w't ¼ lbs. .....each $1.10

MELTING POTS

Fits any Make Furnace

No. D65—Size 5 in., cast iron with bail, w't each about 2¾ lbs., each $1.35

GAS FURNACES

DOUBLE BURNER, FOR NATURAL OR ARTIFICIAL GAS

Burner used gives an intense heat, makes no smoke and economizes time. Air blower not required when heating coppers.

No. H794—Sheet iron top, brick lined, arranged to receive two coppers, each $10.00

SHAPLEIGH'S POINTERS

THE "HAND" OF SNIPS

There is Considerable Confusion Regarding the Meaning of Right and Left Hand Snips; Left Hand Means that the Work is at the Left of the Snips Cutting and the Scraps at the Right; We Show Only Snips with Left Hand Cut, as They Are Invariably Used by Right Hand Men, and Are Always Sent.

Right Hand Snips are Specially Ordered.

Standard Bench Snips, However, Are Always Furnished Right Hand Cut, That is the Lower Blade is on the Right Side of the Shears.

PATENT SLIP ROLL FORMERS

New Original Pexto Features are Embodied in These Forming Machine Patterns that Place Them in a Class by Themselves. They are Greatly Improved Over Our Old Slip Roll Pattern Forming Machines and Those Which the Present Market Offers. A Careful Study of the Illustration Shows the Time and Steps Saved Through Being Able to Perform All Operations at One End of Machine, the Convenient End Where the Crank is Fitted. Without Necessitating the Changing of Positions the Sheet to be Formed is Placed Between the Gripping Rolls (A) and (B). The Cylinder Formed, Open Latch (C), Then by Means of Lever (D) raise Upper Gripping Roll (A) and Slip the Formed Cylinder From the Roll (A). It will be Readily Seen that all Operations are Performed at the Crank End of the Machine—a Pexto Innovation that Can be Well Appreciated by the Mechanic Who Has Operated the Old Pattern Slip Roll Former. Rolls (A) and (E) are Adjusted with Knurled Screws, and Once Adjusted They Can not Slip. The Gears (F) are Steel, Machine Cut, Running More Smoothly Than Cast Iron Gears Without Danger of Slipping or Breaking with Whatever Thickness of Metal is Used.

The Roll Raising Mechanism in These Machines is so Balanced that the Roll (A) is Easily Lifted with a Slight Pressure on the Lever (D). The Latch (C) is Released and Closed with one Movement, and is Self-Locking.

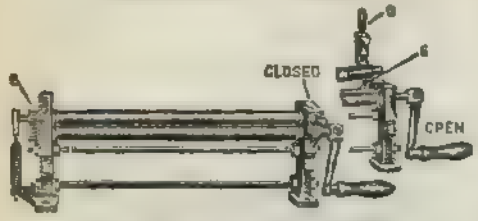
TINNERS TOOLS
PECK, STOW & WILCOX



PATENT SLIP ROLL FORMERS

These Formers are Intended for Forming Cylinders of Small Diameters and are an Improvement Over Our Old Slip Roll Tin Pipe Forming Machines and Those Which the Present Market Offers. All Operations are Performed at One End of the Machine—the Convenient End, Where the Crank is Fitted.

After the Cylinder is Formed the Latch When Opened Permits the Upper Roll to Raise Automatically. The Formed Cylinder Can then be Removed from the Roll Without Distorting it. The Latch with the Roll is Released and Closed with One Movement and is Self-Locking. Rolls are Adjusted with Knurled Screws and Once Adjusted They Cannot Slip. The Gears are Steel Machine Cut.

GROOVING MACHINES

These Machines are Constructed for General Grooving and Have an Improvement Consisting of an Attachment Which Grooves and Flattens the Seams of Cylinders in One Operation. Lower Bar or Horn (A) is Reversible, so that Either the Flat Surface of One of the Grooves Which is Planed into the Horn Can be Turned Upward, Permitting for the Locating of Seams on the Inside or the Outside of the Work. The Seam is Put on the Inside of Work by Means of Flat Roll Which Presses the Seam into One of the Grooves Planed in the Horn, Outside Grooving is Done in the Usual Manner by Using the Grooved Rolls on Flat Surface of Horn. An Adjustable Stop Collar (B) is Fitted on Lower Horn (A) to prevent Work Slipping While Being Grooved.

An Improved Feature Will be Found in the Carriage Which Holds Flattening Roll and Grooving Roll. The Flattening Roll Runs Idle on the Outward Run and the Grooving Roll Runs Idle on the Backward Run. In Other Words, Both Rolls do Not Press on the Seam at the Same Time, Which Makes for Easy Grooving. The Old Style Friction Spring and Roll for Tension are Not Used, the Tension Being Secured Through a More Simple Arrangement at (F), Which Permits for Greater Uniformity in the Seams Grooved and Eliminates Frequent Spring Breakage.

Each

+No. 506A—Length of Grooving Horn, 33½ inches; Weight Each, 151 lbs..... $109 20

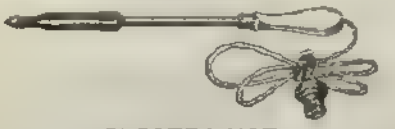
ELECTRIC SOLDERING COPPERS

A Practical Copper for General Use: Good in Radio Work, Auto and Household Tinkering as well as in the Shop; Made of Brush Brass with Removable Copper Tip, Varnished Handle; For 110 Volt; Consumes 100 Watts per Hour; Complete with 6 feet of Cord and Separable Attachment Plug; Diameter Tip, ¾ inch; Length Over All, 13 inches; Length of Handle, 5 inches.

Each
No. 15—Weight Each, ⅞ lb. $3 90
One in a Box



ELECTRA-HOT

Suitable for Radio and General Home Use; Special Alloy Heating Element that Operates on A. C. or D. C. Current and Holds an Even Temperature; Complete with 6 feet of Cord and Separable Attachment Plug; Diameter of Tip, ⅜ inch; Length Over All, 13½ inches; Length of Handle, 5 inches.

Each
No. 38—Weight Each, ¾ lb.....$4.50
One in a Box with Stand

ELECTRIC HEATER CORDS

Heater Cord Complete with No. 90 Connection Plug and Socket Plug; Contact Clips are So Formed that They Will Make Perfect Contact with Points on Any Make of Electric Iron, Toaster, etc.

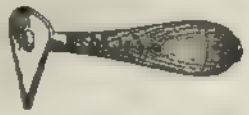
Each
No. 1C—7 feet Long; Weight per Dozen, 9 lbs. $2 00
No. 2C—6 feet Long; Complete with Iron Plug and Two Piece Lamp Socket Connection; 18 Stranded Wire; Weight per Dozen, 8 lbs..... .80
One in a Carton

TINNERS SCRAPERS

Forged from Highest Grade Tool Steel; Well Tempered and Finely Finished

Per Dozen
No. 906—Size 10x5⅛x⅜ inch; Wt. Each, 2lbs $8.00
Half Dozen in a Carton

PLUMBERS SCRAPERS



Steel Blade, Fastened to Wood Handle by Means of a Bolt Extending Through Entire Length of Handle.

Per Dozen
No. 11—Length 5 inches; Weight per Dozen, 2 lbs.. ..... $4.50
Twelve in a Carton

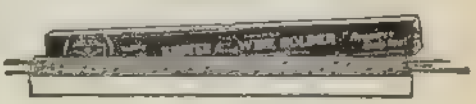
5 lbs. on a Spool

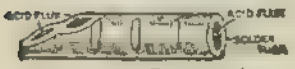


KESTER
Self Fluxing

With Paste Core; Hollow Wire Filled with Paste Made from Pure Tin and Lead; Solder Tube is a Series of Cells, No Extra Paste Can Flow from Remaining Cells. Number 5 Wire, 150 Only; 18 inch Lengths in Each Carton.

Per Pound
No. KP5—Weight per Carton, 5 lbs.....$1.20
5 lbs. in a Carton

SOLDER



Cut Shows Construction

KESTER

Self Fluxing Solder

Hollow Wire Filled with a Soldering Flux, Made from Pure Tin and Lead. Solder Tube is a Series of Cells, Therefore No Excess Flux Can Flow from Remaining Cells.

Can be Used without Soldering Iron, Especially Well Adapted for Automobile Repair Work.

With Acid Core

Per Pound

No. KA—1 lb. Roll; Diameter ⅛ inch....$1 30
No. KA5—5 lb. Roll; Diameter ⅛ inch.. 1 20

With Rosin Core

Per Pound

No. KR—1 lb. Roll; Diameter ⅛ inch....$1 30
No. KR5—5 lb Roll; Diameter ⅛ inch... 1.20
One Roll in a Box

KESTER

Metal Mender

Hollow Wire Filled with a Soldering Flux; Made from Pure Tin and Lead; Solder Tube is a Series of Cells, Therefore no Excess Flux Can Flow from Remaining Cells.

Can be Used Without Soldering Iron; Especially Well Adapted for Automobile Repair Work.

Per Carton

No. KMM—¼ lb. Coils; Weight per Carton, 2½ lbs..... $3.70
Ten Cans in a Carton

KESTER

Radio Solder

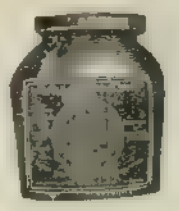
Rosin Core

Ideal for Radio Work; Simple to Use; Requires Only Heat; Will Not Spatter Nor Fume, Causing Damage to Delicate Parts

Per Carton

No. KRS—Weight per Carton, 2½ lbs.. $3.70
Ten Cans in a Carton

SOLDERING SALTS



WALPOLE

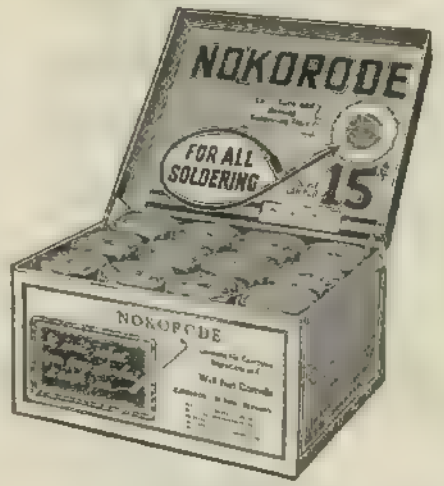
Used in Soldering Tin, Galvanized Iron, Copper, Brass and Other Metals; as a Flux to Make Solder Flow.

Per Dozen

No. 1—2 oz. Bottles..... $7 00

No 2—8 oz Bottles 11 00

SOLDERING PASTE



NOKORODE

Will Flux all Metals Except Aluminum; Non-Corrosive; not Affected by Heat and will Not Splatter; Solder will not Turn Dark After Using.

Per Carton

No. NK—Weight, 5 lbs.....$7.20
36 Only 2 ounce Cans in Carton
We will Not Break Cartons

A Non Corrosive Soldering Paste. Will Solder All Metals Except Aluminum.

Per Dozen Cans

No. 2—2 oz. Cans; Weight per Dozen Cans, 1⅔ lbs $2.00
One Gross in a Box

SOLID SAL AMMONIAC

SPECO

Speco is Sal Ammoniac Fused into a Solid Cake as Hard as Marble without a Binder or Undesirable Foreign Substance, Unaffected by Atmosphere. Will Not Rust Tools in Kit, Nor Slack. Contains Many Times its Bulk in of Crude Sal Ammoniac.

Put a Drop of Solder on the Cake and You Can Clean and Tin the Copper at the Same Time. Can Also Tie Cake to Fire Pot and Have it on the Job for Use When Needed.

Per Pound

No. SA½—½ lb. Cakes..... $1 30

No. SA1—1 lb. Cakes..... 1.10
One Cake in a Package

BABBITT METAL

True Economy in the Use of Babbitt Metal is Determined by the Service Given, Rather than the Cost per Pound; Service is Determined by the Length of Time a Bearing will Continue to Wear without Deterioration; this Desirable Quality is Dependent upon the Higher Percentages of Copper, Tin and Antimony Used; it is therefore Important to Select only High Grade Metal

★NORSHAP

Formula Contains a High Percentage of Copper, Tin and Antimony; Adapted to High Speed Bearings and Heavy Pressures; Exceptionally Serviceable and Never Fails to Give Entire Satisfaction.

Per Pound

No. NORSHAP—Unit Bars, Weight, about 4⅝ lbs. Each; About 54 to 56 lbs. in a Case $0 60
Gross Weight per Case about 60 lbs

★LONGWEAR

A Heavy Bearing Metal of Long Wearing Qualities; the Alloy Produce a Smooth Pouring Metal, for Mill and Railway Service.

Per Pound

No. LONGWEAR—Unit Bars, Weight about 4 lbs. Each; about 54 to 56 lbs. in a Case..... $0.50
Gross Weight per Case about 60 lbs.

★XCD

Made on a Time Tried Formula; Specially Suited for and Gives Excellent Service on Bearings of Ordinary Speeds; Not Recommended for High Speeds or Unusual Pressures.

Per Pound

No. XCD—Five-Piece Bars; Weight about 8¼ lbs. Each; about 103 to 106 lbs. in a Case $0.25
Gross Weight per Case about 114 lbs.

A Well Known Standard Babbitt Metal, Adapted to all Bearings of Medium Speeds and Pressures; Contains a Serviceable Percentage of Tin and Antimony.

Per Pound

No. 1—Five-Piece Bars; Weight about 7¾ lbs Each; about 101 to 106 lbs. in a Case $0.30
Gross Weight per Case about 114 lbs.

A Low Grade Babbitt Metal and Slow Speed and Light Pressures; Made to Standard Formula for this Grade.

Per Pound

No. 4—Five Piece Bars, Weight about 6½ lbs. Each; about 100 to 107 lbs. in a Case $0 25
Gross Weight per Case about 114 lbs.

Electric Warning Signal

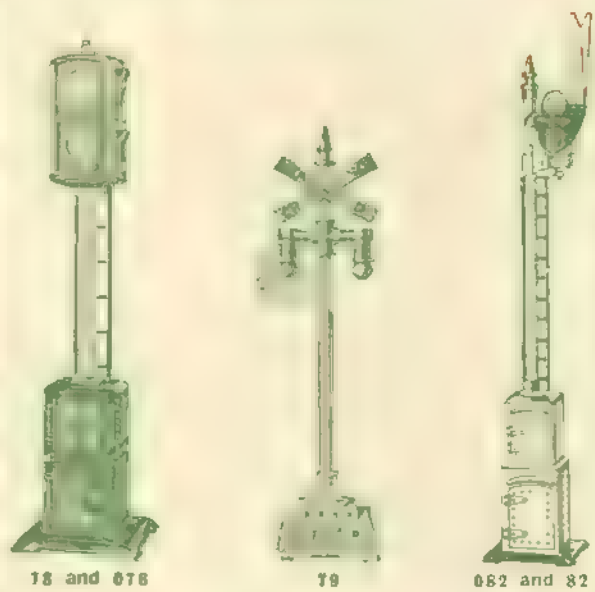
Bell rings when train approaches and stops when train has passed over special section of track.

NO		EACH
69	For Lionel Standard Track	$5.60
089	For Lionel O Gauge Track	5.20

Automatic Crossing Gates

They lower as the train approaches and go up when the train has passed. Complete with special section of track.

NO.		EACH
077	For Lionel O Gauge Track	$6.80
77	For Lionel Standard Track	7.50



18 and 076 79 082 and 82

Automatic Train Control

A great achievement in miniature electric train engineering. It stops and starts train automatically. Red light shows as train approaches it, and train stops exactly at spot where train control is placed. After an interval, regulated by user, red light changes to green and train is allowed to proceed.

NO		EACH
18	For Lionel Standard Track	$3.10
076	For Lionel O Gauge Track	3.10

FLASHING RAILROAD SIGNAL

A true reproduction of the very latest type of crossing signal used on electrified railroads. Red lights are flashed off and on.

NO		EACH
082	1½	$4.50

SEMAPHORES

As train approaches the red light shines and semaphore arm drops, denoting caution. Train comes to a dead stop. After a short interval the light changes to green and train proceeds. A lever at base can be set so train does not stop.

NO		EACH
082	For Lionel Gauge Track	$3.50
82	For Lionel Standard Track	3.50

TELEGRAPH POST SET

Consists of six telegraph posts. Extension arm attached to the base fastens the posts to the track. For O gauge track.

NO	Ht. In.	SET
071	8¾	$5.80

LIONEL ELECTRIC RAILROAD EXTRAS

SEMAPHORES

80-080 84

Connected to the track in the same manner as the No. 78 and No. 078 train controls. Semaphore shows green light with the arm in an upright position as the train approaches, and as soon as the train has passed the arm assumes a horizontal position and red light shows. Automatic in action. 12½ in. high. Complete with lamp and lockon connectors.

NO.		EACH
80	For Lionel Standard Track	$7 50
080	For Lionel O Gauge Track	7 50

Hand controlled semaphore has hand lever for raising and lowering semaphore arm.

SHAPLEIGH'S POINTERS

THE "HAND" OF SNIPS

There is Considerable Confusion Regarding the Meaning of Right and Left Hand Snips; Left Hand Means that the Work is at the Left of the Snips Cutting and the Scraps at the Right; We Show Only Snips with Left Hand Cut, as They Are Invariably Used by Right Hand Men, and Are Always Sent.

Right Hand Snips are Specially Ordered.

Standard Bench Snips, However, Are Always Furnished Right Hand Cut, That is the Lower Blade is on the Right Side of the Shears.

PATENT SLIP ROLL FORMERS

New Original Pexto Features are Embodied in These Forming Machine Patterns that Place Them in a Class by Themselves. They are Greatly Improved Over Our Old Slip Roll Pattern Forming Machines and Those Which the Present Market Offers. A Careful Study of the Illustration Shows the Time and Steps Saved Through Being Able to Perform All Operations at One End of Machine, the Convenient End Where the Crank is Fitted. Without Necessitating the Changing of Positions the Sheet to be Formed is Placed Between the Gripping Rolls (A) and (B). The Cylinder Formed, Open Latch (C), Then by Means of Lever (D) raise Upper Gripping Roll (A) and Slip the Formed Cylinder From the Roll (A). It will be Readily Seen that all Operations are Performed at the Crank End of the Machine—a Pexto Innovation that Can be Well Appreciated by the Mechanic Who Has Operated the Old Pattern Slip Roll Former. Rolls (A) and (E), are Adjusted with Knurled Screws, and Once Adjusted They Can not Slip. The Gears (F) are Steel, Machine Cut, Running More Smoothly Than Cast Iron Gears Without Danger of Slipping or Breaking with Whatever Thickness of Metal is Used.

The Roll Raising Mechanism in These Machines is so Balanced that the Roll (A) is Easily Lifted with a Slight Pressure on the Lever (D). The Latch (C) is Released and Closed with one Movement, and is Self-Locking.

PATENT SLIP ROLL FORMERS

These Formers are Intended for Forming Cylinders of Small Diameters and are an Improvement Over Our Old Slip Roll Tin Pipe Forming Machines and Those Which the Present Market Offers. All Operations are Performed at One End of the Machine—the Convenient End, Where the Crank is Fitted.

After the Cylinder is Formed the Latch When Opened Permits the Upper Roll to Raise Automatically. The Formed Cylinder Can then be Removed from the Roll Without Distorting it. The Latch with the Roll is Released and Closed with One Movement and is Self-Locking. Rolls are Adjusted with Knurled Screws and Once Adjusted They Cannot Slip. The Gears are Steel Machine Cut.

GROOVING MACHINES

These Machines are Constructed for General Grooving and Have an Improvement Consisting of an Attachment Which Grooves and Flattens the Seams of Cylinders in One Operation. Lower Bar or Horn (A) is Reversible, so that Either the Flat Surface of One of the Grooves Which is Planed into the Horn Can be Turned Upward, Permitting for the Locating of Seams on the Inside or the Outside of the Work. The Seam is Put on the Inside of Work by Means of Flat Roll Which Presses the Seam into One of the Grooves Planed in the Horn, Outside Grooving is Done in the Usual Manner by Using the Grooved Rolls on Flat Surface of Horn. An Adjustable Stop Collar (B) is Fitted on Lower Horn (A) to prevent Work Slipping While Being Grooved.

An Improved Feature Will be Found in the Carriage Which Holds Flattening Roll and Grooving Roll. The Flattening Roll Runs Idle on the Outward Run and the Grooving Roll Runs Idle on the Backward Run. In Other Words, Both Rolls do Not Press on the Seam at the Same Time, Which Makes for Easy Grooving. The Old Style Friction Spring and Roll for Tension are Not Used, the Tension Being Secured Through a More Simple Arrangement at (F), Which Permits for Greater Uniformity in the Seams Grooved and Eliminates Frequent Spring Breakage.

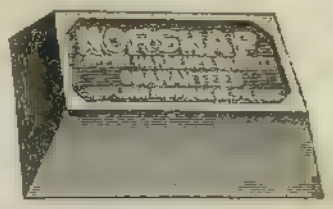
No. SA1—1 lb. Cakes... ..... 1.10
One Cake in a Package

BABBITT METAL

True Economy in the Use of Babbitt Metal is Determined by the Service Given, Rather than the Cost per Pound; Service is Determined by the Length of Time a Bearing will Continue to Wear without Deterioration; this Desirable Quality is Dependent upon the Higher Percentages of Copper, Tin and Antimony Used; it is therefore Important to Select only High Grade Metal

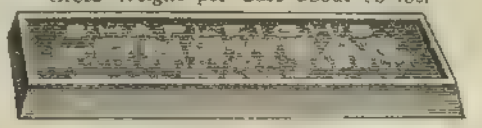


★NORSHAP

Formula Contains a High Percentage of Copper, Tin and Antimony; Adapted to High Speed Bearings and Heavy Pressures; Exceptionally Serviceable and Never Fails to Give Entire Satisfaction.

Per Pound

No. NORSHAP—Unit Bars, Weight, about 4⅝ lbs. Each; About 54 to 56 lbs. in a Case $0 60
Gross Weight per Case about 60 lbs.



★LONGWEAR

A Heavy Bearing Metal of Long Wearing Qualities; the Alloy Produce a Smooth Pouring Metal, for Mill and Railway Service.

Per Pound

No. LONGWEAR—Unit Bars, Weight about 4 lbs. Each; about 54 to 56 lbs. in a Case. $0.50
Gross Weight per Case about 60 lbs.

★XCD

Made on a Time Tried Formula; Specially Suited for and Gives Excellent Service on Bearings of Ordinary Speeds; Not Recommended for High Speeds or Unusual Pressures.

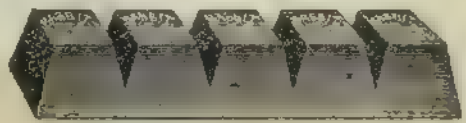
Per Pound

No. XCD—Five-Piece Bars; Weight about 8¼ lbs. Each; about 103 to 106 lbs. in a Case..... $0.25
Gross Weight per Case about 114 lbs.

A Well Known Standard Babbitt Metal, Adapted to all Bearings of Medium Speeds and Pressures; Contains a Serviceable Percentage of Tin and Antimony.

Per Pound

No. 1—Five-Piece Bars; Weight about 7¾ lbs. Each; about 101 to 106 lbs in a Case $0 30
Gross Weight per Case about 114 lbs.

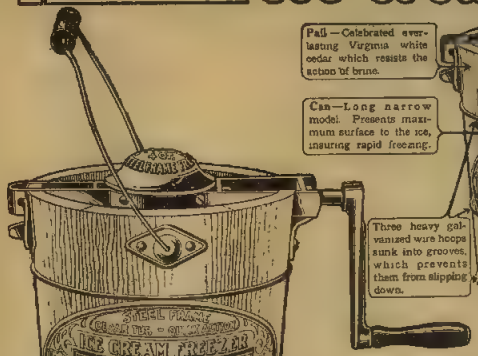


A Low Grade Babbitt Metal and Slow Speed and Light Pressures; Made to Standard Formula for this Grade.

Per Pound

No. 4—Five Piece Bars, Weight about 6½ lbs. Each; about 100 to 107 lbs. in a Case $0 25
Gross Weight per Case about 114 lbs

Hibbard Ice Cream Freezer



Pail—Celebrated everlasting Virginia white cedar which resists the action of brine.
Can—Long narrow model. Presents maximum surface to the ice, insuring rapid freezing.
Three heavy galvanized wire hoops sunk into grooves, which prevents them from slipping down.
Frame—Rust-proof non-breakable stamped steel. Will withstand the hardest usage.
Mechanism—Two distinct motions—can turning from left to right while the dasher turns from right to left, scrapers remove cream from sides of can as fast as centrifugal motion of dasher throws cream from center of can back to side, scrapers remove it instantly and return the cream to the center, repeating the operation, the result being a smooth well beaten, velvety cream.
STEEL FRAME
ICE CREAM FREEZER
Hibbard
HIBBARD, SPENCER, BARTLETT & CO.
CHICAGO

Pails—Made of the celebrated everlasting Virginia White Cedar, which resists the action of galvanized wire hoops, sunk into grooves which brine. Painted Royal Blue. Bound with heavy prevents them from slipping down.

Frames—Rust-proof, made of non-breaking, stamped steel, will withstand the hardest usage.

Cans—The long narrow model which presents a maximum surface to the ice, insuring rapid freezing—a very strong feature of the **Hibbard**.

Mechanism—There are two distinct motions—the can turning from left to right while the dasher turns from right to left, and the wood scrapers on the dasher removing the cream from the sides of the can as fast as it is frozen. The centrifugal motion of the dasher throws the cream from the center of the can back to the side, which is revolving in the opposite direction, where the scrapers remove it instantly and return the cream to the center, repeating the operation, the result being a smooth, well-beaten velvety cream.

HALF DOZEN IN A CARTON.

THE ALASKA GREY GOOSE FREEZERS

Very simple in construction — can turns in one direction and dasher in opposite. Gears are covered—no chance of pinching fingers. Outside metal parts are galvanized to prevent rust. Novel ice guard keeps all ice and salt from inside of can.

Cans are of heavy American charcoal tinplate, high and narrow, exposing more cream to chill of ice and salt.

Tubs made from clear, kiln-dried Northern pine with welded hoops. After being sanded smooth they are given three coats of high grade enamel.

Dasher has many serating spoon shaped floats like slotted mixing spoons, set at an angle to give an upward movement to cream and whips air into every particle of rapidly freezing mixture. Result is a marvelously delicate flavor, a fine texture and an exquisite blending. This principle together with high narrow cans, shortens time of freezing to 3 or 4 minutes.

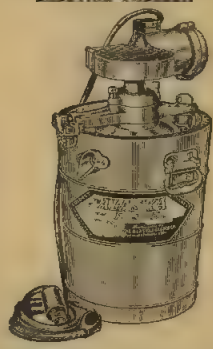
THE ALASKA HOUSEHOLD ELECTRIC FREEZER



The real pleasure of making ice cream at home has never been experienced until own an Alaska Household Electric Freezer. Every ice cream lover who has struggled with the old style hand freezer will be glad to know that there is now a power freezer on the market that once and for all takes the labor out of ice cream making. The Alaska has no complicated or expensive arrangement; it is simple, compact and practical. Everything is enclosed — no chance of pinching the fingers or of its getting clogged with ice or salt. The enameled tub keeps the ice longer and the temperature lower. Aside from the labor it saves, you are able to make a cream with a smooth, solid body in from 4 to 6 minutes times.

Attach the plug to your lamp socket, turn the switch that is all you have to do. In four minutes turn off the power and you have a smooth delicious cream.

Four Star Features

1. Freezes Cream in 4 to 6 minutes.
2. Absolutely safe — no gears exposed to crush the fingers. Everything is enclosed.
3. Compact—loosen the frame button on the freezer, lift off the frame with motor attached just as you would an ordinary freezer.
4. Works from your lamp sockets. The motor is of the 110 volt universal type and adapted to both alternating and direct currents. It is equipped with ten feet of cord, switch and fusible plug.

WHITE MOUNTAIN FREEZER

TRIPLE MOTION
NEW DESIGN

With Crank.
(Sectional View)

New Design Triple Motion Freezer embodies the very latest and most scientific construction. Tubs built on new lines of correct height and diameter resulting in minimum ice consumption. Cans made of Keystone Copper Steel Charcoal Tin Plate are of corresponding height insuring quick freezing. Can covers cast iron with accurate gear teeth. The special patented new form of beater retains the famous Triple Motion, an original and exclusive feature of White Mountain Freezers. Entirely new top frame construction eliminating all complicated gear mechanism making smooth and easy operating freezer.

New inner construction of the freezer insures even, thorough and efficient freezing of the cream together with proper mixing and beating of the entire cream contents.

Can is turned by means of a lug or stop on the inner surface at the top connecting with a corresponding lug or stop on inside of can lid or cover. Bottom of the inner mixer with floats fits over the dasher support in the bottom of the can and revolves with the can, the cup-shaped bearing at the top of the mixer turning on a pivot. The outer mixer, with wooden scrapers, revolves on the dasher support in an opposite direction between the inner mixer and the can.

FROST KING FREEZER

Steel Frame, Single Motion.

This is a single-motion freezer that is made fully as well as the double or triple-motion freezers. The mechanism is very easy to operate. The freezer can is of the narrow model type, making the freezing very rapid. The tub is made of Virginia white cedar. Electric-welded wire hoops sunk into grooves, with steel frame, locks and catches are made of non-breakable steel.

The operation is extremely simple. The wood scrapers on the dasher press automatically against the sides of the revolving can. These remove the frozen cream and throw it to the center where the spoons on the beater mix it with the cream still unfrozen and return the whole to the sides to be re-frozen.

SAMSON POWER FREEZER

Triple Motion

The platform and stand are of cast iron. The gear frame extends across the top of the tub, and is fastened by a latch bolt and thumb screw. When the frame is released it can be raised to an upright position, and is there held firmly. The can and tub may be removed and replaced at pleasure, while the frame is in this position.

The beaters are malleable iron and tinned, with double self-adjusting wood scraping bar. The tubs are exceedingly heavy and durable. The cans are of the heaviest tin plate. The pulleys on both the 25 qt. and 40 qt. sizes are 24×4½ in. and should turn about 75 revolutions per minute to give the correct speed to the freezer.

TALKING MACHINES

HARMOGRAPH

PLAY ANY DISC RECORD MADE

TONE—Harmograph Talking Machines Have Long Had a Reputation for Being Marvelous Tone Reproducers. The Softest Strains of the Violin the Clear Notes of the Singer the Full Rich Melody of Orchestras as Well as the Syncopating Jazz Bands are All Reproduced Perfectly and Naturally. This is Due Principally to the Scientific Construction of the Harmograph Tone Chamber.

CABINET—Harmographs are Designed Along Lines That Please the Artistic Eye They are Symmetrical in Dimensions and Compare Favorably with Any Phonograph on the Market. The Finish is Unexcelled All Panels are 5 Ply or 3 Ply Veneered, ½ inch Thick, According to Size; the Outer or Surface Plys of the Beautifully Grained Natural Wood Described; the Inner Plies are of Close Fibered Soft Woods Best Adapted to Give Strength and Durability to the Panels. Frame and Legs are Gum or Poplar, Highly Finished to Match Panels.

EQUIPMENT—Equipped with Universal Tone Arm Which Permits the Playing of All Makes of Disc Records Motors are Simple, Durable and Efficient; Can be Wound While Playing.

VIOLIN SPRUCE DIAPHRAGMS

Spruce has Long Been Recognized as the Ideal Resonator. These Diaphragms have been Treated by a Secret Process to Prevent Warping and to make them Waterproof.

Each Violin Spruce Diaphragm is Graduated in Thickness According to the Depth and Size of Your Reproducer.

In Every Fibre of Violin Spruce are Suspended Innumerable Diaphragms, Almost Infinitesmal in Size. Under the High-Powered Microscope these Minute Diaphragms are Revealed as Perfect Sounding Boards, All Vibrating Sympathetically. Cut Shows a Tremendous Magnification of One of them, Showing How Wonderfully Nature has Adapted Violin Spruce for Tone Reproduction.

Violin Spruce Diaphragms Continue to Reproduce Perfectly Even After Holes have been Punched in them.

Each

No. VSD—All Standard Sizes..... $2.00

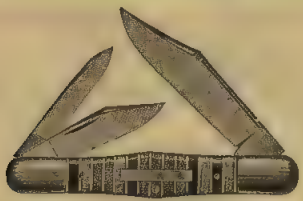
THE MOST ATTRACTIVE Hibbard POCKET KNIFE ASSORTMENT EVER OFFERED TO THE TRADE

One of the best and most popular patterns in the pocket knife line—a favorite for over 50 years—**although never grown old, the new party clothes make this pattern look newer and younger than ever.**

The super attractive handles make these knives so irresistable that they simply sell themselves. Only a few have stag handles.

Used extensively by carpenters, mechanics, farmers, stockmen, and others who need a strong and substantial pocket knife that is not too large or clumsy. Very strong—capable of doing heavy work.

Dealers should not hesitate to buy a couple assortments.



Three blades, the large extra heavy clip point blade is highly polished on front side, the small pen blade and small clip point blade are nicely glazed. Brass lined, nickel silver bolsters and shield. Length when closed 3⅞ in.

No. C2431P—Hibbard Assortment consists of 1 dozen Knives assorted as follows: 3 each with striped celluloid handles, plaid celluloid handles, Egyptian pearl celluloid handles and stag handles. Put up in a handsome plush lined partitioned counter display box, per assortment $26.65

SELF-SETTING IRON PLANES

SMOOTH BOTTOM

The cutter irons are made from special high grade steel, are thin and easily kept in order.
The malleable Frog and Steel Cap reduce greatly the liability of breakage.
Handle and knob are made of highly finished, thoroughly seasoned rosewood. They are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned, giving the planes a very fine finish throughout.

Body is made from one piece steel which is reinforced to give added strength. Has the Bailey patent frog and latest improvements.

This construction makes the Plane almost unbreakable, yet leaving it light in weight.

English steel cutters, tempered and honed. Rosewood handles. Malleable frog and cap.

No. 4ST—Smooth, 9 in. long, 2 in. cutters, w't 3 lbs.....each $7.00

No. 5ST—Jack, 14 in. long, 2 in. cutters, w't 4 lbs.....each $8.00
ONE IN A BOX

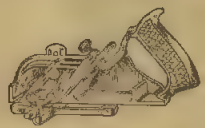
STEEL BLOCK PLANES

Plane is similar in construction to regular No. 18 Block Plane except bottom and adjustable front are made of steel instead of grey iron, making it practically indestructible.

Knuckle joint steel lever cap, nickel plated.

No. 18S—Length 6 in., cutter 1⅝ in., w't each 1¼ lbs.....each $5.05
ONE IN A BOX

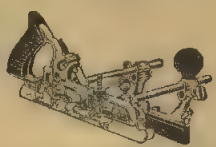
ALUMINUM DUPLEX RABBET & FILLISTER



This Plane has two seats for the cutter, one for regular and the other for bull-nose work. It has a spur and a removable depth gauge. The adjustable fence can be used on either side and slides under the bottom. To work as a rabbet plane remove fence and arms. Cutter has an improved lever adjustment endwise. The aluminum fence and body make it light in weight.

No. 78A—8½ in. long, 1¼ in. cutter, w't each 1¼ lbs.....each $6.00

ALUMINUM COMBINATION PLANE



No. 45A—Similar in design to the regular Stanley No. 45 Plane. Being made of aluminum it is exceptionally light in weight and will not rust. Handle and knob are rosewood. Complete with 23 cutters consisting of 1⅛ in. Sash Tool, ¼ and 7/16 in. Match Tool, one Slitting Tool, 1¼ in. Fillester. ⅛, 3/16, ¼, 5/16, ⅜, 7/16, ½, ⅝, ¾, ⅞ and 1 in. Plow and Dado Tools. ⅛, 3/16, ¼, 5/16, ⅜, 7/16 and ½ in. Beading Tools. Each plane has an adjustable fence and depth gauge, spurs for use across the grain and can be used right or left hand. W't each 7¾ lbs.....each $27.10

HOUSEHOLD PLANE

Here is a plane suited for any use around the home at a price we have not been able to make in years.

The plane is special and has not before been offered to the trade. It will retail for $1.00. We know of nothing like it for the price.

No. 1000—9 in. Smooth, 1⅝ in. single cutter. Cutter iron held securely by cap and set screw, w't each 2 lbs., each $1.90

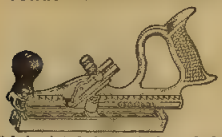
ONE IN A BOX

SHIPPING · FACILITIES

With our immense stock and very modern facilities for shipments we are enabled to fill orders with unequalled promptness. On some of the roads we have special through cars which enable us to reach distant points 24 hours ahead of shipment made in the regular way.

STANLEY ADJUSTABLE PLANES

TONGUING AND GROOVING



Nickel plated iron stock and face, including tonguing and grooving tools.

The fence is set in a center pivot and can be swung around and locked either way. Set one way it exposes two cutters for cutting the tongue and when reversed leaves only one exposed for making the groove.

No. 49—8½ in., for ¼ to 1½ in. boards, w't 3 lbs. ..... each $7.55

No. 49—8 in., for ⅛ to ¾ in. boards, w't 2¾ lbs. ..... each $7.55

ONE IN A BOX

DOUBLE END MATCH

Nickel Plated.

Provided with both tongue and groove irons. With one side a tongue can be cut, and by reversing ends, the plane will cut a groove to fit.

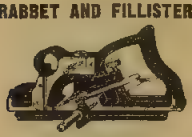
No. 146—Matches ⅝ in. boards, cuts groove ⅛ in., w't 1⅛ lbs., each $5.75

No. 147—Matches ⅝ in. boards, cuts groove 5/16 in., w't 2 lbs., each $6.10

No. 148—Matches ¾ in. boards, cuts groove ¼ in., w't 2¾ lbs., each $6.45

ONE IN A BOX

RABBET AND FILLISTER



The sides and bottom being square with each other, the planes will lie perfectly flat on either side. Adjustable fence slides under bottom to regulate width of cut. Has one spur on each side and adjustable depth gauge. Is suitable for either right or left hand work. The front part of plane can be easily detached thus providing a bull nose plane.

No. 278—Japanned iron stock and fence, 6¾ in. long, 1 in. cutter, w't 2 lbs. ..... each $4.65

ONE IN A BOX

IMPROVED RABBET

Iron stock, length 8 in., with depth gauge.

WITH SPUR

Lies perfectly flat on either side, used with right or left hand equally well, while planing into corners or up against perpendicular surfaces.

Nos.	190	191	192
Cutter, in.	1¾	1¼	1
W't, lbs.	2¾	2¼	2
Each	$4.20	4.00	3.75

DUPLEX RABBET AND FILLISTER

Two seats for the cutter, one for regular work and the other where a bull nose is required. Spur and removable depth gauge. Adjustable fence can be used on either side and slides under the bottom regulating width of cut. To use as rabbet plane, remove fence and arms.

No. 78—8½ in. iron stock and fence, 1¾ in. cutter, w't 3 lbs. . each $4.65

SKEW CUTTER, FILLISTER AND RABBET

The fence and depth gauge can be attached to either side so that the plane can be used equally well for right or left hand work. The adjustable fence slides under the bottom, regulating the width of the cut. By removing arms and fence a skew cutter rabbet plane is obtained.

No. 289—8½ in., japanned, 1¾ in. cutter with fence and depth gauge and two adjustable spurs, one on each side, w't 4 lbs. ..... each $5.45

ROUTER PLANE

No. 271—Length 3 in., ¾ in. cutter. Can be set on either side of the base and used as open or closed throat, enabling user to trim out grooves or depressed surfaces used for bull nose work by having cutter on closed side of plane, w't ¼ lb. ..... each $1.00

ALL ABOVE ONE IN A BOX

WOODWORKERS' ROUTER

For surfacing the bottom of grooves and depressions parallel with the general surface of the work. The open throat design gives more freedom for chips and a better view of the work and cutter. The latter has an attachment for regulating the thickness of the chip and a second attachment for closing the throat for use on narrow surfaces.

Open Throat.

No. 71—Nickel plated, width 7⅛ in., ⅛ and ¼ in. steel bits, with throat attachment, w't 2¾ lbs., each $5.80

ONE IN A BOX

Closed Throat.

No. 71½—Nickel plated, width 7⅛ in., ⅛ and ¼ in. steel bits, w't 2¾ lbs., each $4.55

ONE IN A BOX

DOOR TRIM

This new plane will make mortises for Butts, Face Plates, Strike Plates, Escutcheons, etc., without the use of a butt gauge or chisel. Cutter can be set to work from either end of the plane or across it. Spring prevents taking a heavier chip than can be easily carried.

No. 171—11 in., japanned, nickel plated trimmings, rosewood handles, 3 forged steel cutters, w't 3 lbs., each $8.45

ONE IN A BOX

Hibbard ADJUSTABLE PLANES

Hibbard Iron Planes answer all requirements for a first class tool. Cutters are made from English steel, carefully hardened, tempered and honed ready for use, adjustable endwise and sidewise. Handles are solid mahogany, nicely finished.

Wood Planes are made from selected Beechwood, well seasoned and nicely finished.

PLANES

"BAILEY" ADJUSTABLE IRON

The handle and knob are made of highly finished, thoroughly seasoned rosewood. The English steel cutter is tempered, ground and honed, ready for use, is adjustable both endwise and sidewise, and bedded to the heel of bevel. The width of mouth can be varied by changing the setting of the frog. Bottoms, either flat or corrugated—see cut 7C—as desired.

STANLEY "BED ROCK"

For fine work on hard and knotty wood, this plane surpasses all others.

The cutter, frog and bottom are so machined and fitted that they are practically one solid piece of metal, thus preventing any chance of vibration.

The frog travels in a groove, ensuring it being square with the mouth of the plane, and preventing shifting or "wobbling."

The width of the mouth can be regulated by use of a screw driver as shown in the cut, without removing the cutter and lever.

The cutters are made of the best English steel and are adjustable both endwise and sidewise.

The shape of the sides, a distinctive feature, adds greatly to the strength of the plane.

The handles and knobs are of rosewood and finely finished.

Bottoms either flat or corrugated (see No. 606C) as desired.

SELF-SETTING IRON PLANES

CORRUGATED BOTTOM

Corrugated bottom planes are preferred by many users, because of there being less friction from the bottom, runs a little lighter. They have the self-setting cutter iron made from special high grade steel.

The malleable Frog and Steel Cap reduce greatly the Liability of breakage.

The Handle and Knob are made of highly finished, thoroughly seasoned rosewood. These are securely fastened to plane with steel rods that have brass screw heads. Trimmings are nickel plated and japanned. Plane is finely finished throughout.

The self-cutting feature lies in the construction of the plane iron. If taken out to be honed or sharpened, goes back in same position as before removal. The plane cannot chatter because the cutter iron is held rigid at the point by the cap; at the same time the cap screw used for tightening the cap is pressing against the binder plate on top of the cutter iron. This pressure against the binder plate holds the cutter firm its entire length.

ONE IN A BOX

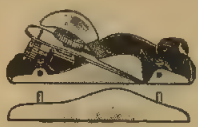
RABBET AND BLOCK PLANES



The detachable side will easily change this tool from block plane to a rabbet plane and vica versa. The cutter is adjustable end-wise and is set on askew.

No. 140—7 in., with detachable side, 1⅝ in. cutter, w't 1¼ lbs., each $4.35

ONE IN A BOX

IMPROVED DADO

8 Inch, Iron Stock, with Depth Gauge and Two Adjustable Spurs.

Holds true in narrow widths where a wood plane will not. Has a skew cutter and adjustable depth gauge and spurs on each side of plane, thus allowing wear to be taken up and depth of the cut regulated.

No. 39—In.	¼	⅜	½
Each	$4.20	4.45	4.75
No. 39—In.	⅝	¾	⅞
Each	$5.00	5.20	5.55

ONE IN A BOX

STANLEY CORNER ROUNDING PLANES

Designed for rounding corners on Battens, Casings, Shelving, etc.

The cutters are sharpened ready for use. Length 7⅛ in., japanned finish, w't 1¼ lbs.

No. 144—In.	¼	⅜	½
Cuts circle, in.	⅛	¼	⅜
Each	$2.35	3.35	2.35

ONE IN A BOX

CABINET MAKERS' RABBET PLANES

For fine cabinet or other work where extreme accuracy is required. The sides and bottom, being square with each other, the plane will lie perfectly flat on either side and can be worked either right or left hand. They have adjustable throats; this means that the width of the throat opening, or mouth, can be widened or narrowed as coarse or fine work may require. They are also fitted with the side groove or "Handy" grip feature. The cutters are adjustable end-wise.

Nickel Plated, with Adjustable Throat.

No. 90—4 in., bull nose, adjustable, 1 in. cutter, w't 1 lb.....each $5.75

Nickel Plated, with Adjustable Throat.

Nos.	92	93	94
Length, in.	5½	6½	7½
Cutter, in.	⅞	1	1⅛
W't, lbs.	1¼	1⅜	2
Each	$5.75	6.90	7.90

ONE IN A BOX

HORN SCRUB

This plane is imported from Germany where it is extensively used. It has a round nose iron and is especially useful for rough planing.

No. 500—9 in., 1⅝ in. single iron, with horn, white hardwood nicely finished, w't 1¾ lbs., each $3.10

ONE IN A PACKAGE

Extra iron for No. 500, each $1.10

Hibbard STAINLESS STEEL POCKET KNIVES

A stainless pocket knife that will not rust, stain, tarnish, discolor or corrode. A knife that really has a lasting, sharp cutting edge.

STAYS SHARP — STAYS BRIGHT

THE KNIFE THAT WILL LAST A LIFETIME

The ideal knife for campers, sportsmen, fishermen, tourists, farmers, mechanics, office men, or anyone that carries a pocket knife. Give wonderful satisfaction and pleasure in use. Many pocket knives are discarded after they become rusty and dirty looking. Hibbard Stainless Steel Pocket Knives always remain bright and shiny and always have that new and clean appearance, as there is nothing to rust and nothing to stain.

The attractive window display we send along with every order for these assortments will sell many Hibbard Stainless Knives for your customers. It catches the eye, makes passers-by stop and observe. Sells by suggestion. All dealer has to do is to place a lemon in a mason jar three quarters full of water, stick one of the Hibbard Stainless Pocket Knives and an ordinary old carbon steel pocket knife into same as indicated on large display card. Put the jar, display cards, etc. in a prominent place in show window and big results are bound to follow.

Get after this business at once and before the other fellow beats you to it. It will surprise you how easily you can roll up a volume of business on this item.

IRON BENCH PLANES

STANLEY

Bed Rock; Adjustable

Japanned Cast Iron Frame; Rosewood Handle and Knob; Finest Quality Thin Steel Cutter; Ground and Honed.

Cutter Frog and Bottom so Designed, Machined and Fitted that they are Practically One Solid Piece of Metal.

The Frog May be Adjusted Either Forward or Backward without Removing the Lever and Cutter: Simply Slacken the Tension of the Two Frog Clamping Screws and with a Screw Driver Adjust the Frog by Means of the Frog Adjusting Screw then Tighten the Frog Clamping Screws.

The Cutter is Adjustable Endwise by Means of the Adjusting Wheel at the Back of the Frog; it is Also Adjustable Sidewise by Lever Located Near the Top and at the Back of the Cutter.

Corrugated Bottom

Japanned Cast Iron Frame; Rosewood Handle and Knob; Finest Quality Tempered Thin Steel Cutter; Ground and Honed, Ready for Use.

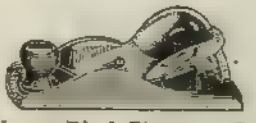
RABBET AND BLOCK PLANES

STANLEY



Cast Iron, Japanned Trimmings; Rosewood Knob. A Detachable Side Will Easily Change It from a Block Plane to a Rabbet Plane, and Vice Versa, a Combination That Will be Appreciated by Many. The Cutter is Adjustable Endwise, and Set on a Skew. Length, 7 inches; 1¾ inch Cutter.

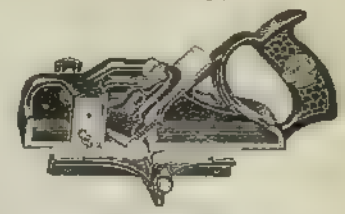
Each

No. 140—Weight Each, 1⅝ lbs..... $4.30

One in a Box

RABBET AND FILLETSTER PLANES

STANLEY



Skew Cutter

This Plane Has an Extra Wide Skew Cutter. An Adjustable Spur is Fitted to Each Side. The Fence and Depth Gauge Can be Attached to Either Side; the Plane is Therefore Suitable for Right or Left Hand Work. The Adjustable Fence Slides Under the Bottom, Regulating the Width of the Cut. Remove Arms and Fence, and a Skew Cutter Rabbet Plane is Obtained. Length, 8½ inches; Handles Cast Iron; Japanned; 1¾ inch Cutter.

Each

No. 289—Weight Each, 3¾ lbs..... $5 50

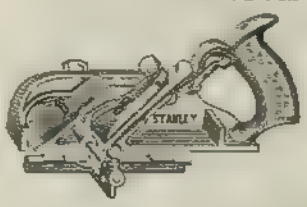
One in a Box

Duplex This Plane has Two Seats for the Cutter, One for Regular Work and the Other where a Bull-nose is Required. It has a Spur and a Removable Depth Gauge. The Adjustable Fence Can be Used on Either Side and Slides Under the Bottom, Regulating the Width of the Cut. To Work Same as a Rabbet Plane Remove Fence and Arms. Length, 8½ inches; Handled; Cast Iron; Japanned; 1½ inch Cutter.

Each

No. 78—Weight Each, 3 lbs..... $4 70

One in a Box



Duplex Filletster Aluminum Differs from No. 78, in that the Cutter is Adjustable Endwise; Also in that Bottom is of Aluminum, Making it Light in Weight as Well as Rust-Proof. Aluminum; Length, 8½ inches; Handled; 1½ inch Cutter.

Each

No. A78—Weight Each, 1¼ lbs. ..$6 00

One in a Box

The Sides and Bottom Being Square with Each Other, the Plane will Lie Perfectly Flat on Either Side.

It has an Adjustable Fence which Slides Under the Bottom, Regulating the Width of the Cut.

It is Fitted with Two Spurs, One on Each Side, for Working Across the Grain; Also an Adjustable Depth Gauge.

As Both the Fence and the Depth Gauge can be Attached to Either Side, the Plane is Suitable for Either Right or Left Hand Work.

The Front Part of the Plane Can be Easily Detached, thus Providing a Bull Nose Plane for Working Close up into Corners or Other Difficult Places. The Cutter is Adjustable Endwise.

Cast Iron; Japanned Trimmings; Length 6¾ inches; 1 inch Cutter.

Each

No. 278—Weight Each, 2 lbs..... $4 60

One in a Box

IRON BLOCK PLANES

BAILEY

Adjustable
All Numbers Have the Most Improved Form of Adjustment, which Enables the User to Accurately Adjust the Cutter Either Endwise or Sidewise. The Cutter Rests on its Seat at an Angle of 20 Degrees as Against 45 Degrees in the Ordinary Bench Plane, and the Cutter Bevel is Made on the Upper Instead of on the Lower Side. All Have Adjustable Throats which Permit of the Opening or Closing of the Mouth as Coarse or Fine Work may Require.

Length, 6 inches; 1⅝ inch Cutter; Japanned Trimmings.

Each
No. 9½—Weight Each, 1½ lbs.....**$3 30**
One in a Box

Length, 7 inches; 1⅝ inch Cutter; Japanned Trimmings.

RABBET AND BLOCK PLANES

STANLEY

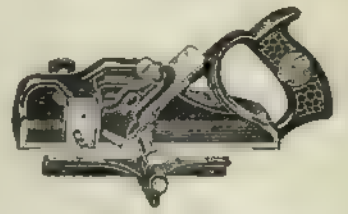
Cast Iron, Japanned Trimmings; Rosewood Knob. A Detachable Side Will Easily Change It from a Block Plane to a Rabbet Plane, and Vice Versa, a Combination That Will be Appreciated by Many. The Cutter is Adjustable Endwise, and Set on a Skew. Length, 7 inches; 1¾ inch Cutter.

	Each
No. 140—Weight Each, 1⅛ lbs	$4 30

One in a Box

RABBET AND FILLETSTER PLANES

STANLEY



Skew Cutter

This Plane Has an Extra Wide Skew Cutter. An Adjustable Spur is Fitted to Each Side. The Fence and Depth Gauge Can be Attached to Either Side; the Plane is Therefore Suitable for Right or Left Hand Work. The Adjustable Fence Slides Under the Bottom, Regulating the Width of the Cut. Remove Arms and Fence, and a Skew Cutter Rabbet Plane is Obtained. Length, 8½ inches; Handles Cast Iron; Japanned; 1¾ inch Cutter.

	Each
No. 289—Weight Each, 3¾ lbs	$5 50

One in a Box

Duplex

This Plane has Two Seats for the Cutter, One for Regular Work and the Other where a Bull-nose is Required. It has a Spur and a Removable Depth Gauge. The Adjustable Fence Can be Used on Either Side and Slides Under the Bottom, Regulating the Width of the Cut. To Work Same as a Rabbet Plane Remove Fence and Arms. Length, 8½ inches; Handled; Cast Iron; Japanned; 1⅝ inch Cutter.

	Each
No. 78—Weight Each, 3 lbs	$4 70

One in a Box

Duplex Filletster Aluminum

Differs from No. 78, in that the Cutter is Adjustable Endwise; Also in that Bottom is of Aluminum, Making it Light in Weight as Well as Rust-Proof. Aluminum; Length, 8½ inches; Handled; 1½ inch Cutter.

	Each
No. A78—Weight Each, 1¼ lbs	$6 00

One in a Box

The Sides and Bottom Being Square with Each Other, the Plane will Lie Perfectly Flat on Either Side.

It has an Adjustable Fence which Slides Under the Bottom, Regulating the Width of the Cut.

It is Fitted with Two Spurs, One on Each Side, for Working Across the Grain; Also an Adjustable Depth Gauge.

As Both the Fence and the Depth Gauge can be Attached to Either Side, the Plane is Suitable for Either Right or Left Hand Work.

The Front Part of the Plane Can be Easily Detached, thus Providing a Bull Nose Plane for Working Close up into Corners or Other Difficult Places. The Cutter is Adjustable Endwise.

Cast Iron; Japanned Trimmings; Length 6¾ inches; 1 inch Cutter.

	Each
No. 278—Weight Each, 2 lbs	$4 60

One in a Box

RABBET PLANES

STANLEY

These Planes Will Lie Perfectly Flat on Either Side and Can Be Used Equally as Well with Right or Left Hand While Planing Into Corners or Up Against Perpendicular Surfaces.

Length, 8 inches; Handled; Cast Iron; Japanned; Fitted with a Spur which Permits the Plane Being Used for Working Across the Grain; Also Fitted with a Detachable Depth Gauge.

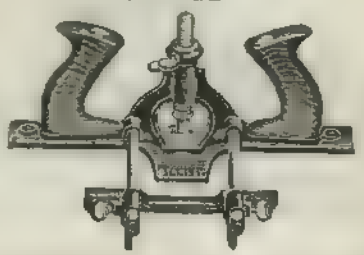
DOOR TRIM PLANES
STANLEY



Will Make Mortises for Butts, Face Plates, Strike Plates Escutcheons, etc., Up to a Depth of 5/16 and a Width of 3 inches. Its Original Feature is the Method of Mounting the Cutter, Which Can be Instantly Set to Work From Either End of the Plane or Across it. In Addition, the Cutter is Cushioned by a Spring Which Prevents Taking a Heavier Chip Than Can be Easily Carried. A Fence Regulates the Position of the Cut and Insures the Sides of the Cut Being Parallel. The Depth of the Cut is Governed by a Positive Stop.

By Removing the Fence and Locking the Cutter Post With the Thumb Screw Instead of Using the Spring a Very Superior Router Plane is Obtained. The Bottom is Designed so That an Extra Wooden Bottom of Any Size Desired Can be Screwed on, Enabling the User to Router on Large Openings; Cast Iron, Japanned; Rosewood Handles; Length, 11 inches; Furnished With Three Forged Steel Cutters, 3/16, 5/16 and 7/16 inch Wide.

Each
No. 171—Weight Each, 3 lbs..... **$8.20**
One in a Box

ROUTER PLANES

STANLEY

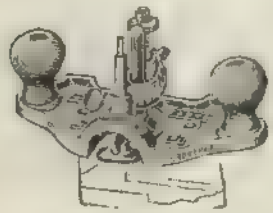
These Planes Are for Surfacing the Bottom of Grooves or Other Depressions Parallel With the General Surface of the Work.

A Combination of Open and Closed Throat Cutter Can be Set on Either Side of the Base. For Pattern Work or to Trim Out Grooves or Other Depressed Surfaces, Place Cutter on Open Side; for Regular or Bull Nose Work, Place Cutter on Closed Sides Operated With the Fingers; Nickel Plated Cast Iron; Length, 2 inches; Width 3 inches; Furnished With One ¼ inch Cutter.

Each

No. 271—Weight Each, ¼ lb..... **$1 00**

One in a Box



Open Throat

An Improved Design, Giving More Freedom for Chips and a Better View of the Work and Cutter. Has an Attachment for Regulating the Thickness of the Chip and a Second Attachment for Closing the Throat for Use on Narrow Surfaces. The Bottom is Designed so That an Extra Wooden Bottom of Any Size Desired Can be Screwed on, Enabling the User to Router on Larger Openings; Cutters Have Screw Adjustment and Can be Held as Shown in Illustration or on the Back of the Cutter Post for Bull Nose Work; Nickel Plated Cast Iron; Rosewood Knobs; Length, 7½ inches; Furnished With One Each, ¼ and ½ inch Cutters.

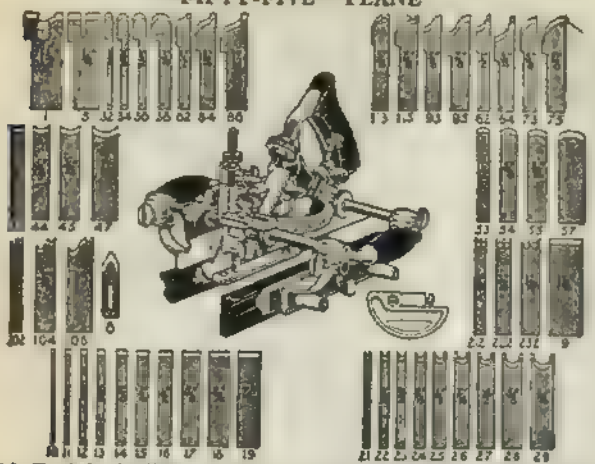
COMBINATION PLANES

STANLEY

"FIFTY-FIVE" PLANE



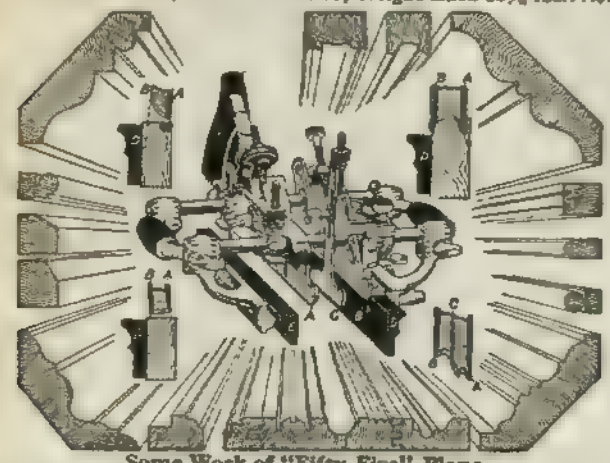
This Tool, in Addition to Being a Beading and Center Beading Plane, a Plow, Dado, Rabbet, Filletster, and Match Plane, a Sash Plane and a Slitting Plane, is also a Superior Moulding Plane, and will Accommodate Cutters of Almost any Shape and Size. In fact, it is **"A Planing Mill Within Itself."**

The Regular Equipment Sent with the Plane Comprises Fifty-two Cutters, all of which are Shown Above. These Cutters, Together with the Plane and all its Attachments, are Packed in a Heavy Cardboard Box.

All Metal Parts of the Plane are Nickel Plated. The Handle and Fences are Made of Selected Rosewood, and Every Part is Well Finished.

Each

No. 55—Nickel Plated; With 52 Cutters; Weight Each 15¾ lbs. . . **$43.50**



Some Work of "Fifty-Five" Plane

The Samples of Work Illustrated, Show Some of the Mouldings that can be Made with Cutters Regularly Furnished with this Plane.

When it is Considered, that in Addition to the Fifty-two Regular Cutters and the Forty-one Special Cutters, the Plane will Take Practically any Form of Cutter Desired, its Wide Range of Work will be Appreciated.

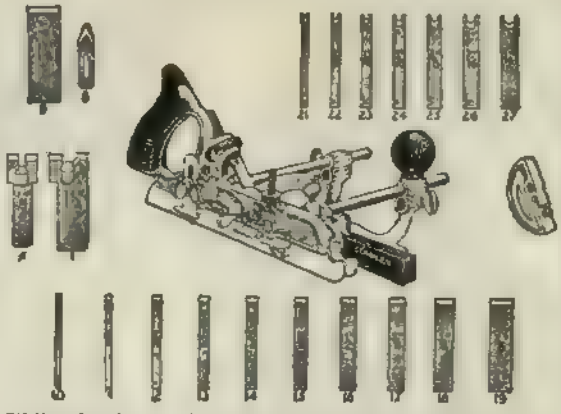
The Plane has: A Main Stock, "A", which Carries the Cutter Adjustment, a Handle, a Depth Gauge, a Slitting Gauge, and has a Steel Bottom Forming a Bearing for One Edge of the Cutter. A Sliding Section, "B", with a Steel Bottom Gives Bearing for the Other Edge of the Cutter and Slides on Arms Secured in the Main Stock. This Bottom can be Raised or Lowered so that, in Addition to Allowing the Use of Cutters of Different Widths, Cutters can be Used having One Edge Higher or Lower than the Edge Supported in the Main Stock. An Extra Support or Stop is Necessary for Cutters which First Enter the Wood at a Point Between the Outside Edges, and is a Benefit for Such Cutters which, if the Plane were Accidentally Tilted, Would Tend to Gouge the Work. The Auxiliary Center Bottom, "C", which can be Adjusted for Width or Depth, Fulfills this Requirement. Fence, "D", has a Lateral Adjustment, by Means of a Screw, for Extra Fine Work. The Fences can be Used on Either Side of the Plane, and the Rosewood Guides can be Tilted to any Desired Angle up to Forty-five Degrees, by Loosening the Screws on the Face. Fence, "E", can be Reversed for Center Beading Wide Boards.

The Plane is Fitted with Spurs for Working Across the Grain, and a Special Cam Rest, to be Located on the Front Arm when Working at a Distance from the Edge of the Board, to Keep the Fence from Sagging, or on the Rear Arm on Certain Work, to Prevent the Possibility of the Plane Rocking. All Parts are Interchangeable.

The Four Small Cuts in the Corners, Show how the Bottoms Should be Set for Different Forms of Cutters, and the Great Importance of Having the Fences Adjusted so that the Cutters will Not Run.

COMBINATION PLANES

STANLEY



"FORTY-FIVE" PLANE

Seven Tools in One in Compact and Practical Form. 1—Beading and Center Beading Planer. 2—Plow. 3—Dado. 4—Rabbet and Filletster. 5—Match Plane. 6—Sash Plane 7-Slitting Plane

The Plane has Two Principal Parts; a Main Stock and a Sliding Section. The Main Stock Carries the Handle, Cutter Adjustment, a Slitting Tool, Depth Gauge, and Forms a Bearing for One Edge of the Cutter. The Sliding Section Slides on Two Arms Secured in the Stock and has a Bearing for the Other Edge, Allowing Cutters of Different Widths to be Used. A Fence also Slides on These Arms for Use when Working as a Plow, Beader or Filletster, to Gauge the Distance from the Cutter to the Edge of the Board, and to Keep the Cutter at Right Angles to Same. When Used as a Filletster, the Fence Slides Under the Bottom of the Plane and Determines the Width of Cutter Exposed to the Work.

The Plane is Fitted with Spurs for Use Across the Grain, etc., and can be Used Either Right or Left Hand.

With Each Plane are Furnished Twenty-one Cutters, all of which are Shown Above. The Cutters, Together with the Plane, are Packed in a Heavy Cardboard Box

All Metal Parts are Nickel Plated. The Handle, Knob and Fence are Made of Selected Rosewood. For Beading at a Distance from the Edge of a Board, Attach Cam Rest (see Cut at Right of Plane) to the Front Arm Between the Sliding Section and Fence to Prevent the Fence Sagging In Certain Work Attach same to the Rear Arm to Prevent the Plane from Rocking. Nickel Plated, With 23 Cutters.

Each

No. 45—Weight Each, 9½ lbs. **$22.00**

One in a Box

ALUMINUM

Construction is the same as No. 45, Excepting that the Bottom is of a Special Hard Alloy Aluminum, Making it Extremely Light in Weight as well as Rustless; Aluminum, with 23 Cutters.

Each

No. A45—Weight Each, 7¾ lbs. **$28 90**

One in a Box

PLOW, DADO, FILLETSTER AND MATCHING

Skew Cutters are the Feature of this Plane. It Consists of a Main Stock Carrying a Spur, a Depth Gauge and a Slitting Cutter, a Sliding Section Carrying a Spur and Forming an Extra Sole for the Plane, and a Fence Rosewood Face, which can be Set for Either Plow or Filletster Work.

Nickel Plated Cast Iron; Rosewood Handle and Knob; Length 10½ inches; Eleven Cutters, Comprising 8 Plow and Dado Bits, 1/16, ⅛, 3/16, ¼, 5/16, ⅜, ½ and 1¼ inch; a 1½ inch Filletster Cutter; a ¼ inch Tonguing Tool and a Slitting Cutter.

Each

No. 46—Weight Each, 5¾ lbs. **$15 50**

SPECIAL BOTTOMS FOR "45" PLANES

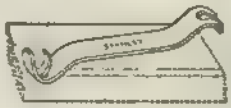
In order to work Hollows and Rounds, or a Nosing Cutter in the No. 45 Plane, it is necessary to substitute for the sliding section especially formed bottoms, which are called by the same name as the cutters they are designed to carry, that is: Hollows, Rounds or Nosing Tools.

A Hollow and its Cutters will form a **Round** on the Mouldings being worked. A Round and its Cutters will form a **Hollow**. A Nosing Tool and its Cutters will form what might be called an exaggerated Round. It is very largely used for shaping the edges of stair treads. Hollows and Rounds are made in four sizes and are usually sold in sets, a set comprising one Hollow, one Round and two Cutters. The price of a Nosing Tool includes one Cutter.

	Per Pair
✣No. 6—Hollow and Round; ¾-inch Cutters; Work ¾-inch Circle.	$3.30
✣No. 8—Hollow and Round; ⅝-inch Cutters; Work 1 -inch Circle.	3 30
✣No. 10—Hollow and Round; ¾-inch Cutters; Work 1¼ -inch Circle	3.50
✣No. 12—Hollow and Round; 1-inch Cutters; Work 1½-inch Circle	3.50

	Each
✣No. 5—Nosing Tool; 1¼-inch Cutters; Work 1¼-inch Circle	$3.60

CORNERING TOOLS



STANLEY

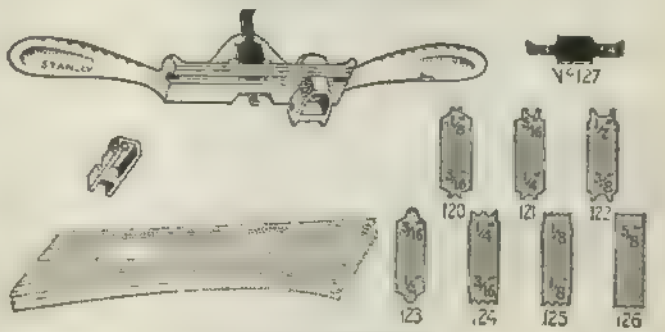
These tools are used by Pattern Makers and all wood workers for rounding sharp edges. They have a different size cutter at each end and their form is such that no depth gauge is required

Polished Tool Steel; Length 5½ inches.

	Per Dozen
No. 28—1/8 and 1/16 inch Cutter; Weight per Dozen, 1½ lbs.	$6 50
No. 29—5/8 and ¾ inch Cutter; Weight per Dozen, 1½ lbs.	6 90

Half Dozen in a Box

BEADING TOOLS



STANLEY UNIVERSAL
Two-Handed

This is an excellent tool for beading, reeding or fluting straight or irregular surfaces and for light routering. The sample illustrated shows some of the work that can be done with its use. With each beader are furnished a square guage for straight work and an oval gauge for curved work. There are also furnished eight cutters sharpened at both ends and embracing the following assortment, 6 single beads, 1/8, 3/16, ¼, 5/16, 3/8 and ½ inches; 2 fluting tools, 3/16 and ¼ inches; 4 reeding tools, (2 beads 1/16 inch, 3 beads ¼ inch, 3 beads 1/8 inch and 4 beads 1/8 inch), 2 routers 1/8 and ¼ inch, and a 5/8 inch blank, which latter cutter the owner can file up as he desires.

The handles are curved so as to insure ample room between the workman's hands and the surface of the work. Iron, Nickel Plated; Length 11⅛ inches; Eight Cutters.

	Per Dozen
No. 66—Weight Each, 1¼ lbs	$31.50

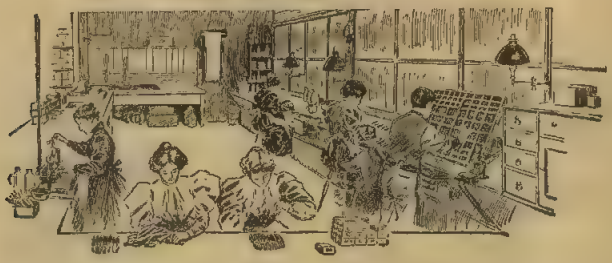
Cotton Sampler

We do not carry pocket knife blades in stock. The illustrations shown on this page being reproductions of the different styles used in H.S.B. & Co. pocket knives. Slight variations are made to adapt them to the different knives of which they form a part. All are made from Wardlow's Celebrated English crucible steel. Each blade is forged in the most approved manner by expert workmen. Great care is taken to avoid overheating the metal, the forging being done at a very low heat, thereby condensing the metal and making it extremely tough. The tempering is done by a new method which insures a uniform and lasting edge. All blades bearing the H.S.B. & Co. trademark are carefully ground and finished. The shank is carefully shaped and finished. Every blade is inspected, whetted to a fine cutting edge and warranted to be free from flaws and neither too hard or too soft.

In material, workmanship and design, the H.S.B. & Co. pocket knife blades are equal, if not superior to any made in this or any other country. They are and always have been the product of an American factory which has in its employ cutlers who have served thirty, forty and fifty years in their service.

ETCHING CUTLERY



Etching Department.

STYLES OF ETCHING

The very best way of increasing trade in pocket cutlery is through the dealer's advertisement on the large blade of his best knives. If this is done wisely, it establishes a reputation for all knives bearing the dealer's name, adding his reputation to that of the maker, and thus is a convincing argument to the quality of the article. The consumer is sure of a double guaranty, and if the brand is unknown, he at least knows that the dealer would not have his name on inferior goods. It is also a strong safeguard against theft. Several times every year we hear of stolen goods recovered which had been etched by us, the name on the blade identifying the knives and establishing evidence to convict the thieves. Numbers of our customers have informed us that they have been robbed, the thieves leaving the etched knives untouched.

Our etching department, beginning in 1896 in a very modest way, has grown to an important adjunct to our cutlery business. Our etchers have become artists in their work, having every appliance necessary or desirable to produce fine results.

Etching has become popular, and the public is quick to notice the enterprise of a dealer who has something new to offer.

We make no charge whatever for this work, feeling that we are amply repaid by the increased business the dealer is sure to give us in consequence of adding to the selling quality of his knives. Our only requirements are that the initial order call for at least 6 dozen pocket knives to retail at 50 cents or over, all one kind or assorted. Subsequently, it is only necessary to order a sufficient quantity each time to warrant doing this work, and that the goods are such that we as a firm would care to affix our guaranty.

We shall be glad to explain more fully through our representatives or by letter our position in this matter and show samples of the work.

POCKET KNIVES

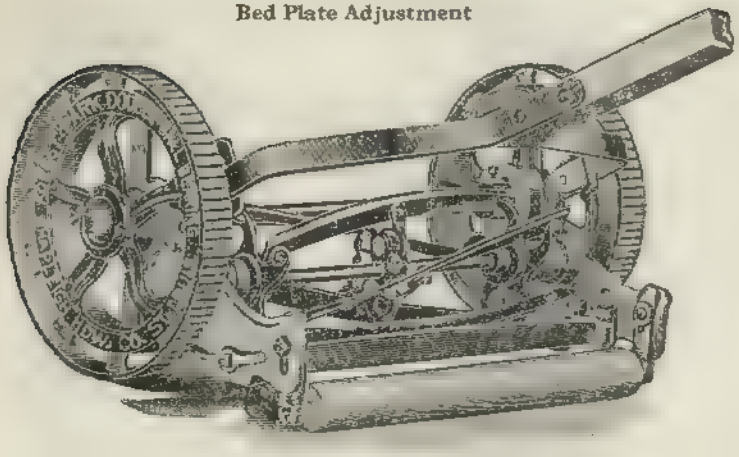
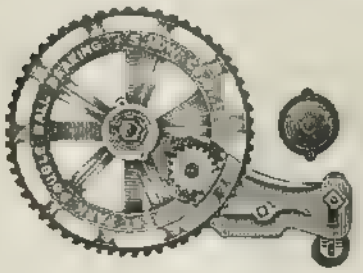
DOUBLE BALL BEARING

High Wheel

Five Blade Reel

Bed Plate Adjustment





Illustrating Gearing

This Mower is Made with Ball Bearing Drive Wheels as Well as Ball Bearing Reel, Thus Insuring an Easy Running Mower and One in Which the Wear Can be Taken Care of Accurately. The Drive Wheels are 10½ inches High, of the Open Spoke Pattern and Have a Set of Ball Bearings on Each Side of Both Wheels. The Wear in the Wheels Can be Taken Up by a Simple and Positive Adjustment.

The Ball Bearing Parts are Covered with a Cup to Protect Them from Dust and Grass.

The Reel has Five Steel Oil Tempered, Extra Heavy Blades and Malleable Iron Reel Heads

The Cones Used in Both the Wheels and Reel are Made from Bar Tool Steel.

The Cutter Bar is Adjustable and the Method of Adjusting is Simple and Reliable.

The Front Cross Bar and Reel Shaft are Made of ⅝ inch Cold Rolled Shafting.

The Machine is Geared on Both Sides and Has Double Steel Sliding Pin Ratchet; Steel Ball Bearing Cup with Ball Retainer Securely Set in the Reel Heads and Tempered Steel Cones Inserted in the Side Plates of the Machine. One of the Cones is Made with Four Holes, into which a Wrench Can be Fitted to Take Up any Lost Motion of the Reel Head Adjustable Hardwood Roller; Wrought Steel Handle Braces, 3½ feet; Varnished Hardwood Handle with Cross Bar Set in Extra Heavy Malleable Iron Bracket and Bolted.

Diameter of Drive Wheels 10½ inches; Diameter of Reel 6 inches; Reel Shaft ⅝ inch; Adjustable to Cut Grass to Lengths ¼ to 1 inch; Cuts Grass Standing 7 inches High.

Finished in Aluminum, Gold and Red.

BALL BEARING

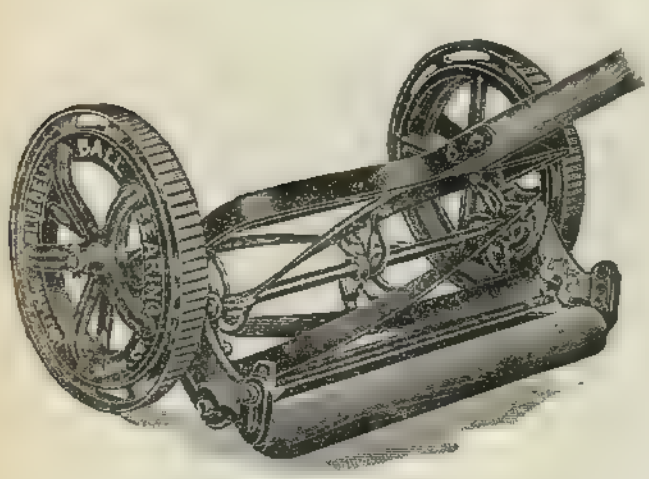
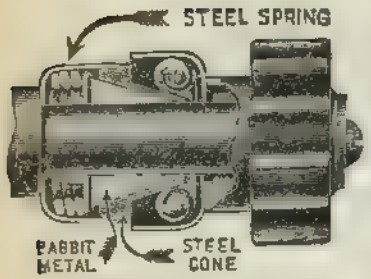
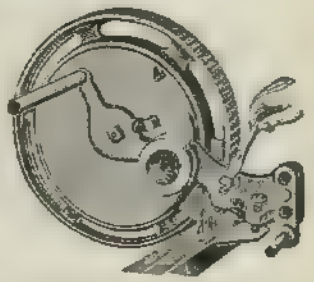
Atuomatic Ball Bearing Adjustment





Automatic Ball Bearing Adjustment

Automatic Ball Bearing Adjustment—This is the Most Important Invention of Recent Years in Lawn Mower Construction. It Consists of a Case Hardened Steel Spring Working Against a Collapsible Babbitt Sleeve Around the Shaft and Inside Case. At the Instant all Looseness is Taken up the Sleeve Collapses on the Shaft, thus Preventing any Further Pressure than is Required for the Most Delicate Adjustment, so that the Reel will Always Revolve Freely. Throughout the Life of the Mower this Adjustment Continues to Accomodate Itself to Conditions, Keeping the Bearings Always Nicely Adjusted without the Slightest Attention from the Operator. No Mechanism Depending on the Sense of Touch Can by any Possibility be so Nicely Adjusted. In Fact, Devices for Hand Adjusment Often Become the Ruin of Good Mowers by Those who Do Not Understand. While the Patented Device We Use Automatically Adjusts, it is Completely Enclosed so that an Ignorant Operator Can Not Get at it Even though He Tries to do so. No Screws to Lose Out. Always Ready for Service.



Bed Plate Adjustment

TRADE MARK REGISTERED *BLUEBELLE IN THE U. S. PAT. OFFICE

BALL BEARING

High Wheel; Four Blade Reel

Drive Wheels, Side Plates and Cutter Bar Castings of the Best Quality Cast Iron. Reel Braces are Malleable Iron Perfectly Fitted and Riveted to Steel Reel Shaft, Making Most Rigid Reel Possible to Build. Roller Bracket is of Malleable Iron Eliminating the Possibility of Breakage.

Cutter Bar Blade and Four Reel Blades are Tool Steel—Oil-Tempered, Self-Sharpening and Ground Under Running Water.

Ball Bearing Parts are of the Highest Quality, the Cones Having a Deep Case-Hardening.

Handle and Roller are of Straight Grained Hard Wood, Highly Varnished.

Wide, Deep Tooth Pinions Work with Tempered Steel Pawls Making a Ratchet that is Easy to Operate and Most Durable. Geared on Both Sides.

All Parts are Carefully Machined and Fitted. Wheels Revolve on Steel Bearings.

Drive Wheels 10½ inches; Diameter of Reel 6 inches; Adjustable to Cut Grass to Lengths of ⅛ to 1½ inches. Cuts Grass Standing 7 inches High.

Finished in Blue and Gold.

BALL BEARING

High Wheel; Four Blade Reel

A Splendid Ball Bearing Mower of Medium Weight and Size, Having "Four-squared" Frame Construction. All Parts Accurately Machined, a Second Cut Being Taken on Each Operation to Insure Mathematical Exactness, so that they will Assemble without the Least Particle of Strain. Only Materials of First Quality are Used. Best Possible Mixture of Gray Iron Used for the Wheels, Side Plate, Pinion and Cutter Bar Castings, Free from Flaws and Non-brittle. Bottom of Cutter Bar is Planed to a True Surface, so that the Stationary Knife can be Firmly Riveted to it and have a Perfect Bearing.

Malleable Iron Reel Braces are Securely Riveted to the Solid Steel Reel Shaft and Cutting Blades, Forming a Reel Impossible to be Twisted out of Alignment. Adjustable Malleable Iron Roller Brackets, Entering the Roller 1⅞ inches. A Cold Rolled Steel Shrub Rod ⅝ inch in Diameter with Turned Shoulders which Fit Snugly into the Side Plates.

The Ball Bearing Cones are of Best Grade Tool Steel, Tempered Glass Hard. Only Steel Balls of Class "A" are Used.

Four Cutting Knives of Good Tool Steel, Carefully Hardened, Water Ground, Shear Cut and Self Sharpening.

Drive Wheels 9 inches; Diameter of Reel 5¼ inches; Reel Axle 9-16 inches; Adjustable to Cut Grass to Lengths of ¼ to 1¼ inches. Cuts Grass Standing 5 to 6 inches High. Geared on Both Sides with a Double Sliding Case Hardened Steel Pawl Ratchet. Screw Adjusting. Handle and Roller of Carefully Selected Hardwood Stock, Lacquered to Protect from the Weather.

Finish—Silver Body, Gold Wheels, Trimmed in Light Green.

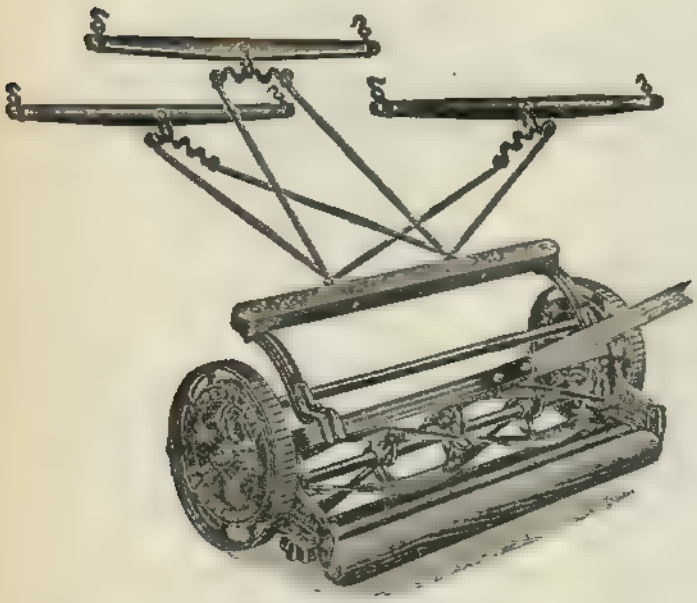
PONY LAWN MOWERS

CRESTLAWN

BALL BEARING

Five Blade



The Construction of this Machine is as Near Perfect as Can be Made; The Parts Making the Frame are all Lathe Turned and the Cast Bed Plate is Machined into the Side Plates, Forming an Automatic Interlocking Adjustment which Can not be Jarred or Twisted out of Alignment.

Pony Mowers are Often Used by Hand Power and the Crestlawn is Particularly Good for this Purpose, as it has Ball Bearing Drive Wheels; This Makes the Machine Easy-running and very little Harder to Operate than Many Hand Machines; Beautifully Finished.

The Reel is Made with Five Revolving Cutters and is Equipped with Timken Roller Bearings which are Automatically Adjusted thus Keeping the Revolving Cutters in Perfect Adjustment at all Times.

The Steel Bed Knife is Made with Raised Lip, which Adds Strength and Rigidity.

Drive Wheels 11 inches high; Diameter of Reel 7 inches; Reel Axle ¾ inch; Adjustable to Cut Grass to Lengths of ¼ to ½ inch; Cuts Grass Standing 7 inches High

Handle and Roller of Hardwood Maple, Thoroughly Seasoned and Finished.

Horse Attachment

Each Mower is Equipped with a Patented Horse Attachment; This Can be Adjusted Quickly and in Such a Manner that in Operation the Mower is Held to the Ground and the Disagreeable "Tipping up" of the Rear of the Mower is Impossible; The Draft of the Mower is Just the Same When Operated by Either Horse or Hand; With this Attachment the Horse Can Walk in the Middle, Front or to Either Side of the Mower and Yet Maintain a Central Draft at all Times.

Each

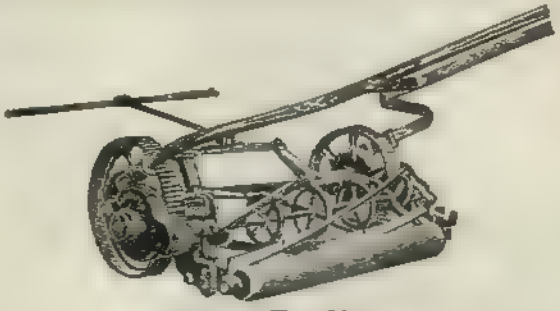
HORSE AND PONY LAWN MOWERS

PENNSYLVANIA

High Grade Cast Iron Frame Drive Wheels and Gear Casings; Malleable Iron Reel Braces; Tool Steel Oil Tempered Revolving Reel Blades, and Adjustable Bed Knife; Full Braced Steel Handles.



Pony or Two-Man

For use of Pony or Two Men on Large Lawns and where the Surface is Broken by Walks and Shrubbery or is too Hilly for Regular Horse Mower; Triple Geared on both Sides, 11 inch Drive Wheels; ¾ inch Steel Axle; 1 inch Tubular Front Bar; Upturned Bed Knife, with Front Draft Attachment for Pony or Horse Adjustable to Cut Grass to Lengths of ½ to 2 inches

Four Reel Blades — Each

No. 25—Width of Cut 25 inches Diameter of Reel 6¼ inches; Extreme Width 35 in. Weight Each, Boxed, about 150 lbs. $100 00 100 00

ELECTRIC POWER LAWN MOWERS

†LAWNVAC

This Mower Cuts and Deposits all of the Cut Grass and Loose Leaves into a Specially Designed Receptacle by a Vacuum Process.

The Motor is ¼ H. P., Wound for a Voltage up to 120 and for 50 or 60 Cycles.

Will Operate on Either Direct or Alternating Current; Equipped with Waste Packed Bearings and an Oil Reservoir.

Provided with a Detachable Plug for Disconnecting Motor From the Line, When Working on Reel.

Mower is Completely Housed Over to Create a Reduced Air Pressure at the Cutting Point; Aluminum Side Plates are Supported by Tie Rods and Bed Plate Holder; Cast Iron Wheels; Have Large Flange, 8 inches in Diameter.

Reel Has Two Cutting Blades, Divided in Half, Making Four Short Blades Equally Spaced for Balance; Revolving on Hyatt Roller Bearings, Running in Grease

Crucible Steel Blades Oil Tempered, are Large and Heavy, Insuring Long Life.

Reel is Adjustable, and Not the Bed Plate.

Bed Knife is of Highly Tempered Tool Steel and Has an Upturned Edge of ⅛ inch Giving Better Cutting Action.

The Belt is of Endless V-Type, Quickly and Easily Replaced

Hickory Handle has Trigger Switch Mounted Near Cross Handle, Within Easy Reach of Operator's Finger.

Regularly Equipped with 50 Feet of Double Rubber Covered, Non-Kink, Non-Stretch Wire Cable.

Catcher is of Special Design for This Mower and is Easily Removed and Replaced for Emptying Grass.

Height of Cut is From 0 to 3 inches and Adjustment is Made by Wheels.

Each

†No. LV16—Width of Cut 16 inches; Net Weight Each, 42 lbs .. $240 00

†No. LV21—Width of Cut 21 inches; Net Weight Each, 82 lbs 240 00

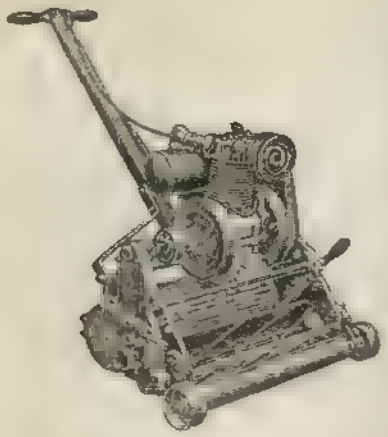
GASOLINE POWER LAWN MOWERS

JACOBSEN JUNIOR



Designed Especially for Moderately Large Lawns; Cutting Capacity of Fully Two Acres per Day.

Equipped with 1 H. P. Full Power Briggs and Stratton, 4 Cycle Standard Design Motor; Has Built-in Fly Wheel, Magneto; Is Air Cooled with Forced Draft by Means of Fan Blades.

Throttle Controlled Giving a Travelling Speed of From 2 to 3 Miles per Hour.

Diamond Roller Chain and Sprockets are Used in Transmission Which is Completely Enclosed and Fully Protected from Dirt and Flying Grass; the Transmission Case Cover is Easily Removed so Enclosed Parts are Accessible.

Clutches are Standard Cone Type Design with Metal to Metal Contact Surface

Cast Traction Wheels with Internal Drive Gears; Wheel Bearings are Graphite Bronze.

Cutting Unit is Made with Five Crucible Steel Blades, Accurately Ground; Reel is Mounted on Timken Roller Bearings Adjustable for Wear.

Rear Roller is of Hard Maple in Three Sections, Mounted on a Steel Shaft. Raising or Lowering This Roller Adjusts the Cutting Height from 1½ to 1" inches.

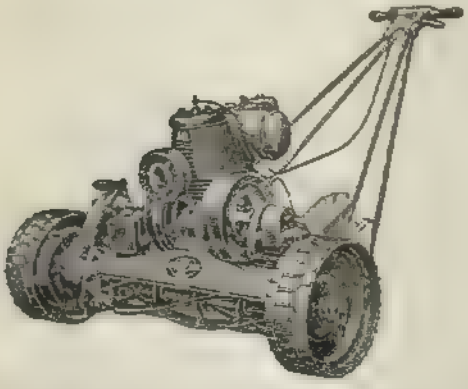
Cutting Reel as Well as the Traction Wheels are Power Driven with Separate Clutch Controls at the Steering Handle.

Each

+No. JJ18—Cutting Width, 19 inches; Net Weight Each, 150 lbs **$451 00**

One in a Crate

FOUR ACRE HEAVY DUTY



Special Built 1¼ H. P. Motor with 2½ in. Bore and 2½ in Stroke; 1000 R. P. M. at 3½ Miles per Hour of Mower Travel; Consumes About 1 Gallon of Gasoline a Day; Fan Blades in Fly Wheels Force a Continuous Draft of Cool Air Over the Motor Providing an Effective Cooling System Waterproof High Tension Magneto; Motor Fires on Every Stroke as Spark is Constant.

Carburetor is of the Float Type Keeping the Gasoline at a Constant Level; Hardened and Ground Gasoline Needle Valve Adjusts the Flow.

Cylinder and Piston are of Gray Iron, Accurately Ground.

Transmission Gears and Clutches are Enclosed in an Oil Tight Housing and Run in a Bath of Oil; Gears are Machine Cut.

Traction and Reel Clutches are Embodied in the Transmission Gears and Are of Standard Cone-Type; Design with Metal to Metal Contact Surfaces.

Traction Wheels and the Cutting Unit are Both Driven Direct from the Motor with Separate Clutches to Control the Power on Each Unit Independent of the Other; a Separate Control Lever at the Steering Handle Enables the Operator to Engage or Disengage the Reel Clutch so that it is Not Necessary to Revolve the Cutting Unit Except While Cutting.

Reel Has 4 Blades of Finest Steel.

Reel Bearings are Made of Phosphor Bronze, Are Extra Long to Give Long Life; They are Split so Wear Can be Taken up by Tightening of Set Screw

The Rear Roller is of Three Hollow Cast Iron Sections and the Weight of the Mower on This Iron Roller is Sufficient for All Ordinary Rolling Purposes.

Each

+No. HD4A—Width of Cut 24 inches; Net Weight Each, 200 lbs., **$627 00**

FARWELL, OZMUN, KIRK & CO.

SAINT PAUL

HENRY SEARS & SON

1865

Associated for more than half a century, with the highest grades of Cutlery, through Farwell, Ozmun, Kirk & Co.

The QUEEN Brand

creates a demand which makes a quick and satisfactory transaction between the dealer and the customer when applied to Razors, Shears, Scissors, Pocket or Butcher Knives, etc.

Strict adherence to the high quality that has assured satisfaction in Queen brand for so many years will be continued in the future.

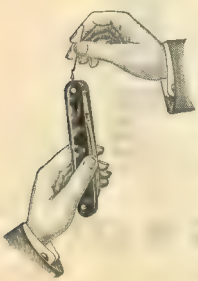
Our Guarantee

Henry Sears & Son 1865 Pocket Knives are warranted free from flaws in blades or springs. Blades breaking from any cause than flaws, or blades that have been re-ground by the consumer will not be subject to replacement. Pocket knives with more than one blade broken or pocket knives with broken pearl handles will not be replaced.

Pocket knives that have been re-ground by the consumer are often ground too thin or uneven and are liable to break, which is an evidence of good steel and temper.

Give the American Jack Knife fair play and it will prove your friend for many years.

How to Care for a Knife



Much trouble is caused and many knives prove unsatisfactory from the lack of proper care. The spring of the pocket knife holds, through its pressure, the closed or opened blade in the right position. In opening or closing the blade the tension on the spring is stronger and causes more or less friction. Any dust or dirt that collects where the blade and spring join will wear out both spring and blade if these parts are not cleaned and oiled from time to time. The spring will wear hollow and the blade will stick out of the handle and will not open and close properly. Therefore it is very important to clean and oil the joints on springs and blades occasionally.

To sharpen a knife use a fine India oil stone and hold blade at an angle of 25 degrees.

Pocket Knife Blades

The Henry Sears & Son 1865 line includes a varied assortment of patterns, the most staple and practical of these are shown in the illustration below:

HENRY SEARS & SON 1865 POCKET KNIFE CASE.

TRADE MARK REGISTERED

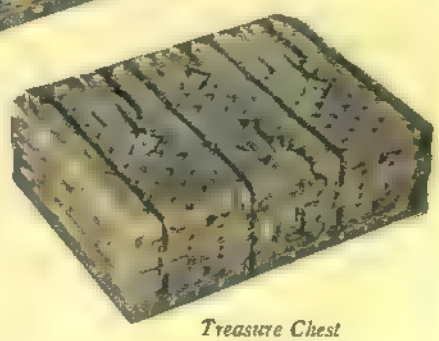
in the

TREASURE CHEST

A nation-wide investigation among housewives disclosed the fact that thousands of women are seeking silverware sets of "more than six" and "less than twelve." Hence, "Pieces of 8" is the logical happy-medium assortment.

Modeled after an old Spanish Chest that gave service in the brave days of galleons and conquests—gorgeous antique green and gold, heavily banded and studded, and lined with velvet the color of the sea.



Treasure Chest —closed view

The Treasure Chest contains 34 Pieces, all told:

8 Dinner Knives
8 Dinner Forks
8 Tea Spoons
8 Dessert Spoons
1 Butter Knife
1 Sugar Shell

Legacy	Argosy	Ancestral	Anniversary	Ambassador		List	Consumer

50 Pieces in the GIVAWAY CHEST

The 50-piece Givaway Chest is a good selling companion to the 26-piece Givaway Chest and will stimulate sales of 1847 Rogers Bros. Silverplate. Like the smaller chest, which increased the unit of half dozens to the complete 26-piece set, this 50-piece chest increases still further the sales unit, being composed of items in dozens. Chest of wood and fibre, finished in antiqued green lacquer enamel; lining and silverware racks of black and green.

ON THE TABLES OF AMERICA'S FIRST FAMILIES SINCE

BEHIND THE FOOTLIGHTS . . . AND BEHIND THE COUNTERS

In a current New York play there's a character named Mr. Pennel. And a lot of delightful comedy is effected by another character referring to him as Mr. Pencil, Mr. Panel, Mr. Pinwheel, and an assorted confusion of names. Behind the footlights it's funny, but behind the counters of jewelry stores there isn't an ounce of comedy in name confusion. 1847 ROGERS BROS., until recently, has been confused with many similar sounding names. To end it once and for all time . . . this name and trade mark identity campaign. All over the country dealers are reporting its success, telling us how customers ask for 1847 ROGERS BROS. by name. So the campaign shall continue its good work for us . . . and for you! Write for the new LEGACY booklet, JH, illustrating tea, dinner and flatware in this charming new-day pattern. Address International Silver Company, Department E, Meriden, Connecticut. Salesrooms: New York, Chicago, San Francisco . . . Canada: International Silver Co. of Canada, Ltd., Hamilton, Ont.

The PORTMANTEAU CHEST SETS

Effective Display Units in Show Case or Window

The Portmanteau Chests provide a series of wonderful display units for the show window or store display. Ingeniously devised and beautifully colored, they are novel and really help to sell the silverware.

The 121-piece Portmanteau Chest (illustrated) is covered with Capri blue leatherette, hand-tooled in gold, with tapestry panel in top, brass lock and handles; lined with Capri blue velvet.

PIECES OF 8

TRADE MARK REGISTERED

The "Pieces of 8" set is one of those sublimely obvious and immediately acceptable ideas—a set of silverware in eights—adequacy and practicability at a happy medium cost. It is undoubtedly the foremost contribution to silverware merchandising seen in a decade.

SILVERPLATE

MAY WE PRESENT . . .

SILHOUETTE

. . . the newest thing in SILVERWARE

SILHOUETTE TEA SPOON

SILHOUETTE follows the most feminine slant in the world for its theme . . . fashion.

SILHOUETTE brings in silverware the same basic Paris inspired lines women demand in frocks, hats, handbags, shoes . . . every article of fashion. For certain identical, right, true lines run through all things of beauty and good taste . . . and these are the lines of Fashion, and of SILHOUETTE.

VIANDE—the new knife.

The new dinner knife, the Viande, is of special interest. Short blade . . . long handle. Enabling one to press one's finger on the handle instead of the blade. It's the logical shape for a knife. However, to please your conservative prospects, the regular conventional dinner and dessert knives, are made in SILHOUETTE —thereby giving you the chance to give your customer the choice. We predict that Viande will be the regulation standard knife on tomorrow's tables . . . and it is ready for you today.

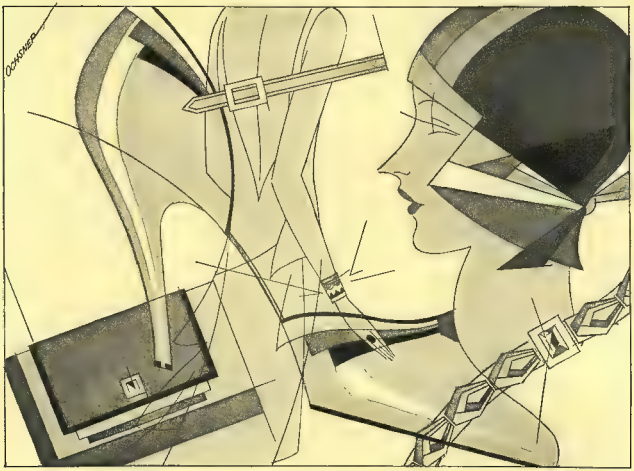
THE NEW VIANDE KNIFE

Presenting SILHOUETTE

THE NEW, MODERN 1847 ROGERS BROS. PATTERN



ANNOUNCED BY ADVERTISING CAMPAIGN WRITTEN IN FEMININE ESPERANTO

Some years ago a society was formed to formulate a universal language. They did . . . and called it "Esperanto."

But for endless years before that, since women have been women, the feminine world has possessed its own unofficial Esperanto . . . a universal language all women understand . . . the language of style!

So we tell the story of SILHOUETTE in woman's own language and dip our pens in the colors of style. Our brushes on the Paris palette. Talk style . . . and use the symbols of style, dear and clear to all women, to illustrate the story.

The pattern possesses the basic, clean-cut stream lines that women demand in all their clothes and accessories. It follows their ideas . . . so sales are bound to follow. It talks their language . . . in itself and in its advertising story. They'll understand . . . and buy!

We think it's the biggest news in silverware today and hope that you cash in on it by being ready with your stock.

We are going to give you further particulars regarding this new pattern a little later . . . Salesrooms: New York, Chicago, San Francisco.

VANITY BOXES
Are Sales Stimulators

The Vanity Box, with a mirror on the inside of the cover, not only offers wonderful display possibilities, but it affords unusual talking points to the dealer, for the chest, when the pad holding the silverware is removed, can be used as a vanity box wherein powder, rouge, lipstick and other toilet articles may be kept—or as an ornamental box for the living room table to hold cards, bridge pads, pencils and other small articles.

Where the Meaning Behind a Plaything is Sold. Alexander Grant's Sons, Syracuse, N. Y.

How The Small Toy Dealer Can STRESS *the* APPEAL *of* QUALITY

By FLORENCE W. RICH

QUITE a few small dealers, or those who stock toys and dolls as a "side-line," are apt to rather consider such items as a proposition without many possibilities. That is, they seem to feel that there is no outstanding feature about such a small stock of goods that will serve to bring it conspicuously to the attention of their customers. Consequently, they generally allow this department of their business to simply "drift along."

However, if they would only realize it they can make their "toy department," however small, a real and progressive feature of their business. And that is to be done by laying special stress upon the appeal of "quality." Your toy department may be a side-line of a gift shop, a stationery store, or some other kind of business, but whatever it is, what I have to say is equally applicable. I am not speaking, however, of the complete and well organized toy departments of the large department stores, for theirs is a different proposition entirely. I might mention that I have one of these side-line toy departments, in connection with my gift shop, therefore can speak from experience in what I have to say.

The "quality" appeal is actually about the strongest sort of appeal that can be made to customers above the level of the bargain-hunter class. It never matters how small a shop or a department is, if the proprietor has the faculty for making "quality" appear its outstanding feature, it will meet with success. Many in business overlook this fact entirely; instead, they bank upon an extensive display, or upon bargain prices, regardless of quality. We must remember that the public taste of late years has become more cultivated. Nowadays even factory girls want quality, whether it is a matter of complexion soap or silk stockings. Just so in their choice of other articles, they want something "nice," and earn money enough to have it. And of course those in the higher social stratas are satisfied with nothing but quality. Thus the idea has gradually seeped down through all classes of the buying public.

Changes in Toys

You may not at first thought realize that this idea of quality applies equally to playthings, but it does. Times have also changed in this respect. Formerly toys were

just toys, and without much attention being paid to them otherwise. Nowadays real creations in this line are turned out, well made, attractive, distinctive, and durable. And consequently the public has now come to look for such features when buying toys.

On that basis, then, the small dealer has everything in his favor, since the issue is quality rather than quantity. Thus it rests with him to so know his line, with special reference to this quality feature, and also the requirements of his particular class of trade, that he can make precisely the right selection of good, live, up-to-date quality items in this line.

However, one cannot select indiscriminately, a little of this and a little of that. Instead, one must select those things of most evident appeal to their own particular class of customers. In my own case, I have two principal factors to consider; first, that my customers are mostly wealthy and well-to-do people, and second, that most of the toys, dolls, etc., which they buy are bought for some special purpose, as a birthday or other gift. Thus this item of quality enters strongly into my particular case. But the word quality, to the mind of the customer, presents far more than the word itself might be said to imply. That is, when they think of quality they think also of something different and out of the ordinary, something well made, attractive, and perhaps with some unusual touch or feature. To such perfection have the manufacturers of toys, dolls, and games brought their products, at the present day, that it is not difficult for shopkeepers to find items that fulfill all the above mentioned requirements, and at a reasonable price, at that.

The factors that influence me in my own selection would seem to be the same that other dealers in quality toys would need to consider. First of all, I strive for as much variety as possible within the limits which I have to set simply because of lack of space. Not only is variety essential, so that the customer can have a reasonably wide choice for selection, but it oftentimes results to your advantage in the fact that usually not one but several toys are purchased at the same time. Another point to consider is durability. Nowadays, toys are expected to last and to stand hard usage, and quality toys measure up to that requirement. Also, while seeking for as much variety as possible, at the same time search for those articles which are a little bit different, something that is going to stand out noticeably before the eyes of the customer, for just that reason.

Toys That Instruct

In my own case, one thing that guides me very largely in my selection is the fact that I lay special stress upon "toys that instruct." That is, I have made that impression a sort of slogan for my toy department, and my customers have come to consider that about anything I offer possesses that feature. Getting this idea once fixed in your customers' minds is really a strong sales puller, for when they come to you they are really already half sold, on an idea, at least. However, you must discriminate in your selection of toys of this type, for the instructive feature must not seem to dominate, any more than the moral in a child's book must be too obvious. But there is such a very wide and varied selection of toys on the market, and all possessing more or less of this instructive feature, that you can get together a varied and interesting assortment without difficulty, from the new type of building blocks for the young children, to airplane construction sets for the older boys.

Individualized Types

Above all things, have a good assortment of games in stock, including picture puzzles, etc. I have noticed that so many think first of an interesting game as about the best and most welcome gift for a child. And a word about dolls. However few in number, be sure that they are all quality dolls of various individualized types, which does not necessarily mean that they must be high priced.

I also have some most attractively gotten up children's books, some beautiful framed pictures especially for the child's room, juvenile stationery, birthday greeting cards, etc., but as they do not come under the head of toys I will no more than mention them here. One thing in particular to keep in mind, if your space for toys is limited, do not attempt to carry too large articles, as toy autos or doll carriages, for instance. And another thing, since your space is limited, do not try to crowd as much of your stock out on display as possible. Allow each article displayed plenty of room to create an impression by itself, and then change the display frequently. You will thus, in time, have passed all your stock in review before your customers, and, at the same time, by frequent change of displays, have given the impression of carrying a larger and more varied line than you really do. All of which will react favorably upon your customers.

Sports Indicated by Mascot Dolls

Favorite sports of smart Parisiennes are indicated by the doll mascots swinging in the back of their automobiles.

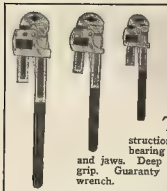
Tennis enthusiasts have a tiny figure in white flannels, complete with racket, the golfing figure is making a strenuous drive, while the football player is kicking lustily.

Toy Obeys Commands

An impulse is something to be obeyed, say those who have no patience with this world's Hamlets. Electrical engineers know that an impulse is something that cannot help but be obeyed.

A toy electric locomotive has been developed which obeys the following commands: Stop and go ahead. It obeys them because of an electrical impulse started inside of the locomotive through a radio detector tube and a special selector.

The other apparatus needed, operating this voice-controlled train, is a telephone through which the order must be spoken plainly and slowly, since the motion is affected by the number of syllables pronounced. Blowing in the 'phone mouthpiece causes the train to be checked at any point.



Genuine Oswego Stillson Wrenches

THESE wrenches are of extra strong construction particularly at the bearing points between frame and jaws. Deep milled jaws give strong grip. Guaranty Tag attached to each wrench.

ONE DOZEN IN A BOX

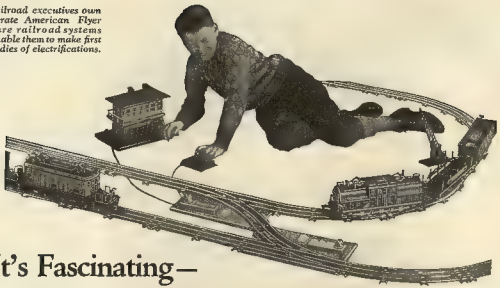
Many railroad executives own and operate American Flyer miniature railroad systems which enable them to make first hand studies of electrifications.



It's Fascinating—
This *Complete* American Flyer *Remote Control Operation* of Miniature Electrical Trains

With American Flyer new *remote control* equipment, the exact operating conditions of actual railroad electrification can be successfully reproduced.

To you—this means increased sales and profits, as this equipment always appeals to the ever increasing number of business men, engineers and boys, who make a hobby of complete remote control miniature railroading.

The new 1929 American Flyer catalog tells you all about the new remote control track switches which enable you to operate two trains at the same time (at a distance from the track). Then there is the new dial type transformers that operate similar to the tuning knobs of a radio, also the easy lever operated circuit breaker—the six circuit control Switch Tower House and many other new features. If you have not already received your copy, write for it at once.

48-Page Colored Catalog

This is the most outstanding catalog of miniature trains ever produced. The entire line of American Flyer Trains and Equipment is illustrated in full color—just like having the actual merchandise in front of you. The features of all models are brought out in detail. Study this book, it is chock full of sales features and for quick reference keep a copy on your counter. It also features the complete line of Structo Toys and American Flyer Airplanes.

AMERICAN KAMP KOOK STOVES

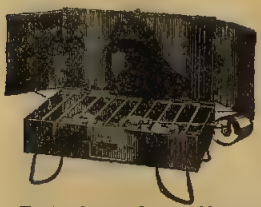
IT'S ALL INSIDE

Kampkooks fold like a small suit case when not in use with all parts including tank and legs packed inside, protected against loss or breakage.

American Kampkooks make their own gas from common gasoline or distillate and burn with a clear blue flame, free from smoke, soot or odor. When burning at full capacity they give more heat than a gas stove burner. Flame is instantly regulated to any desired temperature.

All American Kampkooks have master burner, which, when generated, requiring about one minute, produces gas for the other burners which may be turned on or off like a gas stove. Detachable tank with funnel shaped top requiring no funnel is a great convenience in filling. Cases are made of heavy steel and finished in black baked enamel.

American Kampkooks are nationally advertised and are used by more tourists and campers than all other camp stoves combined.



Has two burners, large cooking top 10×17½ in., durable steel grate hinged to case, folding windshield, adjustable to permit use of large utensils, ring type burner which spreads flame evenly. Finished in Kampkook olive drab with tank in natural metal color. Tank has built-in funnel and holds 3 pints, 4½ hours' fuel supply for both burners. Size folded, 3¾×10×17½ in., w't 11 lbs.

No. C1—Each *$6.30*

ONE IN A CARTON

Has greater capacity in less space than any other stove and is the most popular. Has unbreakable steel grate, master burner and detachable tank. Has adjustable wind shield and folding legs. Tank holds one quart—three hours' supply. All parts packed inside case when not in use. Size folded 3¾×8×14½ in., w't 8 lbs. Complete with pump, and directions.

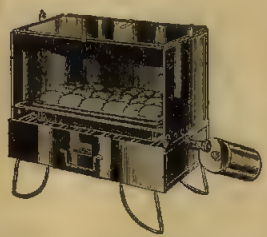
No. C3—Black steel case, each *$5.50*

ONE IN A CARTON

Has large cooking surface (10½×19½ in.), iron gates, the new folding legs. Cover hinged to case and fitted with wings makes the wind shield. Tank has built-in pump. End supports permit adjustment of wind shield to accommodate large pans and kettles. Folded measures 4½×10½×19½ in., w't each 14½ lbs.

No. C7—Each *$8.00*

ONE IN A CARTON

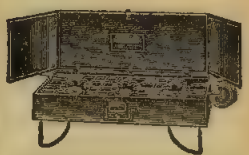


Built-in Oven

Does anything you can do with your kitchen range. Two burners, 10½×19½ in., cooking surface, improved iron grate. Tank, with built-in pump, holds two quarts, six hours' supply for both burners. Size of oven, 18×10×10 in. Oven folds flat inside lid. The entire stove folded measures 4¾×10½×19½ in., w't 21 lbs.

No. C8—Each *$10.00*

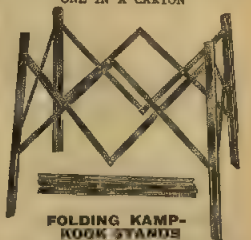
ONE IN A CARTON



Especially recommended for large parties. Has three burners, 10½×26 in. steel top with 7 in. iron grates, folding steel legs, adjustable folding wind shield and 2 quart detachable built-in pump tank which holds 4 hours' fuel supply. Master burner supplies gas for all burners. Height, not including wind shield, 10 in. All parts packed inside of case when not in use. Size folded 4¾×10½×26 in., w't 17 lbs.

No. C10—Each *$12.00*

ONE IN A CARTON



FOLDING KAMP-KOOK STANDS

Brings the cooking surface of the Kampkook to a convenient height of 27 in. Substantially built of steel, securely riveted with sliding joints. The stand is in one piece; no loose or separate parts. Holds the stove firmly and will support a weight of more than 200 lbs. Folds to 1½×23½×18¾ in. and packs inside Kampkook case.

No. C39—For No. C3 Kampkooks, w't each 3 lbs.....each *$1.50*

No. C40—For Nos. C7 and C8 Kampkooks, w't 3 lbs.....each *$1.80*

No. C41—For No. C10 Kampkooks, w't each 3½ lbs.....each *$2.00*

THE CAMPFIRE GRUB STAKE

Can be adjusted to any fire, regardless of height or direction of flame.

No. C80—Cast Iron, spear is 12 in. long, upper pipe 19 in. long (fitting over spear), grid and skillet ring 9 in. in diam., pot ring extends 7 in. from pipe. (All adjustable to any height). No set screws, each $3.35

ONE IN A FIBRE BOX 19x9½x1½ in. W'T 7½ LBS.

PICNIC AND CAMP BROILER

No. D73—A large broiler with long handle convenient for broiling over open camp fire, size 10x10 in., handle 24 in., 34 in. overall. The flavor of fish, steak, bacon, or ham is greatly improved by broiling over open fire. Fine mesh ⅞ in. square openings is small enough to broil sausage through fuel door in furnace, making it useful summer or winter, ¾ in. frame and handles, w't per doz. 35 lbs., per dozen $21.35

KAMPKOOK FRY PANS

The handiest pan where space is limited. Handle folds under pan. To open pull down the handle and snap it in place where patented locking device holds it securely. To fold, press both sides of handle. This releases it. Handle extended to any length by inserting stick in loop. The No. 36 pan is supplied as regular equipment with the Kampoven and Kampkook Kitchenette.

Special Size for Boy Scouts.

Our No. C30 fry pan is made especially for Boy Scouts. It is just the right size for individual use and requires but little room in the hiking or camping kit.

THE AUTO SIPHON

While the Auto Siphon was designed especially for the convenience of Kampkook users in filling the Kampkook from the automobile supply tank, many other purposes for which it may be used will suggest themselves.

In operation the hose is inserted in tank from which gasoline is to be drawn. The siphon pump is held in one hand below the level of the gasoline in the tank, the spout is grasped with the other hand, one finger being held over end of spout as shown to cut off air. When spout is pulled out gasoline begins to flow.

No. C37—Made of seamless brass, nickel plated and polished, size of barrel 3x3½ in., 30 in. of gasoline hose with each siphon, w't per doz. 5 lbs. .....per dozen *$12.00*

RADIO SETS

APEX A. C. ELECTRIC

Neutrodyne Circuit

Designed and Engineered to Completely Fulfill a Very Large Demand in the Moderate Price Class—at the Same Time to Satisfy from the Standpoint of Performance. Employs One Rectifying and Six Radio Tubes—Three Stages of Tuned Radio Frequency (Neutrodyne Circuit) Detector and Two Audio Stages, Including 171A Power Tube. The Apex Neutrodyne is Stable at All Frequencies Without the Use of an Oscillation Control.

Tone—Pure, Clear and Natural, Just as Originally Sent Out by the Broadcasting Station.

Selectivity—Is Gained by the Design of the Tuned Circuits of Which Three are Used, (Less Than Three Will Not Give the Required Selectivity) and Accurate Matching of the Tuned Circuits. Stations are Easily Separated in Most Thickly Populated Metropolitan Districts where Broadcasting Stations are Numerous and High Power is the Rule, Rather than the Exception. While Selectivity will be Found Sufficient to Properly Separate Stations it is Not so Severe as to Impair Tone Quality or Cause Extremely Critical Tuning.

Volume—Excellent Volume Under All Conditions, More than Required for All Local and Reasonably Long Distance Reception; Always Under Perfect Control of the Operator.

Illustration Showing Apex Set with Apex Speaker Mounted on Top.

Power-Supply—The Power to the Receiver is Supplied by Means of a Transformer and a 280 Rectifier Tube. Regulation—From 90 to 130 Volts Line may be Used Without Danger to Tubes or Loss of Efficiency; This Results in a Prolonged Life of the Tubes; The 280 Type of Rectifier Tube Reduces High Voltage Surges and Greatly Eliminates the Possibility of Puncture of the Filter Condensers; The Various Voltages are Obtained by Use of Series Resistances, Which Reduces the Load, Lengthens the Life of the Rectifier Tube and Gives Greater Operating Economy.

Chassis Construction—Heavy Gauge Metal, Rigid, Neat, and All Component Units Readily Accessible; All Metal Parts are Heavily Cadmium Plated.

Shielding—Thoroughly Shielded by Means of Copper and Cadmium Plated Steel Shields.

Tuning—Just One Knob—the Condensers of the Three Tuned Circuits Which are of the "Bathtub Method" of Production, all Rotate Together on the Same Shaft, Which Permits the Use of the One Tuning Knob.

Controls—One Tuning Knob, one Volume Control Knob and the "Off and on" Switch are the Only Three Controls on the Front of the Mode 136 Receiver.

Transformers—Designed to Give Best Quality with Good Bass Note Reproduction.

Dial—Illuminated Drum Type Mounted Directly on Condenser Shaft and Driven by Means of a Vernier Friction Drive—No Troublesome Gears or Belts.

Cabinet—Heavy Metal Unusually Well Finished, Making it Extremely Adaptable Among the Best of Home Furnishings; Cabinet forms two Duties, that of Shielding and Also as a Protection to Chassis in Shipping.

Second-prize winner in the 1929 Children's Window Display Contest awarded $100 in gold. By C. D. Wagner, display manager, and W. H. Peterson, assistant, of the F. N. Arbaugh Co., Lansing, Mich. There's a real holiday atmosphere in this beautiful toy window. The "action" of the dolls and toys is heightened by specially prepared colored wood figures, "Children's Day" is prominently announced and the "shoe" is a fine piece of craftsmanship. Has "grass" floor.

Third-prize winner in the 1929 Children's Day Window Display Contest awarded $60 in gold. By Harold Nickel, display manager of The White House, San Francisco, Cal. "A toy window within a toy window" provided a thrilling theme for Pacific Coast children. The use of six child figures is worthy of wide emulation, for they instantly bring home the need of toys for all little people. Just enough toys are shown. Note the zebra, giraffe and racing greyhound.

Let Your Jobber's Salesman Help You

(*Continued from page 38*)

He has studied the class of goods that these houses offer, and in most cases is able to offer competitive merchandise to his dealer friend.

He finds in the perusal of these catalogs that the local dealer by buying the same class of goods can equal and even better mail order values.

He does run across occasional exceptional values, such as items at his own catalog net prices, and certain other items at close to dealers' cost, and informs Mr. Retailer of this. He also informs his own buyer, and sometimes is able to prevent its recurrence—only sometimes, however.

He shows Mr. Retailer how these "loss leaders" of the catalog are made to sell other goods, and advises him to "go thou and do likewise."

He recommends that the dealer include all the prominent mail order catalogs in his store library and use them as buying guides

He preaches the value of turnover as related to profit, and accents the fact that an overbuy—say a six months' supply of one article, takes just as much space and money as a one month's supply of six articles, yet the latter will show him six times as much in sales. He shows the dealer that to get full return from all his investment he must make it turn.

He points out the possibility of a new delivery truck by taking advantage of cash and prepayment discounts. He also emphasizes the desirability of a good credit standing.

He talks the advantages of concentrating purchases with a very few sources of supply, and the saved time, additional service, closer cooperation and price concessions that may be had from such concentration.

He shows Mr. Dealer that some of his lost volume is gone with obsolete goods, and recommends close-out sales, replacing them with newer lines which will sell.

He advocates simplified stocks and is conversant with what has been done by the U. S. Department of Commerce in its simplification program.

He tells Henry Brown that unless he has adopted simplification and is striving to eliminate all items that do not turn and consequently do not bear a profit—he is nullifying all that has been done for him by the Department of Commerce.

He shows his dealer that it is possible for another dealer with a small part of the first dealers investment to make much more money if he gets a greater turnover.

He proves that too much time is spent arguing price with salesmen when real dollars are to be made planning sales campaigns with the salesman's help.

He watches his collections sheets closely knowing that a paid-up customer can always be sold, and advises a dealer to watch his collections closely, with a view of more sales.

He knows the advisability of good banking connections and the desirability of keeping the banker posted on what the dealer is doing, and advises absolute frankness with the banker. If money is needed to discount bills, add

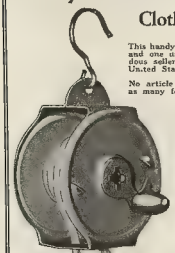
FREEPORT, ILLINOIS
ARCADE CAST IRON TOYS

THE
Polly Prim Portable
Clothes Line Reel



This handy clothes reel of a thousand and one uses has proved a tremendous seller for dealers all over the United States

No article on the market combines as many features as the Polly Prim Portable. Used in the room of the girl at school—especially adaptable for the tourist whether camping or in the hotel room—excellent for the house with children, as well as countless other uses

Another excellent feature in the hook, which makes it possible to hang the Polly Prim Portable anywhere—on the doorknob—the limb of a tree—the towel bar, or a thousand other places.

Each Polly Prim Portable is packed in an attractive individual display carton. It has eighteen feet of quality tubular braid and comes in the prevailing popular colors—Red, Green, Blue, and Yellow.

Here is the Lantern
that is
Out-Selling
all others
in
EUROPE!

No. 201/7". Burning time, 44 hours. Height, 15½ in. Weight, with chimney, 2.94 lbs.; without chimney, 2.37 lbs. Tinned.

THE famous Feuerhand (Firehand) Lantern—known all over Europe as the best hurricane lantern ever made—is destined to be the fastest-selling lantern in America. Customers quickly recognize the superior Feuerhand features. Feuerhand Lanterns have a thicker tin coating than any other make—are absolutely *rust-proof*. Storm-proof and *shock-proof*. One-piece oil container—guaranteed not to leak. Let Feuerhand—the finest and fastest-selling lantern on the market—increase your lantern profits. Write today for information about complete line of styles and sizes. A. H. Lehmann & Co., Inc., 132 Front Street, New York

No. 260/10". Burning time, 20 hours. Height, 13 4 in. Weight, with chimney 2.64 lbs.; without chimney, 1 lbs. Tinned, gold- and copper-bronze finish. Extra large filling cap.

FEUERHAND

Manufactured by Hermann Nier, Bezerfeld, Germany

lines or enlarge a store he advocates acquainting his banker with that fact and getting his banker's expert advice He reminds his dealer that although we are the wealthiest nation in the world—that we borrow money within our ability to pay, is evidenced by the fact that we owe $18,000,000,000.

He is friendly and sincere with the store organizations on whom he calls, and helps his dealer get concerted action and maximum effort from his store force.

He offers little sales talks periodically to the retail salesmen, and plans sales campaigns with his own merchandise.

He brings his dealer, from week to week, his readings of trade papers—the wheat separated from the chaff—and advises Henry Brown to find an hour or more each week for his trade paper, too. He shows Henry how foolish the "haven't got time" excuse.

He reads his trade paper advertisements carefully so that he may know more about newcomers in the merchandise field, and to augment his knowledge of older items in the hope of becoming a cyclopedia of information on things hardware.

He can recommend bookkeeping helps if the dealers' records are inadequate.

He knows exactly what his house is doing at all times to put his retailer in a position to cope with competitive offerings and influences his firm's buyers to buy the kinds and brands of goods his dealer needs.

He brings pressure to bear on his advertising department to get Henry Brown the kind of dealer's helps which Henry will use, and has a clear, concise idea of what those helps are.

These are but a few of the many helps a jobber's salesman can render his dealer. These are the kind of helps his dealer stands most in need of. In this battle of the century—"Kid Chain vs. Battling Independent"—Henry Brown has two important seconds in his corner—the forward-looking salesman and the progressive jobber he represents.

Look to *your* jobbed and *your* jobber's salesman for this kind of help. In the great majority of cases you will receive it freely. If not, change your source of supply.

CALENDAR REFORM

To gage business sentiment concerning calendar reform the Chamber of Commerce of the United States will submit by referendum to more than 1600 organizations constituting its membership the question whether it is desirable from a business viewpoint.

This will be only a first step in determining whether the Chamber shall enter the lists as an advocate of the proposal, concerning which there is a divergence of opinion on the part of American business men.

A special committee of the Chamber appointed to consider the subject of calendar reform submitted a majority report, recommending that the divisions of the year in the present calendar should be so changed that there will be greater uniformity in length and that the weeks should be fixed in relation to the divisions of the year in which they occur that there may be increased comparability between business results in the corresponding division of other years

It's time to... "b·a·t" BUY ARCADE TOYS

for bigger sales

Arcade toys, because they are so realistic, help children to live and understand the life of those about them. Parents realize this and are more inclined to buy these toys for that reason.

Children owning Arcade toys buy more. Boys fill out their fleet of trucks and want implements for their toy farms; girls require pieces to complete their kitchen and dining room, or sets to fill out their doll house.

Dealers handling the Arcade line have the makings of very attractive and interest-compelling window displays, such as the farm scene, boulevard scene, Show Boat display, and the pyramided display counter.

Below are just a few of the popular items of the season.

		Retail Prices

LET THESE 2 FAST SELLING GAMES

Play Duets on YOUR Cash Register—Too!

Never in the long Bradley history of devising clever games have two items gone over bigger than **Whoopee** and **Babe Ruth's Baseball Game.** All summer long—from all over the country—orders have been coming in at a record pace. Dealers everywhere are cashing in on these new games.

WHOOPEE!

The new Bradley game that's going big everywhere!

WHOOPEE is proving a big seller. And no wonder! It's a snappy game that appeals to young and old.

It has the lure of "7 come 11" fascination of cards. Everybody likes it . . . children and grown-ups.

WHOOPEE is a winner. . . . Better get in on the sales it's making wherever displayed. . . .

BABE RUTH'S BASEBALL GAME

Everybody likes to play it. More fun than watching a ball game . . . because with the Bradley game you're "on the diamond" yourself . . . knocking out homers, stealing third . . . making double plays. Thrills galore!

The approach of the world's series will create more interest than ever in baseball.

And the famous King of Swat's name on this fast-selling Bradley game means the home run king is working with you. His popularity helps you make more sales.

NEWS about TOYS and TOYMEN

"Fastest Man on Earth" Joins Ives

New Kenton Toys

Segrave Now Ives Engineer

Major H. O. D. Segrave, who is now on his way back to England, forgot all about racing cars and boats for several hours before he sailed, and devoted himself exclusively to his consuming hobby of miniature railroad trains.

Major Segrave's prize collection of scale model trains, practically all hand-made by himself, is probably the most elaborate in the world. It includes tiny duplicates of most of the famous European trains and a complete working model of an imaginary under-the-channel tunnel from England to Germany, the miniature tunnel alone being 18 feet in length.

Major Segrave visited the Ives permanent display on the ground floor of the Fifth Avenue Building, Fifth Avenue and Twenty-third Street, and after working for a while with the switches and controls of the miniature electric trains on display, got so much speed out of a swift little model train that it nearly ran right through the miniature Grand Central Station at the end of the line.

Multiplying the speed it actually attained in the ratio of the model a small replica of the Twentieth Century Limited —he figured that the speed the little train made would have been the equivalent of about 150 miles an hour had it been magnified to the size of its big original model. Which, of course, still leaves the rail record nearly 100 miles behind Major Segrave's automobile record.

"I've been very much interested in hearing about the extent to which groups of American boys are competing with each other in the operation of elaborate miniature railroad systems," said Major Segrave. "To prevent wrecks, sidetrack the freight trains in time for the express to fly by, and think quickly enough whenever a freight car becomes derailed—all from a switch-button board at the end of the table—is surely going to prove marvelous practice in coordination and quick, decisive thinking for the new generation."

Major Segrave has become consulting engineer for the Ives Corporation, and has designed the "Segrave Special" for them.

Sweyd Now Sales Consultant

Mike Sweyd, who is known to every toy man from the Atlantic to the Pacific and who for a number of years has represented the Moline Pressed Steel Company on the Pacific Coast, has expanded his connection with that company and is now acting as sales consultant. When Mike takes hold of something, things happen. Coupling his wide experience and merchandising sagacity with the well-known quality of the Buddy "L" line will undoubtedly bring quick results.

The Moline Pressed Steel Company has appointed sales representatives at strategic points throughout the country, in addition to distribution through well-known jobbing houses at the principal centers of trade. The New England representative will be Welcome G. Young & Sons of Boston. In New York, Norman C. Hilborn, Eastern sales manager, will have charge of their salesroom in the Fifth Avenue Building. L. S. Witman will cover the Southern territory from Atlanta, Ga., and Charles C. Unger will take care of the Middle West, with headquarters in Chicago.

Paris Wants Toys

Rene La Pierre, 68, rue de Hales, Paris, France, is in the market for all kinds of educational toys, especially those designed to develop the intelligence and initiative qualities of children. They request that catalogs and prices be forwarded to them.

Miniature Trucks

How closely toys may resemble their full-size counterparts is clearly shown by the miniature chassis and three trailers shown in the photographs—an assortment which forms an interesting addition to the popular Kenton line being offered by the Kenton Hardware Company, Kenton, O. These meet the demand of the boy for interchangeable toys. Each trailer may be used separately with the chassis, or they may all be joined together to form a colorful transportation unit. A boxed assortment of the three trailers with chassis is offered, or the chassis and any one of the three trailers is supplied in one packing. Each piece is sturdy and strong, being constructed of cast iron, and will last indefinitely. The chassis is finished in red, which combines agreeably with the gay colors of the trailers. Blue is used on the realistic ice trailer, while the green truck trailer makes a fine appearing baggage transporter. The bright orange of the oil trailer adds zest to an assortment which meets the juvenile desire for toys that are "real in everything but size." The Kenton Hardware Company is also adding several other new toys to its well-known Kenton line. These consist of several tractors, five sizes of air mail planes, and an attractively designed train. Opportunity was afforded for inspection at the Chicago Toy Fair, where the complete Kenton line was exhibited. The above items and many other new numbers are described in a beautiful new folder just off the press which will be mailed at once to anyone desiring further information concerning these well-known toys.

New Metalcraft Plant

New Daylight Factory

The Metalcraft Corporation of St. Louis is now settled in its well laid out and modernly equipped new daylight factory. The move into this new plant occurred early this year and marks the third expansion within 4 years, a record seldom equalled.

The building has a frontage of 185 feet on Penrose Avenue, with a depth of 253 feet running along the newly created Penrose Park. This will insure perfect light and ventilation for all time and with 33,825 square feet of owned ground uncovered, there is room for expansion for some years to come. The building was designed and the interior laid out by Schooley and Chambliss, prominent Architects and Builders of St. Louis. The dominant idea was to create a factory along the most approved methods for the scientific production of Metalcraft Toys, with the minimum of hand movement from the rough parts to the finished article. There are 6000 square feet of glass to make it a strictly daylight factory. It is of fireproof construction, the walls being made of concrete with steel sash and it is covered by a steel deck roof, Nu-wood insulated, with saw-tooth monitors. The floor is re-inforced concrete. Factory and offices are kept comfortable and well ventilated during the winter with fan-feed circulated warm air heat from the latest type of industrial Oil Burner system.

The floor plan is most unique in factory design and lay out. All goods in process of manufacture rotate in semi circular fashion toward different divisions of the packing and shipping sections, thus preventing congestion The most distinctive feature, however, is the modern Cadmium plating plant. This process gives a very fine and most enduring finish. The automatic Paint Conveying Ovens insure uniformity and speed, as it takes but 40 minutes for the painting and drying process. The ovens have facilities for painting 20,000 parts a day In the new location the Metalcraft Corporation has ideal shipping facilities, being located on the St. Louis Terminal Tracks with room for 10 cars at one time. The employes enjoy the best possible working conditions, being supplied with steel lockers, modern and spacious washrooms and all other conveniences and comforts. The company reports that the increased and improved facilities will lead to greater perfection in their toys, and cite their line of wheel goods in colors as an already visible example of this. They also say that their Airfield Toys show the benefits of the improved equipment and are gaining in popularity daily.

A Popular Flapper

Above is a popular Flapper Doll made by the Anita Nov. Co., subsidiary of the European Doll Co

Knickerbocker's Latest Offerings

Anyone who is interested in dogs, and most people are, will find an unusual exhibit of blue ribbon canines at the Fifth Avenue showrooms of the Knickerbocker Toy Co. Several of these display cases are given over to their new offerings of Chows, Pomeranians, Sealyhams and Wire haired terriers in sitting and standing positions, with some mounted on wheels A particularly outstanding feature of the Chow dogs is the fact that three distinctive lengths of plush—short, medium and extremely long are used in their fabrication, resulting in a truly life-like appearance. Then there are the new white Esquimoux dogs and Scotch terriers. "Scottie" looks for all the world like the real thing and boasts a silky grey mohair coat. Messrs. Cowen and Weiss are more than justified in the statement that these new numbers bid fair to occupy an outstanding position in the Knickerbocker family

Toy Movies for Kiddies

The Exclusive Film Service, operated by Max Levey, Chicago, has been supplying toy films to the kiddies for the past ten years, and to the toy shops and department stores for the last five years. The rapid growth of the business of the Exclusive Film Service is traceable to the complete interest these manufacturers have in serving their customers. They have followed out the same progressive ideas in getting films for the toy projecting machines as they formerly did in serving the large theaters. Their new non-inflammable films are said to be the only ones which are complete in as small a length as 10 feet, and each having a title and an "end." And they are also said to be the only concern constantly adding new features to their lines with any special events being obtainable on their new safety film in less than a week after the occurrence

STAINLESS STEEL

(*Continued from page* 83)

appearance to the car throughout its life. Mud guards and side aprons are being considered by some manufacturers. In this case the material would not be polished, but enameled as usual with the assurance that no rust would form under the enamel to scale it off.

Stainless steel pressure tanks, digestors, and similar equipment now being extensively used by the DuPont Company, and the Atmospheric Nitrogen Company in the manufacturer of nitric acid are good examples of the application of stainless to industrial equipment.

Another illustration is dairy equipment. Tanks, coolers, bottling machines, weigh cans, etc., are to some extent being made of stainless steel and iron.

OTHER industrial fields which are bound to show increasing occupancy by "stainless" are the laundry machinery, processing, and canning industries.

The draftsman finds his compasses, rules, pens, etc., vastly improved as to durability and ease of cleaning, the surgeon or doctor is proud of his stainless steel instrument sets, which can be sterilized without danger of rusting, and the dentist is rapidly realizing that his patients demand that he shall use stainless instruments.

Stainless steels are now being produced by thirty licensed steel mills and foundries in this country. It is produced in most of the commercial forms in which ordinary steel is obtainable, such as hot rolled bars, plates, shapes, sheets, cold drawn bars, hot and cold rolled strip, tubes, etc. Consumption is increasing rapidly from year to year.

The price is necessarily high as compared with ordinary steel because of high cost of chromium and the greater care necessary in its manufacture; but even so its use is economical in all of the applications discussed, and will be found economical in many others as its advantages become better known.

Remington's Fall Hunting Window Display

A very colorful and animated series of game and hunting scenes featuring its products has been prepared by Remington Arms Co., 25 Broadway, New York, N. Y., as window display material for use during the fall season of 1929

This display material is reproduced herewith. As can be seen, it is adapted to various size windows and designed to stimulate sales of arms and ammunition for the dealer during the fall months of this year.

The Gem Sells Itself

With This Display on Your Counter

THE customer who comes in to purchase other things pauses to buy a Gem or Gem, Jr. The Gem display means extra sales.

All customers like these handy nail-clippers because they trim nails and hang-nails perfectly, and work easily with either hand.

The only nationally advertised nail clippers. Copy appears regularly in The Saturday Evening Post, Collier's, and Judge.

Transparent Du Pont "Cellophane" protects them from rust, dust and tarnish.

The convenient prices—35 and 50 cents—appeal to every customer. Get a Gem display from your jobber today, and catch those extra sales.

EDLUND CO.

BURLINGTON, VERMONT

TOYS are BIG SELLERS in this HARDWARE STORE

"Motion Is an Eye-Grabber," Is the Theory of the David Mahony Co., of Schenectady. This Window Display Shows How They Put This Theory into Practice.

THERE are few hardware stores in the Empire State doing a bigger Christmas business in mechanical train sets than the David Mahoney Company, 209 State Street, Schenectady, New York. The reason is obvious. They go after this business. Right after Thanksgiving the management installs a toy railroad in the housewares department on the second floor. This display is about fifteen feet long and ten feet wide, with signal towers, bridges, semaphores, tunnels, stations and all the other mechanical "fixin's" dear to the heart of every youngster. This miniature railroad is well advertised in newspapers, show windows and via direct mail, and mothers from all over the territory bring their children to see the exhibition.

"Every hardware dealer should stock toys of some kind around the holidays," said this merchant, "because they bring women into the hardware store. If the mothers do not want to come, the kiddies will tease them until they do. Our toy railroad lay-out has made many sales of housewares and hardware for us around the holidays. Mothers would come in to buy train sets for the kiddies, and before they left we would sell them some enameled ware or gifts in addition to the toys. Accessories are another profit-puller for this store. The sales clerks are instructed to suggest accessories, such as flag staffs, crossing gates and telegraph posts, not only to the parents but to the kiddies. Often the youngsters will coax a parent to buy just one more accessory and succeed where the salesman would fail. Add just one accessory to every sale of a train set and toy profits will mount rapidly. The old fashioned store salesman used to be an order-taker, but the modern inside man has to be a business-builder. Giving folks just the toys they ask for requires little ability. The worth-while clerk will increase the unit sale with sales suggestion. Accessories offer an excellent opportunity to increase the unit sale insofar as mechanical trains are concerned. They also mean repeat business because they bring people back for these additions after the holidays. We sell many train set accessories in this store because we impress upon customers and their kiddies the desirability of building up to a complete outfit."

"However, the clerks do not apply sales pressure in making toy sales around the holidays. A holiday spirit prevails. Visitors come to watch the toy railroad trains dash through tunnels and stop at signals, and we treat them more as guests than as prospects. We believe that high pressure salesmanship is not a profitable method of selling toys, particularly around Christmas time. People may browse around at will. As long as they want to look at the trains and other toys, they are welcome to do so. If they show an indication of wanting to buy, then a clerk is ready to serve."

This photo shows one of the David Mahoney Company toy windows at Christmas time. A placard in the center of this window reads, "Display on Second Floor." The management purposely put toys on the second floor to bring the crowds up there during the holidays. The second floor is often a "weak sister" for the hardware merchant around Christmas time, because there are so many attractions on the street level that it is difficult to get people upstairs. "Put toys on your second floor if you have one," say these merchants. "They will bring people upstairs."

The trains in this window are always kept moving. "Motion is an eye-grabber," says Mr. Mahoney, "and the hardware dealer should utilize it in his show windows whenever possible. When displaying mechanical toys around the holidays, keep them moving. The kiddies like to see them work and the kiddies are behind many a toy sale."

ties and industrial organizations should be approached for support—in fact, there are few people who are not and can not be interested in the welfare of the children of the community.

Display is always a good sales stimulator. In Atlanta, Ga., the King Hardware Co. has found excellent success with its play equipment. A slide, set up outside the store for the use of children, sold twenty-five slides in one season!

The organizing of a playground for community use and the selecting of its equipment, is not a difficult task. Neither is it a hard job to convince clear thinking parents that play equipment at home will be of inestimable value to their children. There is timeliness, appeal, interest and great possibilities in the age-old see-saw. The slide satisfies the early desire for "speed" in the heart of the child. The hardware dealer is offered an opportunity to help the younger boys and girls of his community—to improve their welfare and to aid in their early development. Will he take advantage of the offer? He has never before failed his community and will not now.

Winchester Display Available

The new Winchester display shown herewith features the figure of the Winchester Pioneer. It forms a tie-up with the advertising campaign which the company plans to inaugurate this month. The figure of the pioneer will be used in all advertisements of the new and old Winchester lines that were placed on an open market basis about two months ago.

In the new display the pioneer is shown holding an eight-page book, on each page of which a single line is featured. When the display has served its purpose in a gun and ammunition window, the dealer can simply turn the page and have a flashlight and battery display, a fishing tackle display, a roller skate display, and a cutlery and tool display. In this way there is an all-year-round permanent fixture for the dealer's window that can be adapted to any season. In addition, also, the Winchester company has had the pages of the book lithographed separately for the benefit of the dealer who handles only one or two of the lines, or for the dealer who wishes to display all lines simultaneously.

The complete display, lithographed in full colors, stands 40 in. high and 30 in. wide. It is supported by a sturdy easel back. The book held by the pioneer measures 15½ in. by 21½ in., and slopes outward and forward so that the opened pages lie smoothly back. Each of the new displays contained in the book is also lithographed in full colors. Dealers can secure the entire new display, the separate pages, or the entire display and separate pages by requesting it from Winchester Repeating Arms Co., New Haven, Conn.

THE "ATLAS"
CALENDAR WATCH

PRICE
$10.00

Shows the Date, Month, Day of the Week and Phases of the Moon

Keeps Time With Unerring Accuracy
Requires No Attention when once Set

Three Years' Guarantee

Only $10.00, Post Free

This remarkable Watch is a standing marvel to all who can appreciate the amount of detail involved in the production of such a complicated piece of Watchwork. As a timekeeper the "Atlas" will be found to be exact and reliable, and to all business men the advantage of an automatic calendar will appeal with great force. It is the watch to suit Travelers, Ranch Managers, Cowboys, Farm Hands, or anyone in an isolated district, whose daily routine has but little variety, and is frequently at a loss for day of week and date. As an ordinary timekeeper it is a watch of highest quality, and the calendar mechanism having been improved, simplified and fixed just beneath the dial, it is not likely to get out of order with ordinary use. The watch is self-acting, with the exception of the name of the month, at the top of the dial, which requires alteration only once a month. The rest is automatic, being worked by the mechanism of the Watch. The phases of the Moon are shown in the lower circle. A glance at the dial informs you not only of the exact phase, but enables you to quickly calculate when the new or full moon is due. The changes are made every 24 hours at midnight. The watch in illustration is telling at once that it is Wednesday, May 4, full moon, time, nearly twenty minutes to eleven. The movement is of the finest finish throughout, and is jeweled in 8 holes. Made in either gunmetal or nickel. **PRICE, ONLY $10.00 Post Free.** Written guarantee for 3 years given with each Watch.

No. 8007—"Atlas" Calendar Watch. Price, postpaid..... $10.00

SOCIETY MOTHER (languidly): "Well, nurse, how is baby to-day?"
NURSE: "He cut two teeth this morning." MOTHER (still more languidly). "That was careless of you, nurse! You ought not to let a young baby play with a knife."

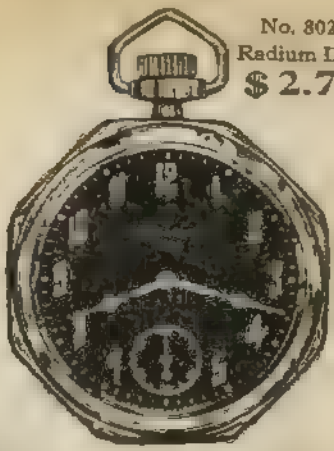
Plain Dial
$1.75

No. 8025
Radium Dial
$2.75



The New True Time Tellers

TIP TOP OCTAGON WATCHES

Octagon Watches have hitherto sold at a price far above what we are asking for the New True Time Tellers. True Time Tellers are not cheap imported Watches but are of American manufacture, made right here in the United States by the oldest firm of watch and clock makers in the country. They are full 16 Size, thin model, very neat and compact, with Octagon shaped nickel-plated Case. They are Stem Wind and Pull Out Stem Set. The Main Spring is removable, so that in case of breakage repairs can be effected at a nominal cost. The Dial is most attractive, having Numerals of Cubist Design, with Fancy Pierced Hands. True Time Tellers can be had with plain or luminous dial. The latter sells for $1.00 more than the Watch with the plain dial, and is treated with Radium so that the time can be plainly read on the darkest night. Each Watch is fully guaranteed by the makers, and a printed guarantee comes with each watch. You can safely order True Time Tellers for we do not think there is a better value in Watches to be had on the market today.

No. 8024. Tip Top Octagon Watch, with plain white Dial. Price postpaid $1.75

No. 8025. Tip Top Octagon Watch, with radium luminous Dial Price postpaid $2.75

TIP TOP OCTAGON WRIST WATCH

This is the same Watch as the one described above made small size wrist watch size Octagon shape. It is the smallest and thinnest watch ever produced of its type. It has a compact dust-proof Octagon case, with a Tom Brown strap allowing the watch to lay flat on the wrist. It has heavily nickeled case, removal springs, cut steel pinions, fancy pierced hands, and your choice of silver dial or radium luminous dial, with cubist numerals. The construction of the dial is specially designed to insure easy time telling. Altogether it is the neatest and most compact wrist watch made. Every Watch fully guaranteed, a printed guarantee being included with each watch.

No. 8026. Tip Top Octagon Wrist Watch, with silver Dial. Price postpaid.....$3.95

Mechanics *and* Farming Tools

The Tool Section is the Basis of Every Hardware Stock—all else is relative.

Hence, every Dealer is deeply interested in making his Selections with such care as will reflect his good Judgment.

With this outstanding fact in mind, the House of Shapleigh has, for Eighty-six Years spared neither effort nor expense to assemble and maintain a stock of Tools which from the standpoint of quality and completeness would be representative of all that is best in this Important Line.

In the following pages will be found every tool of proven worth produced by all the Leading Manufacturers under their respective Brands.

Notwithstanding the unquestioned excellence of the tools marketed under their maker's names, their wide distribution naturally results in price competition which at times limits the Dealers' Profit to such small percentages as Retailers least qualified in the science of merchandising see fit to add.

To meet this condition and to insure to its Patrons a living profit, The Shapleigh Company, in 1864, undertook to Build, under the *DIAMOND EDGE* Trade Mark, a complete Line of Tools of superior quality and embodying exclusive features in design and finish.

And now, after more than sixty years of painstaking effort, in which the co-operation of Mechanics, Retailers and Manufacturers has been constant, the Line of *DIAMOND EDGE* Tools has attained national recognition as the best and most complete selection under a single Trade Mark.

Dealers desiring to obtain exclusive control of such a line, with the attendant advantage of uniformly high quality and satisfactory profit will greatly benefit themselves by securing the *DIAMOND EDGE* agency.

Baby Hammerless Revolver

NEW EJECTOR MODEL

A HANDSOME AND MOST EFFECTIVE WEAPON

PRICE *TAKES REGULAR .22 CALIBRE CARTRIDGES*

$6.50
Pearl Handle $1.75 Extra

HERE is the NEW EJECTOR TYPE "Baby" Hammerless Revolver, a vast improvement on the previous model of this well known and efficient little weapon. The new "Baby" Hammerless has been produced to meet the ever increasing demand for a revolver that would combine small size and light weight with the essential features of EFFICIENCY and PRACTICABILITY. It is small in size, measuring but 4¼ INCHES LONG, and weighing but six ounces, yet it is just as effective and serviceable as the most expensive weapon you can buy. When you need a pistol you need it bad and quick as every second counts. It is the ideal ladies' revolver, as it is small enough to fit in a handbag or even a purse of moderately large size, or can be concealed in a special Holster made for the purpose. This Holster is made of soft leather and holds the revolver firmly above the knee, affording instant protection. Every lady should have a revolver and should know how to use it, and there is no safer or better one made than this. A great feature is its safety action. The Folding Trigger, as shown in the illustration makes accidental discharge impossible. You do not have to be afraid to carry the "Baby" Hammerless with you; it is safe to carry and assures safety in carrying it with you. The new model is now made with a REMOVABLE CYLINDER with shell-ejecting device, so that the empty shells are practically removed automatically. The new ejector model has the simplest method of removing shells from the cylinder and still retaining the strength of the solid frame, having all the conveniences of revolvers of the swing-out type without their disadvantages.

REVOLVERS SHIPPED BY EXPRESS ONLY

The ammunition used is the standard 22 calibre cartridge obtainable at sporting goods stores but we and different stores everywhere or you may obtain the cartridges direct from us. Revolvers and cartridges can only be shipped by express, consequently when these goods are ordered, the entire order is shipped by express. Orders for Revolvers and Cartridges are accepted only on the understanding that we are to ship the order by express and not parcel post. The Revolver takes six shots in one loading. The operation of the firing mechanism is extremely rapid and absolutely reliable six 22 calibre shots can be fired in as many seconds. It is very well constructed of close-grained, fixed cylinder with black hard rubber handles. We also have the "Baby" Revolver with Pearl Handles for $1.75 extra if you want the "Baby" equipped with Pearl Handles. Prices of these Revolvers also Cartridges and "Baby" Holster are listed below

No. 9025.	Baby Hammerless Revolver, with Black Rubber Handles	$6.50

Every American Red Blooded Boy Wants This

BLANK CARTRIDGE PISTOL

REAL REVOLVER STYLE

ONLY $1.00

Shipped by Express Only

FIRES 22-CALIBER BLANK CARTRIDGES.

Protection against

Burglars, Tramps and Dogs

This well made and effective Pistol is modelled on the pattern of the latest type of Revolver, the appearance of which alone is enough to scare a burglar, whilst, when loaded, it will probably prove just as effective as a revolver with real bullets, without the danger to life. It takes the standard 22 Calibre Blank Cartridges, that are obtainable most everywhere. Even the most timid woman can use it with perfect safety and frighten a thief without risk to herself or anyone else. You can have it lying about without the danger attached to other revolvers. We sell large numbers around 4th July. Well made of solid metal and handsomely nickel plated all over. Price large size, same or quality, ONLY $1.00. Cannot go by parcel post, shipment made by express only. 22 Caliber Blank Cartridges, 50 cents per 100 shipped by express only.

Blank Cartridge Pistols Cannot Go by Parcel Post

Please note that on May 1st, 1911 the new law passed by U. S. Congress prohibiting the shipment of revolvers and pistols by mail went into effect. As this includes our Blank Cartridge Pistols, any other that calls for, any firearm such as revolver or pistol, cartridges, or any other non-mailable merchandise, will be sent by express and not by parcel post. We do not prepay the express charges on all parcels sent by express, as these can be paid upon delivery of the shipment. A low rate for the express age, however, will be given on your next order. Simply send us in the receipt which the Express Company will give you and send it to us with your next order, and it will be accepted as so much cash to be applied to your order.

No. 2018. Blank Cartridge Pistol. Large Size, Shipped by Express Only.....$1.00

COWBOY HOLSTER FOR BLANK CARTRIDGE PISTOL

Showing Holster Closed

Showing Holster Open

So many of our customers have asked if we can supply a Holster for our Blank Cartridge Pistols, that we have induced a leading manufacturer to carry a stock of a dandy Holster, as illustrated. This is just the right size and will accommodate the pistol nicely. It is a handsome Holster, and comes complete with Belt, as illustrated.

Of course the Cowboy Holster will serve equally well for any other Revolver of standard size, such as our Young America, Baby Hammerless and Break Open Revolvers (Numbers 8005, 9006, 9007 9025, 9001, 9009, and 9011). At 50 cents each, these Holsters are certainly remarkable value.

BEE-VAC *Washer*

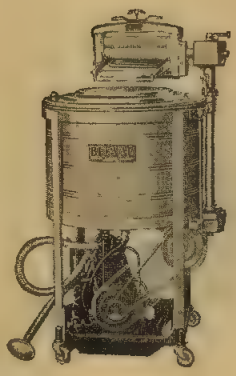
With Fullpower Engine for Homes Without Electricity

Type: The agitator type which merits the approval of thousands of enthusiastic users.

Agitator: Long experience has developed this ruggedly built, cast aluminum agitator—an exclusive patented device found only on the BEE-VAC. Three large paddles give the water a swift, turbulent rolling action—forcing it up along the side of the tub and drawing it back to the center with a strong suction. Three specially designed intermediate ribs or webs increase the turbulence of the water without damage to clothes, and also prevent the clothes from becoming wound or tangled about the agitator.

Copper Tub: Of 18-ounce spun copper with a heavy, non-peeling, polished, nickeled interior. Easy to keep clean and self-draining. The outside is beautifully finished in surf-green lacquer. Aluminum cover.

Frame: Frame is built of channel steel securely welded and riveted.



Wringer: Instant take-apart wringer. With instant safety release feature; soft oversize rolls; tension self-adjusting. Wringer may be swung into six positions; automatically locks when the desired position is reached.

Gears: Heavy construction; simple design. Fully enclosed and operate in grease-tight housings.

Bearings: Packed in heavy lubricant, once a year is sufficient for lubricating.

Capacity: Eight sheet capacity, the BEE-VAC is compactly built and occupies small space, but has an oversize tube allowing for ample water for thorough washing.

Engine: Easy starting, air cooled. ½ H.P., 4 cycle gasoline engine. See complete description on next page.

Large easy rolling casters.

Model A-103.

Shipping Weight, 290 lbs.

Net Weight, 238 lbs.

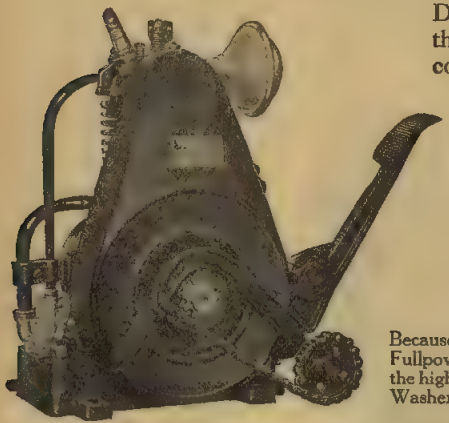
This is the same, nationally known, high quality, fast washing BEE-VAC washer, powered with four cycle gasoline engine instead of an electric motor. The compact, dependable motor is built right into the washer, furnishing ample power for the heaviest washings. This Model A-103 BEE-VAC is needed in every home not wired for electricity.

The amazing speed with which the BEE-VAC does its work is beyond compare. Silks, laces, overalls—anything that is washable can be trusted to the BEE-VAC to be washed quickly and thoroughly and wtih complete safety.

The BEE-VAC Washer is built to give many years of trouble-free service and is fully guaranteed . . . a guarantee backed by over two million dollars in resources and twenty years of manufacturing experience.

Consider carefully the selling points shown in the specifications. It will pay you well to investigate the outstanding merits of this good washer. (See next page.)

A Fullpower Four Cylinder Gasoline Engine
Simple · Sturdy · Efficient
Drives the BEE-VAC Washer



Dependable, economical, compact—this unique gasoline motor may be compared with the finest motor car engines

Built by one of the country's greatest designers and manufacturers of small engines, it was selected to drive BEE-VAC Washers only after a long period of trial and testing by our own and other widely known engineers. From every standpoint of mechanical excellence and performance it has been pronounced as nearly perfect as such a motor can be built.

Because of this, we do not hesitate to endorse the Fullpower Engine as being equal in every way to the high standards of quality found in the BEE-VAC Washer itself.

Specifications

Power—Related at ½ horsepower.
Speed—1750 R.P.M.
Type—Single cylinder air cooled. 4 Cycle. 2¼ in. bore; 2¼ in. stroke.
Ignition—Built-in flywheel magneto standard motorcycle size plug.
Lubrication—Positive oil pump, assuring ample lubrication. Oil supply easily determined. No guessing.
Carburetor—New adjustable jet double valve type. Quick starting.
Cooling—By strong air current from flywheel blower. Extra large cooling fins on cylinder.
Governor—Centrifugal flywheel type—adjustable.
Starting—Foot pedal starter—motor cycle style.
Finish—Black enamel.
Power Take Off—Direct from crankshaft.
Crankshaft—Drop forging—ground heavy counter balances reduce vibration.
Fuel Capacity—Regular base holds ¼ gal.—3 hours' supply. One gallon base can be furnished at slight extra charge.
Weight complete—57½ pounds.

Easy to Start
Easy to Operate

The simplicity of the Fullpower Motor makes it easy for anyone who will follow the simple directions to secure perfect results without any mechanical knowledge.

Any engineer can testify as to the advantages of the four cycle engine. It insures easier, quicker, starter action, lessens vibrations, lengthens life and assures satisfactory service under all conditions.

Every part of the BEE-VAC Washer including the Fullpower engine is fully guaranteed.

Dealers will be furnished with free advertising material, imprinted and sent prepaid, upon request direct to Birtman Electric Company, 4140 Fullerton Avenue, Chicago.

BISSELL'S TOY SWEEPERS

"LITTLE HELPER"

Toy

Colorful, alluring, finely made, big value. Bright red case of lacquered fibreboard top and wood ends, natural wood wheels and coppered fittings. 7 in. long with 24 in. handle. Real bristle brush that sweeps.

No. D4—W't per doz. 10 lbs., per dozen $4.45

NEW "LITTLE GEM"

Toy

Richly attractive, now 7⅞ in. long, all blue case, nickeled fittings and fancy bail. Lacquered fibreboard top with wood ends, black wheels and 24 in. blue, waxed handle. "Broom-action" mechanism and real bristle brush that sweeps.

No. D5—W't per doz. 12 lbs., per dozen $8.35

ONE IN A CARTON

"LITTLE JEWEL"

Miniature Sweeper

A very fine and sturdy 9-inch play size sweeper with 27-inch handle. Curved fibre-board top, glossy lacquer finished in a realistic crotch mahogany grain with gilt lettering and border. Nickeled fittings. Self-adjusting bristle brush, dump levers, rubber-tired steel wheels, etc. Each one in a carton.

No. D6—W't per doz. 21 lbs., per dozen $22.20

BISSELL'S MINIATURE .. SWEEPERS

"JUNIOR"

Miniature

A complete miniature carpet sweeper in every detail making it useful as well as the de luxe play-size sweeper. Mahoganized gumwood case and nickeled fittings. Size 9x5¾x2⅛ in. 30 in. handle. Each sweeper in a carton.

No. D7—W't per doz. 23 lbs., per dozen $33.35

ONE IN A CARTON

EXTRA PARTS FOR BISSELL CARPET SWEEPERS

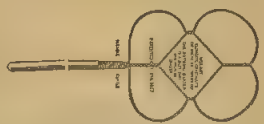
No. D55—Rubber Tires....doz 1 45

No. D56—Handles.....doz. 4.00

BATWING CARPET BEATERS



No. D16—Made of bright, buffed tin, tough Bessemer steel wire. The metal is "tied" at short intervals, preventing all vibrations, which is a common cause of breakage. A flexible center causes Beater head to strike rug squarely, without knuckles being skinned by coming in contact with rug. Handle which is finished in gloss enamel, is screwed in, forming a thread which is gripped by expanded wire socket and cannot be removed. Size head 9¾x11 in. length overall 27⅛ in., w't per doz. 8 lbs.....per dozen $4.45

ONE DOZEN IN A BUNDLE

CARPET BEATERS

Premier Steel Spring Wire, Tinned.

Are made from the very best spring steel wire that can be made into the shape required. They have wide spread heads. The blow is divided over a large space and is more effective and not injurious to fabrics. Shanks have only four untwisted wires, therefore elastic.

Nos.	D112	D211
Head, in.	9½x12	10x10
Length, in.	28	32
W't, doz., lbs.	11	12
Per dozen	$3.35	4.45

ONE DOZEN IN A BUNDLE

SPRING HANDLE

No. D15—Made of No. 7 galvanized steel wire, securely twisted on smooth hardwood handle. Handle screws on, will not come off. Width of spring 5 in., length over all 34 in., w't per doz. 9 lbs..per dozen $4.20

JUST-RIGHT

No. D17—Made of No. 10 coppered wire, length 30 in., width 14½ in., raised handle to protect knuckles, double braced, securely fastened to hdle, w't per doz. 8 lbs.dozen $4.45

Removes dust quickly, as it strikes a large surface, doing no damage to carpet and so hung in handle as to be perfectly balanced in hand. Does not strain the wrist of the beater. Impossible to get loose in the handle.

No. D45—3 separate pieces of No. 12 coppered spring steel wire, securely held by strong iron braces, wood handle, length 36 in., w't per doz. 9 lbs. .....per dozen $5.55

No. D42—Rattan, three strand, 12x8½ in. blade, twisted rattan handle, wire wrapped in three places, extreme length 33 in., w't per doz. 5½ lbs.....per dozen $8.00

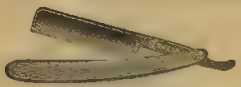
HIGHEST QUALITY IMPORTED BARBERS' RAZORS



Made in Germany

S. R. DROESCHER'S FAMOUS "SWEEP" RAZORS are unequalled in quality, finish and workmanship, and are guaranteed to give entire satisfaction.

They are made of the best quality English steel and are twice hand forged to prevent overheating.

Ground by hand by expert grinders after the old approved system. The blades thus remain perfectly cool and retain the original quality of the steel, which is an impossible achievement in machine-ground razors. Every razor is tested and set ready for use. Unequalled for private as well as barbers' use.

No. C206½—½ in. blade, square point, full hollow ground, white ivoride handle.....per dozen **$60.00**

No. C206¾—¾ in. blade, square point, full hollow ground, white ivoride handle.....per dozen **$60.00**

ONE IN A TELESCOPE BOX, HALF DOZEN IN A BOX

Made in Germany

Made from the famous "KARBONA SPECIAL STEEL" ground by hand by expert grinders after the old approved system. The blades thus remain cool and retain the original quality of the steel, which is an impossible achievement in machine ground razors. Every razor is tested and set ready for use. Fully warranted—unequalled for private as well as barbers' use.

No. C190½—½ in. blade, square point, full hollow ground, white ivoride handle.....per dozen **$60.00**

FARM LEVELS

BOSTROM

Telescope is "Achromatic," giving a Clear Field, and was Designed Especially for this Instrument; and Gives the Operator a Longer Range and Clearer Sight; You Can Read the Cross on the Target at a Distance of About One-Fourth of a Mile, in any Direction, thus being Enabled to Cover a Scope of One-half Mile, as the Turret Carrying the Telescope Revolves.

The Line of Sight is Arrived at by Cross Hair Lines Set in the System of the Magnifying Glasses in the Telescope, and which Cannot be Dislodged or Destroyed. The Turret Carrying the Telescope and Bubble Revolves so that the Telescope may be Pointed in any Direction Desired, without the Necessity of Readjusting the Level.

Rod and Target Composed of a Telescopic or Sliding Target Rod, with Thumb Screw for Securing in any Position and is Graduated to Feet, inches and One-fourth of an inch, Telescoping to Five Feet when Closed, and to Nine and One-half feet when Extended, the Target is Sliding and of the Usual Form.

Plumb Bob Included which Adapts the Lever to the Use of Architects, Contractors and Builders.

TRIPOD Composed of Three Wooden Legs and Head Receiving the Adjusting Head, Which Supports the Face Plate.

Adjusting Head is Screwed on to the Tripod and Carries Three Adjusting Screws for the Adjustment of Face Plate and Level to a Perfectly Horizontal Position. Face Plate is Attached to the Adjusting Head by a Screw and Strong Spring which Presses the Face Plate Firmly Against the Ends of THREE Adjusting Screws, and at the same time Insures a Flexible Joint, so that the Face Plate can Adjust Itself to any Position. For the Purpose of Obtaining any Angle Desired, this Face Plate has a Graduated Circle, Divided into 360 Degrees, Numbered from Zero to 90 Degrees in Both Directions, Giving Zero Points on Opposite Sides of the Circle.

No. UBA—3x3¼ inches; Weight per Dozen, 3 lbs..... $23.50

Twelfth Dozen in a Box

LEVELING STANDS

STANLEY

Used in Connection with a Wood or Iron Level and a Pair of Level Sights will be Found in Many Cases a Very Satisfactory and Inexpensive Substitute for the More Expensive Surveyors' Instruments. Readily Determines Levels from a Given Point to One at a Distance Such as Locating or Setting the Profiles for Foundation Work, Ascertaining the Proper Grades for Drains, Ditches, etc.; May be Used on a Reasonably Level Surface or Placed on a Pole or Crow-Bar even when Same are not Exactly Perpendicular. Base has Three Supporting Arms on which the Stand Proper Rests and by Slightly Adjusting Screws the Swivel Part of the Stand can be Made Exactly Level. A Bolt Passes Through the Stand and is Screwed into the Base Holding the Two Parts Together When Adjusting the Level for Use. The Swivel is Accurately Machined so that it Works Freely and can be Locked in any Position Desired by the Small Knurled Screw under the Center.

Placed on a Pole

No. 16R60. Each 1.65

BROWNING AUTOMATIC SHOTGUNS

Grade No. 1

These guns are fitted with Cockerill Steel Barrels, of the same grade as used in Mauser rifles. The very high tensil strength of this steel, makes it possible to furnish a considerably lighter barrel, without any sacrifice of strength and thus reduce the weight of the gun. Matted receiver, English Walnut checkered stock and fore end. Half pistol grip stock. Standard dimensions, 14¼ in. long, drop at heel 2¼ in., at comb, 1⅝ in. An improved safety device is located in the forward end of trigger guard. Safety can be pushed to "SAFE" position from outside of trigger guard with the finger which eliminates any danger of finger slipping and accidentally pulling the trigger. A magazine cut off permits loaded shell in chamber to be ejected without disturbing shells in magazine. Barrel ring guide is forged in one piece with the barrel, instead of being a separate part. Double extractors insure positive extraction and feed. Side ejection, five shot, takedown, solid breech.

The only Browning Guns we shall be able to supply this year are those indicated below:

No. C712—12 gauge, 30 or 32 in. full choke, 28 in. modified choke, or 28 in. cylinder bored, plain barrel, for 2⅝ and 2¾ in. shells, w't about 7¾ lbs.....each **$108.45**

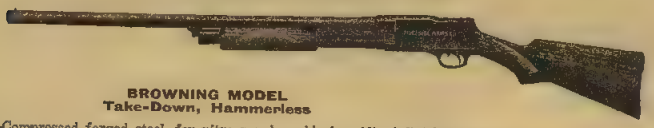
No. C712R—12 gauge, 30 or 32 in., full choke or 28 in. modified choke, RAISED MATTED RIB barrel, for 2⅝ and 2¾ in. shells, w't about 7¾ lbs.....each **$124.85**

No. C16700—16 gauge, 28 or 30 in. full choke, or 26 in. modified choke or 26 in. cylinder bored, plain barrel, for 2⅝ in. shells, w't about 7 lbs.....each **$131.10**

No. C16700R—16 gauge, 28 or 30 in. full choke, 26 in. modified, or 26 in. cylinder bored, RAISED MATTED RIB barrel, for 2⅝ in. shells, w't about 7 lbs.....each **147.55**

ONE IN A BOX, TEN IN A CASE

RIVERSIDE REPEATING SHOT GUNS



BROWNING MODEL

No. C16521R—16 gauge, 28 in. full choke with raised matted rib barrel, for 2⅝ in. shells, w't 7 to 7¼ lbs.....each **$66.65**

NEW MODEL MAGAZINE EXTENSIONS FOR AUTO-LOADING SHOTGUNS

Adds either two or four shells to the magazine capacity of Remington and Browning autoloading shotguns at the option of the shooter. Thus the shooter has his choice of a 7 or 9 shot capacity gun instead of a 5 shot. The quick change is accomplished by a coupling in the center of the device, which interchanges with the end cap; it makes possible a gun practical for both marsh and upland shooting. Attached or detached in two or three minutes' time. It simply replaces the magazine cap of the gun and does not interfere in any way with the original mechanism. Converts a gun into an unparalleled riot arm. Adapted to guns with barrels 24 inches or longer. Blued metal.

Length overall—12 gauge—When extended for 2 extra shots, 5⅞ in.
Length overall—12 gauge—When extended for 4 extra shots, 11⅜ in.
Length overall—16 gauge—When extended for 2 extra shots, 5¼ in.
Length overall—16 gauge—When extended for 4 extra shots, 10⅛ in.

No. C77—For Remington 12 gauge. W't each 5 oz. when coupled for 2 shots; 9 oz. coupled for 4 shots....each **$12.55**

No. C78—For Browning 12 gauge. W't each 5 oz. when coupled for 2 shots; 9 oz. coupled for 4 shots....each **12.55**

No. C79—For Browning 16 gauge. W't each 4 oz. when coupled for 2 shots; 7 oz. coupled for 4 shots....each **12.55**

The Big Question

in business today is . . . how to get people to buy. One practical way is this:

Use printed advertising BUT be sure that each piece of printing is good enough to interest and sell the reader.

Our Dealers' Service Bureau is creating this kind of high grade direct advertising.

Write us for particulars

THE CHRISTEN WINDSHIELD WIPER BLADE

Fits All Wiper Arms

Blade consists of a rust-proof holder, in which are clamped a strip of rubber and chemically treated felt. Rubber wipes off dirt—felt applies a chemical to glass, forming an even and smooth surface.

The Blade keeps the windshield clear without continuous wiping. Just a few moments of action when the storm starts—then a clear vision-area that will stay clear for hours.

Approved by the
Try Out and Testing Division
AUTOMOBILE CLUB OF NEW ENGLAND

Blades are 7½ in. long. Each wrapped in cellophane with directions. 6 mounted on a display card, 18 loose.

*DIAMOND EDGE LABELS

All *DIAMOND EDGE* Labels are the same color and style. The following reproductions show their Color, Design and harmonious appearance. *DIAMOND EDGE* Tools are packed in green, soil proof boxes. They look well on the shelf and will attract the attention of customers.

"DIAMOND EDGE IS A QUALITY PLEDGE"

A Guarantee . . . .

and What It Means

Every article bearing the *Diamond Edge* Brand is Guaranteed to be properly made of the best material, carefully finished and inspected and that it will perfectly serve its intended purpose.

If there is a defect in the steel, it will break.

If there is a temper crack in a tool, it will break.

If a tool or knife blade is not properly tempered, the steel will show it.

These things sometimes happen, and the *Diamond Edge* Guarantee gives you full protection.

. . but . .

Abuse and misuse will ruin any tool;

Dry grinding will draw any temper;

Prying with a high tempered knife blade, will break it;

Chopping with a frost cold axe will break the edge;

An axe, reground too thin will break;

Such mistreatment is not covered by any Guarantee---failure from these and similar causes is not the fault of the seller.

ABUSED TOOLS TELL THEIR OWN STORY

. . and . .

THE ABUSER MUST BE THE LOSER

No. 39 Per Doz. $10.70

Box of 24 Embossed Checkers with all larger games

CAILLE MODEL 20 MASTER FIVE SPEED TWIN MOTOR

The Master is a more powerful and speedier motor embodying the same features as the "Junior" model—neutral starting—selective type speed control, etc. This motor is conservatively rated at 6 brake H.P. and has a speed range up to 29 M.P.H. on various types of boats. An ideal combination for the man who wants a comparatively powerful general utility motor.

Has a strength far beyond ordinary requirements—sturdy and rugged for long service.

6 brake N.P., speed 20 M.P.H., bore 2⅛ in., stroke 2 in. 200 to 2800 R.P.M.

The only 5-speed outboard motor with a neutral starting position.

The Master CAILLE 5-speed TWIN has five speeds engineered into one pair of propeller blades.

The Five Speeds mean a world of difference in operation. If you want high speed ahead, just raise steering handle to position—lower to position and the motor trolls along at less than a mile an hour. Shift down to reverse and you have an emergency brake that backs your boat immediately.

It is the only motor that gives two speeds forward, two speeds reverse, and a neutral starting or idling position directly controlled by steering handle. Each speed is independent of the other.

All the operator has to do to get different speeds is to change positions of the steering handle, which automatically locks in place to maintain the speed desired.

The only outboard motor that starts in neutral and permits the boat to remain motionless while the motor is running.

The only outboard motor that can be reversed from a standing start.

The only outboard motor that effectually acts as a brake on your boat, bringing it to a dead standstill at will.

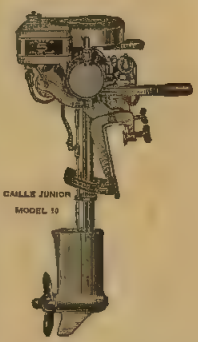
The neutral position of the Master 5-speed Twin permits the motor to be started at the dock—the boat stands still until you are ready to go, and by a mere shift of the tiller handle you can go either forward or backward. This neutral position also gives you operator a chance to adjust the motor and let it warm up a minute before putting on the load—a feature that is considered indispensable by many users of out-board motors for general all around service.

No. C7659—With fresh water fittings, each $329.95

No. F7660—With salt water fittings, each★ $329.95

ONE IN A BOX COMPLETE. NET W'T 61 LBS.

CAILLE MODEL 10 JUNIOR 5 SPEED TWIN MOTOR



A 2½ H. P. 5 Speed Twin, designed for lighter rowboats where conservative amount of power is needed.

The Junior 5-Speed Twin is adapted for use on lighter type rowboats. This model has neutral starting—selective type speed control, two speeds forward and two speeds reverse with a speed range from 2 to 10 miles per hour. This feature makes the Junior an ideal motor for family use.

The Caille Junior 5-Speed Twin weighs 45 lbs. complete, and embodies all the fine features of the Master 5-Speed Twin—neutral starting, selective type speed control, and built-in fly wheel magneto. Motor tilts freely over submerged obstructions, and the same sturdiness and dependability that have made the Caille Outboard Motors famous.

Motor is two cylinder, two cycle design—cylinders opposed, fire at the same time to eliminate vibration. Efficient muffler for silence. Bore 2 in. Stroke 2 in. R.P.M. 200 to 2000. 2½ H.P. Gears are chrome nickel steel. Propeller of nickel bronze alloy is practically unbreakable. Water pump completely built of bronze, simple, trouble-free plunger type, effective in action. New Caille throttle control carburetor with float and needle point adjustment. Main motor frame of heat-treated Lynite.

No. C7661—With fresh water fittings, each $289.95

No. F7662—With salt water fittings, each★ $289.95

PORTABLE DRAIN TANKS

BROOKINGS

It Helps the Retail Oil Dealer Sell More Oil.

It Makes Easy Work of Draining Any Crankcase, or of Draining a Radiator so it May be Filled with an Anti-Freezing Solution.

It Has a Sloping Cover That Catches the Oil and Automatically Conducts it into the Tank.

It Can be Carried with One Hand Even When Full of Liquid.

The Drained Oil is Always Under Cover and Out of the Way.

Several Cars Can be Drained Before it is Necessary to Empty the Tank. It Holds About 5 Gallons.

It is Easily Emptied by Simply Turning on End.

It is Equipped with a Folding Handle, Rounded Runners and is Durably Made.

It is 25 inches Long, 11¼ inches Wide, 4½ inches Deep and Holds About 5 Gallons.

Here's Another Use for the Brookings Portable Drain Tank That the Average Garage or Filling Station Man Will See in a Minute. It's Just the Thing for Catching the Drip When Oiling Car Springs. It is Handy, Too, for Draining Radiators—There Are Many Other Uses to Which it May be Put.

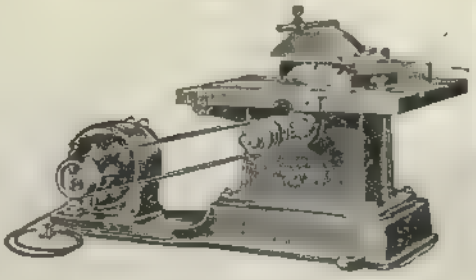
POWER BENCH SAWS

CHAMPION



Adapted for Use by Pattern Shop, Contractors and for General Wood or Soft Metal Work.

Designed to Rip, Cross Cut, Mitre or Groove:

Table—Cast Iron, Well Ribbed on the Bottom; Rigidly Hinged at the Back; Front Edge Can be Raised or Lowered for Grooving or Lifted Back for Changing the Saw Blades; Tilts 45° to Right and 10° to Left.

Frame—Cast Iron Rigidly Constructed and Braced; Has Opening at the Bottom to be Placed Over Hole in Bench to Remove Saw Dust.

To Hold the Table in Place to Cut Various Depths, a Threaded Bolt is Raised to its Desired Position

Bearings—Are of Extra Length Making them Rigid and Free from Vibration; Are Split to Take up Wear; on No. 6 there are Ring Oiling; No. 8 is Equipped with Annuler Ball Bearings.

Spindles are Threaded on the Pulley End to Take a Sand Disc, Grinder or Buffing Wheel

Regularly Equipped with Ripping Fence and Cut Off or Mitre Gauge; ¼ H. P. 110 Volt 60 Cycle A. C. Single Phase Motor.

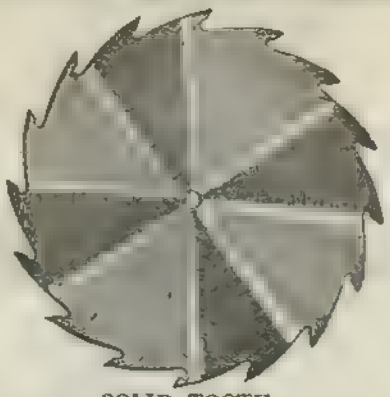
CIRCULAR SAWS

NOTE—All Prices on this Page are Manufacturers Lists. When Ordering, State whether Rip or Cross Cut

Left Hand



SOLID TOOTH

Right Hand

HAND OF SAWS

Circular Saws **30 inches and Smaller are Made Flat on Both Sides and are Used as Either Right or Left Hand;** Saws Larger than 30 inch, When Bevel Ground, with the Center Thicker than the Outer Edge on One Side and Perfectly Flat on the Other, are "Handed;" Place the Saw in Front of You with the Teeth Running Toward You and the Flat Side of Saw Names the "Hand." The Log and Carriage Run off the "Hand" Side as they Move Away from You.

DIRECTIONS FOR ORDERING

State Diameter in inches Gauge at Rim, Gauge at Center; Right or Left Hand; Number and Kind of Teeth; Size of Mandrel Hole; Size of Pin Hole; Distance Between Pin Holes from Center to Center; Greatest Feed at Each Revolution, in inches; Kind of Lumber to be Sawed; Number of Revolutions per Minute. Saws 40 inches and Larger have 2 inch Mandrel Hole, ⅝ inch Lug Pin Holes, 3 inches from Center to Center; if Wanted Differently Send Pattern of Holes.

Polished Steel, Patent Ground and Tempered.

Special Notice.—Orders for Saws **Not of Standard Gauge or Hole** as Described in List Below, or Irregular in Any Particular, will be **Accepted Only with the Distinct Understanding** that they are Subject to Delay in Making, and **are Not Subject to Cancellation** Under any Circumstances.

Warranty.—Each Saw is Warranted Free from Flaws and Seams and as Nearly True as it is Possible to Make it. If Found Defective in Any Particular, it May be Returned (**Always Advise Us and Get Our Reply and Shipping Instructions Before Returning**, and if, on Examination, it is Found the Saw is at Fault, all Necessary Repairs will be Made or a New Saw Given in Exchange, Provided it is Returned Within 30 Days from Date of Shipment. **Cross-cut Saws are Not Warranted Against Cracking.**

Using a Cold Chisel for Retoothing a Saw is Almost Certain to Crack the Plate, and Corners Filed Square in the Gullet of the Tooth will Frequently Produce the Same Result, Particularly in Frosty Weather; **Our Warranty Does Not Cover Saws Breaking from Such Causes.**

All Saws Filed and Set Ready for Use. Sizes 6 to 10 inches, Wrapped in Paper; Larger Sizes Shipped on Boards

NOTE: Saws 40 inches and Over are Filed and Set Ready for Use. No Extra Charge for Saws One Gauge Thicker than Listed; Saws 38 inches and Under Beveled One Gauge Without Extra Charge; Saws 40 inches and Over, Beveled Two Gauges Without Extra Charge; Saws 48 inches and Larger made Thinner than 10 Gauge, are Not Warranted, and 10% is Added for Each Gauge Thinner than 10 Gauge.

The Speed of a Circular Saw is a Most Important Thing to Watch. If Speed is too High it Cannot do Good Work, It Generates Heat and the Centrifugal Force Causes it to Stretch and Become Limber and Not Cut Straight.

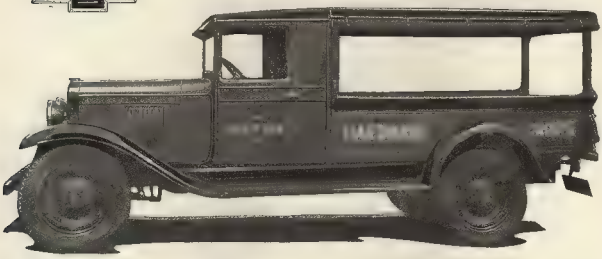
CHEVROLET



CHEVROLET *Six-Cylinder* TRUCKS

Six-Cylinder Performance Outstanding Economy & Exceptional Capacity - - at Amazing Low Prices!

Chevrolet Six-Cylinder Trucks have set a new standard for performance in the low-price field. The new six-cylinder valve-in-head motor is smooth, powerful and unusually flexible in traffic. The four-wheel brakes are quiet and positive. And steering is delightfully easy over any road.

Chevrolet Six-Cylinder Trucks provide gasoline mileage equal to that of their famous four-cylinder predecessors. Rugged construction in every unit gives them remarkable dependability. And unusual maintenance economy is assured by inexpensive nationwide service and extremely low-priced parts.

Chevrolet Six-Cylinder Trucks are built with an over-length, rigidly-braced, channel-steel frame. This makes possible the mounting of bodies of exceptionally large carrying capacity. And, whether the loads be of concentrated weight or of bulky materials, they are properly distributed and balanced.

But, most remarkable of all, these new Chevrolet Trucks *are actually available in the price range of the four!* And there is a Chevrolet body type designed to meet your individual requirements. See your Chevrolet dealer today—and arrange for a trial load demonstration.

HOW TO PITCH CURVES

By the World's Greatest Masters

$1.00 BOOK FOR 25 CENTS

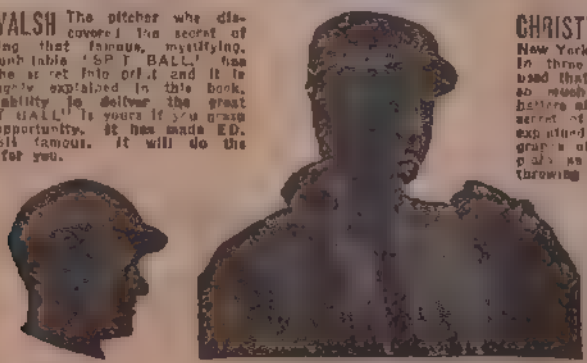
WALSH
The Spit-ball Wizard Starting the Swing

"DOC" WHITE'S SHADOW PITCHING

HERE IS THE OFFER OF OFFERS. This will prepare you MENTALLY, MORALLY and PHYSICALLY to become, not only a great baseball player, but also a great athlete. It explains what an athlete should eat and drink. How he should breathe to develop lung wind and sound lungs. How he should sleep to get the best mental and physical benefits. How he should bathe and what exercises will develop his muscles from head to foot. It teaches you the control of temper and nerves, both of which are necessary to athletic success. And wonderful as it may seem, it will teach you the art of SHADOW PITCHING [illegible] practice and LEARN THE SECRET, by which you can develop Control and Speed necessary to become a STAR PITCHER.

MATHEWSON
The Old Master Set for the Finish Away

ED WALSH The pitcher who discovered the secret of throwing that famous, mystifying, and unhittable "SPIT BALL" has put the secret into print and it is thoroughly explained in this book. The ability to deliver the great "SPIT BALL" is yours if you grasp this opportunity. It has made ED. WALSH famous. It will do the same for you.



CHRISTY MATHEWSON Pitches the New York "Giants" to three pennants in three years. In doing this he used that great "FADEAWAY" ball, so much feared by all the great batters of the National League. The secret of how to throw this ball is explained in this book, with photographs of every move, making it as easy as day to master the art of throwing the "FADEAWAY" ball.

JOE WOOD

the "SMOKE BALL" marvel, next to the speediest pitcher in the world, and who in 1912 won 34 out of 41 games and the World's Championship for the BOSTONS, is the inventor of the "SMOKE BALL," which is explained in this book so that anyone can easily learn it.

WALTER JOHNSON

is the mainstay of the Washington team. He is known everywhere as the "SPEED KING" of the Baseball World the man who has struck out more fast batters in a single season than any other pitcher known. The way he develops and maintains SKILL and CONTROL with the speed of a CANNON BALL for game after game is explained so that any boy can develop the strength for this.

NAP RUCKER

the husky southpaw of the Brooklyns who saved his team from being dropped out of the National League standing invented the "Knuckle Ball," which is described very fully in this book. It is easy to learn and when mastered will make batters look cheap.

No. 1274. How to Pitch Curves (Contains all the above information) Postpaid $0.25

Star Money Maker

[illegible] personal experiences of many people showing how they made money in spare time at home. "Pigeons for Profit" is one of the many topics discussed. Also a number of valuable formulas, recipes and trade secrets. 64 pages. Sent for 10c pp.

ROW BOATS.

SPECIAL OUTBOARD MOTOR.

Made especially for use with detachable row boat motors. Entire construction is very substantial. The wide transom and almost flat stern section together with the straight key line allows for added weight of motor and operator and keeps the entire length of boat on water. Large stern seat allowing operator sufficient room to handle steering device on engine. The dimensions of frame work and general construction reduce the vibration of motor to a minimum.

These boats are considerable heavier than the ordinary standard row boat on the market, but the increased weight adds to the strength and safety and makes it especially adapted for family use. The added weight of the boat does not decrease its speed as its under body is so designed that it glides on the top of the water instead of displacing it.

Frame, keel, stem, transom, stern post and ribs are made from clear selected white oak.

Planking is made from selected air dried cedar. Each plank in one length fastened to ribs with galvanized fastenings.

Decks, coaming and gunwale, selected white oak, screw fastened. Seats and floor boards, selected cedar or spruce.

Painting and finish Entire boat is thoroughly smoothed and sand papered and all seams caulked with seine twine. Screw and nail holes are filled flush with a special cement and entire boat painted with three coats best marine paint. Decks, gunwales and seats are finished natural with three coats spar varnish. Inside of boat painted green and outside white.

Complete with one pair of oars.

Boats	S-199	S-200
Length, feet	16	18
Beam, inches	48	50

MINNOW PAILS.

FLOATING.

AIR-FED.

Bucket is made of 28 gauge galvanized steel, with air chamber made of 24 gauge, constructed concave to hold 25 pounds of air pressure, put into bucket with bicycle or automobile pump.

Constructed with needle valve to supply oxygen to water which keeps minnows alive an indefinite length of time.

Each

No. S-AF—**Minnow Pails;** capacity, 8 quarts; weight each, in carton, 7 lbs. **$5.00**

AIR-FED.

Bracket is made of heavy gauge galvanized iron, all parts rust-resisting, air chamber in bottom of concave design, is made of extra heavy galvanized iron. Bucket holds eight quarts of water

Filling of chamber to 25 pounds pressure with small hand pump keeps water fresh with oxygen for twelve hours. Heavy brass needle valve regulates flow of air.

Each

No. S-68—**Minnow Pails;** capacity, 8 quarts; weight each, 7 lbs **$5.68**

MINNOW FLOATS.

Has conical ends and a cylindrical body, the forepart of which serves as a still water chamber. In this chamber the minnows are protected from the lashing of the water. The rear of body is perforated all around to allow a constant flow of fresh water, the air chamber allowing a supply of fresh air to enter at the same time A ballast at the bottom keeps it right side up.

Each

No. S-160M—**Minnow Floats;** galvanized steel; 30 inches long; weight, 3½ lbs. **$3.00**

SUBMARINE.

Being pointed at both ends, this bucket rides at an even keel at all times. The ends being air chambers causes it to be submerged at all times up to the air courses, raising the lid brings the minnow to the top of the water. When this lid is released, the screen drops and the bucket is locked.

Each

No. S-260—**Minnow Floats** **$3.50**

MINNOW TRAPS.

GETZ'EM.

Will not rust, break or come apart. Weight, 15 ounces. All transparent parts are made of Pyralin. The float at end of suspending cord is merely to locate the trap, in case of accident, and not intended to sustain the trap, which of course should go to the bottom.

Directions for setting trap. The door to be placed up stream when used in running water.

Each

No. S-G—**Minnow Traps** **$4.00**

SURE CATCH.

The most ingenious device ever invented for catching minnows. Guaranteed to do the work. Made of best screen wire, 1/5-inch mesh and sheet steel, galvanized and practically indestructible. The two halves nest together when not in use and, therefore, they ship compactly.

Each

No. S-20—**Minnow Traps;** 18 inches long; 10 inches greatest diameter; weight each, 2½ lbs. **$1.60**

COLT TARGET PISTOLS

SINGLE SHOT CAMP PERRY MODEL

A .22 caliber, single shot pistol, superior in grip, balance, action and accuracy. The result of many years of experiment, consultations with the leading experts of the country and exhaustive factory and practical tests in the hands of Comp Perry shooters, Olympic team members and individuals in actual match work.

SPECIFICATIONS

Cartridge—22 Long Rifle.

Barrel—10 in., especially chambered to insure accuracy.

Length Overall—13¾ in.

Weight—34½ ounces.

Sights—Bead or Patridge style. Front adjustable for elevation, rear adjustable for windage. Sighting radius 9½ in.

Action—Hand finished, light trigger pull, clean and smooth with no "back lash." Trigger and Back Strap finely checked to prevent slipping.

Finish—Full blued with checked walnut stocks. Frame edges mechanically stippled, with flat top and sights matted to prevent sun glare or light reflection, thus eliminating the necessity of "smoking" the sights to obtain clear, sharp definition.

No. C8022B—22 Long Rifle caliber, Patridge style sights, w't 34½ oz.....each $72.45

No. C8023B—22 Long Rifle caliber, Bead sights, w't 34½ oz.....each $72.45

COLT AUTOMATIC PISTOLS

WOODSMAN MODEL

No. C22B—22 long rifle rim fire caliber, 10 shots, 6½ in. barrel, blued finish, checkered English walnut stocks, adjustable partridge front and rear sights, hammer length over all 10¼ in., w't 23 oza.....each $58.00

Chambered for 22 Long Rifle Rim Fire Cartridges, either Semi-Smokeless or Smokeless.

No. C122—Extra Magazines, 22 long rifle rim fire caliber, for No. C22B pistols.....each $4.00

The "Woodsman," as its name implies, is an ideal companion for the outdoor man—the hunter, the trapper, the hiker, camper or tourist, furnishing a large measure of protection and sport.

With its long barrel, light trigger pull, splendid balance and adjustable target sights—the front sight adjustable for elevation and the rear for windage—it possesses all the advantages of a single-shot target pistol, with automatic action in addition, obviating the inconvenience of reloading for each shot and allowing rapid fire and snap shooting.

The pistol has a slide lock safety which when the hammer is cocked may be pushed upward, thus positively locking hammer and slide. This cannot be done when the hammer is down. The safety acts as an indicator, showing whether or not the arm is cocked.

Hibbard Hardware for Hard-wear

AUTOMATIC PISTOLS

COLT

The Action of All Colt Automatic Pistols is Automatic, Except that the Trigger Must Be Pulled to Fire Each Shot, the Cartridges Being Supplied from a Detachable Magazine, Inserted in the Handle of the Pistol; After the Pistol is Charged With a Filled Magazine, One Opening Movement is Made by the Hand, Bringing the First Cartridge into the Chamber; On Pulling the Trigger the Cartridge is Fired, the Empty Shell is Extracted, and a New Cartridge Loaded Into the Chamber, All These Operations Taking Place Automatically Without Any Manipulation of the Arm; This Automatic Operation of the Pistol is Effected By the Recoil of the Moving Parts, and, As a Consequence, the Recoil is So Absorbed in Being Utilized That It has No Disturbing Effect; The First Shot Can Be Discharged More Quickly Than from Any Arm Made, as This Pistol Can be Carried with Perfect Safety While the Hammer is At Full Cock

POCKET MODEL

Hammerless

Safety—Besides the Safety in the Action, Which Does Not Permit Hammer to be Released Unless Action is Fully Closed, this Arm has Two Additional Operating Safeties.

(1) The Slide Lock Indicates When the Arm is Cocked and, when Engaged in the Slide Cut, Disconnects the Trigger from the Operating Mechanism but Can be Readily Drawn Down by the Thumb When One Desires to Shoot.

(2) An Automatic Safety, also Acting as an Indicator, Locks the Action Until the Handle is Firmly Grasped when Pulling the Trigger,

It Will Thus be Seen that Here are Two Indicators Showing When the Hammer is Cocked; and There are Two Safeties, Either of Which is Absolutely Positive, One of Which is Automatic.

CAMP PERRY MODEL

This New Camp Perry Model is the Result of Many Years of Experiment; this Pistol has been Subjected to Practical Tests in the Hands of Camp Perry Shooters, Olympic Team Members and Individuals in Actual Match Work. This Model is Built on the Lines of the Well-known Colt Officer's Model Revolver, Hence a Shooter Who Desired to Use Both a Caliber 38 Revolver and a 22 Pistol May Do So Without Change of Grip or Style of Holding. Full Blued, Checked Walnut Stocks; Frame Edges Mechanically Stippled, with Flat Top and Sights Matted to Prevent Sun-glare or Light Reflection, thus Eliminating the Necessity of "Smoking" the Sights to Obtain Clear Sharp Definition; the Sights are Either Bead or Partridge Style as Desired; Front Sight Adjustable for Elevation; Rear Sight, with Adjustable Screw, Adjustable for Windage; Sighting Radius, 9½ inches. The Action is Hand Finished, with Trigger Pull; Light, Clean and Smooth with No Backlash; Trigger and Back Strap Finely Checked to Prevent Slipping.

22 Caliber; Shoots the Standard 22 Long Rifle Cartridges; Length of Barrel, 10 inches, Especially Chambered to Insure Accuracy Demanded by Experts, Length Over All, 13¾ inches.

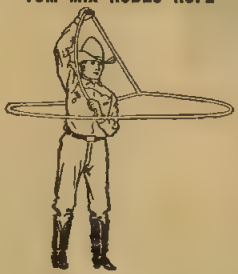
LOOSE

TOM MIX RODEO ROPE



Lariats to be used for spinning purposes must be made from a material that is of proper weight and firmness. It should permit a certain number of twists to accumulate and the honda must be made exactly right so as to give the rope the proper balance.

Tom Mix Rodeo Ropes, for spinning purposes, are guaranteed to be absolutely satisfactory. The material and the way it is made has been developed through the assistance of the best ropers in the country. While it is not difficult to learn the simpler tricks of rope spinning if you have the proper rope, it is impossible to master them with lariats unsuitable for the purpose.

Nos.	C88	C98

ROMORT

All Connections at All Times are Off the Ground—Kept Clean—and Have Maximum Life.

Do Not Impede Traffic When Not in Use Hinged Arm Holding Hose Stands in Vertical Position. Return of Arm is Automatic

A Governor Controls Return of Arm Preventing Damage That Would Otherwise Result From Whip Action to Hose. Arm Returns Slowly but Positively

All Tires on the Car May be Inflated Without Necessity of Moving the Car. Water Likewise May be Placed into Radiator. Radius of Action, 23 feet.

The Heads of All Models are Constructed to Permit Use in Any Direction. May be Mounted on Oasis Serving Several Cars at a Time.

Air Passage Direct from Base of Station to Tire Valve Without Use of Packing There are No Moving Joints to Allow Air Leaks.

ROMART Valves and Connections Used Throughout.

All Air, Water and Lighting Lines Conveniently Connected in the Base Where a Large Hand Hole is Provided.

The Air Hose is Guaranteed by its Makers to Withstand 500 lbs. Pressure.

Model SG

Model "SG" Designed to Have All Benefits of Electrically Lighted Head and Still be Free from Danger and Expense of Breaking Glass Globes. The Drum Shaped Head is Made of Heavy Gauge Metal and Attractively Embossed Letters are Set Out Upon an Enameled Background; a Special Advertising Feature and Invitation to the Passing Motorist. The Metal Side can be Easily Removed in Case of Bulb Replacement Being Necessary. The Governor Requires No Attention. Hose May be Drawn Down in Any Direction. Height to Top of Arm is 13 feet; Diameter of Base is 14 inches; Diameter of Head is 11½ inches; Width of Head is 6 inches.

Each

No. SG1—Air Only; No Water; No Light; Shipping Weight Each, 175 lbs. $90.00

✣No. SG2—Air and Water; No Light; Shipping Weight Each, 175 lbs. 96.00

✣No. SG3—Air Only; With Light; No Water; Shipping Weight Each, 175 lbs. 106 00

✣No. SG4—Complete for Air and Water, With Light; Shipping Weight Each, 175 lbs. 114.00

Crated

Model SHA

Model "SHA" Hose Arm Operates in Any Direction; Is Governor Controlled and After Use the Hose Arm Returns to Vertical Position. Connections Always Off the Ground; No Moving or Packed Joints in the Air Line; No Air Leakage.

A Hand Hole is Provided in Base for Access to Connection; Air Hose Reaches 22 feet in Any Direction; Water Hose Reaches 7 feet in Any Direction. Height of Station, 15 feet; Height to Top of Main Column, 6 feet 6 inches; Diameter of Stand Pipe, 2½ inches; Diameter of Base, 14 inches; Painted Red; Trimmed Black.

Each

✣No. SHA1—Air Only; No Water; No Light; Shipping Weight Each, 190 lbs. $77.00

✣No. SHA2—Air and Water; No Light; Shipping Weight Each, 190 lbs. 90 00

Crated

AIR AND WATER STANDS

CURTIS

COLUMN TYPE

No Oil Checks, No Counterweights No Clock Spring to Crystallize and Break, No Swinging Hose to Blow or Whip Around and be Dangerous to Persons Standing Near by, or to Glass Windshield or Finish of the Car.

Complete with 20 feet Air Hose, Chuck and Globe.

Each

No. CH—Column Type, Without Water Connection; Weight Each, 240 lbs. $122 00 122.00

No. CHW—Column Type, With Water Connection; Weight Each, 240 lbs. 128 00 128.00

One in a Crate

LOW TYPE

Same as Above, Only Low Type.
Complete, With 20 feet of Air Hose, Chuck and Globe.

Each

No. CL—Low Type; Without Water Connection; Weight Each, 225 lbs. $123 00 122.00

No. CLW—Low Type; With Water Connection; Weight Each, 225 lbs. 128 00 128.00

AIR AND WATER STANDS

MARQUETTE

AIR TOWER

Gives Service that Builds Business

Provides Better Air Service by Keeping Hose Clean, out of Dirt. Hose Always Hangs Straight, Without Kinks, Ready to Pull Down at any Angle, and has an Air Service Radius of 16 feet.

Main Post of 2½ inch Iron Pipe, on which is Mounted a Righting Spring that Supports the Air Service Pipe and Hose. The Base is 11 inches in Diameter.

Kinking or Rupturing of Air Hose at Top of Tower is Eliminated by a Coil Spring which Protects the Hose in a Down Position. Equipped with Standard Automatic Air Valve and Clamps.

The Marquette is Speedy, Extremely Flexible and has no Whipping Action. It Saves the Hose and has Nothing to get Out of Adjustment.

SPECIFICATIONS:

Extreme Height	12 ft. 6 in
Height of Main Post	6 ft. 2 in.
Diameter of Post (2½ inch Pipe)	3 in. approx.
Diameter of Base	11 in.
Height of Base	10 in.
Radius of Air Hose Service	16 feet
Angle Service	360°

Each

✣No. AT1—For Air Only; Shipping Weight Each, 111 lbs. $80 00

✣No. AT2—For Air and Water; Shipping Weight Each, 111 lbs. ... 90.00

Crated

HOW TO REFINISH AN AUTOMOBILE WITH ZAPON—(Continued)

5. SURFACING:

Zapon Finishing Enamels are Hard, Tough, Durable and Resistant to Abrasion. Therefore an Enormous Amount of Time, and Labor Would be Required to Sand Down a Smooth Surface Showing No Imperfections From Metal if Attempts Should be Made to Carry Out the Sanding and Smoothing Operation on the Finishing Coats. Zapon Auto Sand Surfacer is a Material Which is to be Applied After the Priming and Puttying Operations in Sufficient Quantity to Fill Up All Remaining Small Imperfections in the Metal.

It Has Been Designed Especially to Produce Filling Qualities, Combined with Ease of Sanding.

(A.) Application of Surfacer:

The Can of Zapon Auto Sand Surfacer Should be Thoroughly Agitated Before Use. A Stick Should Always be Used to Probe to the Bottom of the Can to Make Sure That All the Pigment is Mixed Into the Surfacer.

Zapon Auto Sander Surfacer is Prepared for Spraying by Mixing 1 Part of Zapon Auto Thinner with 1 Part of the Sand Surfacer. The Proportion of Thinner May be Varied, Depending on the Type of Spray Used.

About Twelve (12) Pints of the Thinned Surfacer is the Maximum Amount Required for Surfacing the Car. In Cases Where the Metal Surface is Very Smooth, Only Half of This Will be Needed. The Surfacer Should be Sprayed on in Successive Coats Until all the Imperfections and Scratches Have Been Filled. Where the Metal is Rough, More Coats are Necessary. All Parts of the Car Should Have Sufficient Surfacer so that the Sanding Operation will produce a Smooth, level Foundation Without Cutting Into the Metal Primer. The Application of Zapon Sand Surfacer will Require About One Hour.

After the last of the Zapon Sand Surfacer has been applied, the car Should be Allowed to Dry at Least One Hour Before Sanding.

B. Sanding:

The Following Materials are Required for the Sanding Operation:

1. A Pail of Water.
2. A High Grade Sponge, Free From Coral or Gritty Matter.
3. A Good Chamois Skin.
4. Sandpaper of the Following Qualities:
   240—Manning Speed Grits, or 5-0 Wet or Dry Sand Paper; (or equivalent)
   320—Manning Speed Grits, or 7-0 Wet or Dry Sand Paper; (or equivalent)

Wet the Surface Thoroughly with Water, by Means of a Sponge. With the 240 Manning Speed Grits or Equivalent, Sand Until Imperfections are Obliterated, Using Plenty of Water and Wiping Off Frequently with the Chamois for Inspection. **Do Not Sand Through the Primer.**

After the Whole Car Has Been Treated in This Manner, Repeat, Using 320 Manning Speed Grits or Equivalent. The Sanding will Require Approximately Four Hours. In the Sanding Operation Make Every Effort to Obtain a Surface as Nearly Perfect as Possible Before the Tough Finishing Coats are Applied

(C) Washing:

After the Sanding Operation, the Car Should be Thoroughly Washed to Remove All Loose Material. Use a Brush Around Mouldings and in Places Where the Sponge and Chamois are Not Effective.

The Car Should be Blown with a Strong Blast of Air to Remove All Water from Seams and Crevices, Especially Between the Body and Dust Pans and Behind Mouldings. The Finishing Enamel Should Not be Applied Until the Surfacer is Thoroughly Dry and Free from Water.

6. COLOR COATS:

(A) Application of Zapon Auto Enamel:

Stir and Agitate the Auto Enamel Thoroughly. Zapon Auto Enamel is Prepared for Spraying by Mixing one (1) Part of Auto Thinner and One (1) Part of Auto Enamel. About Twelve (12) Pints of Thinned Auto Enamel is Sufficient for Giving the Color Coats to the Car. The Entire Quantity Should be Used in Putting a Uniform Covering on the Surface to be Finished. This will Require About One and a Half Hours.

The Color Coats Should be Allowed to Dry Over Night Before Further Treatment.

(B) Sanding: Using the 240 and 320 Manning Speed Grits or Equivalent and Proceeding as Described Under Paragraph No. 5-B, the Car Should be Sanded Until the Surface is Smooth and Free from Imperfections Produced in the Spraying.

(C) Pumice Rubbing: Now Rub the Car with a Half inch Felt Pad, Water and FF Pumice Until Sandpaper Marks are Removed.

(D) Rottenstone Rubbing: The Surface is Rubbed with Rottenstone and Water to Obtain a Final Polish.

A Higher Polish Than is Obtained by the Above Method May be Obtained by Using Any One of the Many Cutters and Polishes Now on the Market for this Purpose. The Entire Time Required for the Final Rubbing and Polishing is About Eight Hours.

7. FINISHING OF WHEELS:

(A) Metal Disc Wheels: Metal Disc Wheels Should be Finished in the Same Manner as the Body.

(B) Wire Wheels: Wire Wheels are Sprayed with One Coat of Zapon Undercoat and this Treatment Followed Up with Sufficient Zapon Auto Enamel to Produce the Desired Finish.

(C) Painted Wooden Wheels: Painted Wooden Wheels Should First be Sanded Smooth, Then Sprayed with One Coat of Zapon Undercoat to Protect the Paint from the Action of the Enamel. The Undercoat Should be Allowed to Dry Over Night Before the Application of the Subsequent Coats.

If the Surface is Not Sufficiently Smooth, Apply Zapon Sand Surfacer and Sand Smooth, or Else Spray with Sufficient Auto Enamel to Give the Desired Finish.

8. CHASSIS FINISHING:

The Chassis, Having Been Thoroughly Cleaned, Freed from Oil, Grease, Etc., is Sprayed with Any Good Chassis Enamel.

NOTE—For Zapon Brushing Lacquer See Household Section of Catalog

AUTOMOBILE LIFTS—CURTIS ROTATING

Oil Locked

With Both Free wheel and Roll on Types, the Oil Locked Valve Makes it Possible for the Same Air that is Used to Lift the Car to be Used also for Spring Spraying, Operation of Alemite Gun, Etc., Without Affecting Position of Lift An Exclusive Curtis Feature.

The Installation Expense is Nominal. The Cylinder is Buried in Concrete. Use of Air is Very Economical; You Can Operate With Small Compressor.

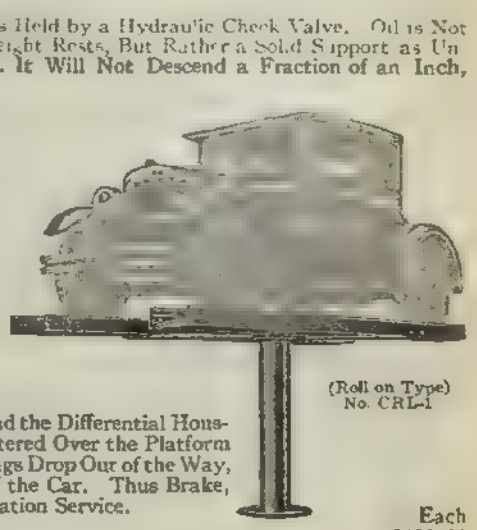
Saves Time With Safety

The Curtis is a Hydraulic Lift. The Entire Load is Supported on a Column of Oil, Not Air and is Held by a Hydraulic Check Valve. Oil is Not Compressible Like Air. Therefore it Does Not Supply Merely an Unstable "Cushion" On Which the Weight Rests, But Rather a Solid Support as Unyielding as Steel or Cement. The Curtis Lift, Once Raised, is Definitely and Solidly fixed in Position. It Will Not Descend a Fraction of an Inch, Except by the Deliberate Choice of the Operator. Hence the Term—"Oil Locked."

Specifications

The Curtis Rotating Lift Consists of 12-inch Diameter Cylinder, 10½-inch Diameter Piston Rod, Platform of Either the Roll-On or Free-Wheel Type, Oil Storage Tank with Filling Plug, Gauge and Vent Cock, Two Operating Valves and Air Gauge, One Safety Foot-Operated Oil Check Valve, One Socket Wrench, for Packing Gland, and Bucketholder for Draining Crank Case. Shipping Weight, 1920 lbs.

(Free Wheel Type) No. CRL-2



(Roll on Type) No. CRL-1

No. CRL-2 Free Wheel Type

The Free-wheel Type Platform Lifts the Car by the Front Axle and the Differential Housing. Guide and Stop Castings Insure the Car Being Automatically Centered Over the Platform Before Lifting. When in the Upper Position These Guide and Stop Castings Drop Our of the Way, Permitting Free Rotation of the Wheels and Easy Access to All Parts of the Car. Thus Brake, Wheel and Tire Service are Readily Rendered, as Well as Chassis Lubrication Service.

Each

No. CRL2—Free Wheel Type; Weight Each, 1920 lbs. $800 00

No. CRL-1 Roll-On Type

Car is Driven Directly on Run-way Beams. Ends of the Beams are Bent Downward so that the Wheels Roll on Easily. Chocks Block the Car Securely in Place. Instant Access is Given to Every Bearing on the Chassis.

Each

No. CRL1—Roll-On Type; Weight Each, 1920 lbs. $600.00

CURTIS COMPRESSORS, CAR WASHERS, ROTATING LIFTS

CURTIS ROTATING LIFTS

Roll-On or Free Wheel Type

Oil-locked, full safety, no air in cylinder, safety retard valve governs lowering speed independent of operator even though supply line might break or be removed. Made roll-on or free wheel type. Flush type installation, no pit nor recess.

RL-1—Roll-on type, wgt. 1810 lbs. $300 00
RL-2—Free wheel type with guides, 1600 lbs. . 300.00
RL-3—Free wheel type, no guides, 1525 lbs. . . 275.00

SELF-OILING HYDRAULIC WASHER

Rugged three cylinder, slow speed, self-oiling pump. Externally packed. Price includes 8 feet of 1-inch intake hose with strainer and 25 feet of ½-inch discharge hose for each gun.

MAJESTIC MILK AND PACKAGE RECEIVER

Every housewife wants this modern practical home convenience—the Majestic Milk and Package Receiver. And every woman can have it, whether her home be old or new.

The Majestic Milk and Package Receiver is, in effect, an automatic, theft-proof compartment placed in the wall of your kitchen or entry to receive milk and packages delivered from the outside.

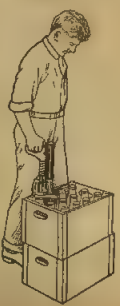
The deliveryman deposits his packages in the Receiver and closes the door which locks automatically. You remove the deliveries from the inner door at your convenience and then pull the extended chain which unlocks the outside door for further deliveries.

The Majestic Milk and Package Receiver consists of two cast iron frames and doors connected by an adjustable steel body. A wall opening 12 inches high and 14 inches wide is required for installation. Even when installed in a frame house with a 6-inch wall the Receiver will hold six quart bottles of milk or packages occupying equivalent space. Additional capacity may be obtained by using casings to extend the Receiver body.

Sizes and Prices

No. H1—For wall thickness 5 to 8 in., w't 50 lbs., per dozen $180.00

No. H2—For wall thickness 8 to 14 in., w't 70 lbs., per dozen $180.00



R & A HAND MILK BOTTLE DAPPER

A necessity for sanitary sealing of milk bottles. Easy operating, never skips a cap. In general use in dairies, restaurants and lunch rooms.

No. H739—Made for standard No. 2 caps, and set for .040 thickness, can be adjusted for .032 to .042 thickness, shipping w't 25 lbs. each *$40.00*

WATER FILTERS

ZANESVILLE
STONE FILTER

The Process of Filtering is by Percolation Through a Porous Natural Stone from the Upper to the Lower Jar Simply by the Force of Gravity which is Nature's Own Process of Filtering.

The Filtering Discs are a Natural Stone Quarried from the Earth, which is of Such a Nature That it Does Not Allow the Filth it Extracts to Enter its Pores, but Retains All Impurities Upon its Surface Whence They are Removed in Cleaning, which is as Simple an Operation as the Cleansing of an Ordinary Jar or Pail. Filter Disc can be Cleaned in Two Minutes Ready for Use, when it is the Same as New.

Every Part is Easily Gotten at for the Purpose of Cleansing.

Filter is All Stone and There is Nothing to Rust and Corrode or Become Foul and Never Become Water Soaked, the Water in Them Retaining its Sweet, Natural Taste.

They Have Been Fully Tested and Their Merits Established as Possessing Every Practical Adaption for Family Use, Rendering the Most Impure and Foul Rain, River or Hydrant Water Free from All Organic Matter, Gases, Taste or Smell.

MINNEAPOLIS—Falls Hardware Co., 4008 Minnehaha Ave., is erecting a one-story addition.

FULDA—The old hardware store of John Hyslop's has been incorporated as Hyslop Hardware Co.

The Use of Wall Paper For Show Cards

(Continued from page 51)

as you would hold a lead pencil, keeping the fingers well down on the brush handle. This will enable you to keep a steady hold on the brush and help to control each stroke better. Do not grip the brush too tightly. This is a common mistake so many beginners make at first because it will surely make the hand shake and eventually bring on the "writer's cramp."

The following exercises are very important before anything else. First make six upright strokes, six horizontal, six oblique, six right angle, six crescent or semi-circle strokes. These are the principal strokes used in the formation of the numerals.

The proper use of show cards will eliminate a good deal of price quoting and increase sales. Some people hesitate to ask the price of merchandise these days. Goods marked in plain figures are sold more readily and save time and mistakes.

Gilbert
1807

Gilbert's No. 4614

Mechanical Singing Bird in Gilt Cage. Cage measures 22 inches high and has gilt metal base and comes complete with one and three singing birds that are mounted on perch and covered with real feathers. The single birds come all in canary colors while the three birds in the cage are assorted colors. When wound these birds produce sounds that are so realistic and true that it is impossible to distinguish their artificial notes from the sound of a real live canary. This article is made in France by the most skilled workers, a truly remarkable item that makes a wonderful show piece. Has good spring clock movement and comes complete with key, packed each cage in wooden container.

No. F79N1. One Bird. Each $117.00
No. F79N3. Three Birds. Each 159.60

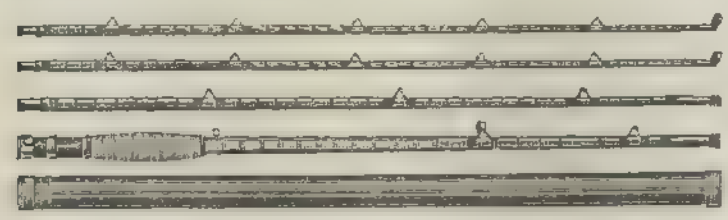
(Patent Applied For)

All Diamond Ruled Fly Rods Are Made from Highest Quality Selected Bamboo Long Seasoned Triangular Strips Glued into a Solid Shaft, Leaving the Strong Enamel on the Outside of the Bamboo Intact and Securing the Full Strength of the Wood, with Every Strain no Matter from Which Direction.

The Special Patented Feature of These Rods is the Idea of the Ruled Measure Right on the Rod for the Legal Protection of the Fisherman at the Moment the Fish is Caught. This Permits the Saving of Many Undersized Fish, Improves the Value of the Rod to the Fisherman as it Gives Him Accurate Knowledge of the Size of the Catch.



EXTRA FINE QUALITY SPLIT BAMBOO FLY RODS
With the Ruled Measure

Three Piece and Extra Tip; Cedar Reel Seat; Solid Cork Grip; German Silver Mountings and Serrated Ferrules; Bronze Steel Snake Guides, Agate First Guide and Tips; Wound with Red and Black Silk in Clusters and at Close Intervals; Finished with High Grade Varnish.

COMBINATION CULTIVATORS AND SEEDERS

STANDARD
A Drill and Hill Seeder, Double or Single Wheel Cultivator

Will Plant Almost Any Kind of Garden Seed in a Continuous Drill, or in Hills 6, 8, 12 or 24 inches apart.

Wheels are 16 inches in diameter with a tire 1¼ inches wide. Seeder is Driven with a Steel Chain; The Hopper Holds Two Quarts.

While the Seed Index is Easily Adjusted, it is Fastened so it Cannot Move While in Use; A Rotary Brush Made from Heavy, Stiff Chinese Bristle Furnishes a Regular Even Flow of Seed Through the Seed Plate; The Opening Plow or Shoe is so Designed as to Deliver the Seed to the Ground in a Thin Narrow Row.

This Combination Fills Almost Every Requirement for Garden Seeding and Cultivating; As a Seeder the Tool is Not Complicated; It is Easy to Understand and Operate; It Only Requires a Few Minutes to Change from a Seeder to a Cultivator; As a Seeder it Opens the Furrow, Drops the Seed, Closes the Furrow, Packs the Earth and Marks the Next Row. Instructions for operating are packed with each tool.

Each

No. 9—Equipped with Four Shovels, One Pair Hoes, One Pair Diamond Mould Board Plows, Two Leaf Guards and Wrench, Weight Each, 48 lbs. **$27 30**

One in a Carton; Handles Bundled

SEED SOWERS

MIDGET

Will attach to any "Standard" Single Wheel Cultivator, or to Almost any Make of Single Wheel Cultivator Having 5½ Inches or More Space Between the Shank and Wheel; It Attaches with One Bolt in the Same Place and Same Manner as the Cultivating Tools; Will Drill Almost any Kind of Garden Seed from the Smallest up to Peas and Beans. While the Hopper Holds One Pint, it Will Handle and Drill Out Clean a 5c Package of Seed Just as Well as a Larger Amount. Shoe is Adjustable for Any Depth, Coverer Swings so that Small Clods or a Little Trash Does Not Interfere with Its Work.

For Use in Close Quarters, in Beds or Against a Fence, or Where It Is Not Convenient to Use the Seeder Attached to a Cultivator Frame, a short Wood Handle can be fitted to the Seeder and used in this Manner. The Hopper is made of Gray Iron the Coverer Malleable, and the Seed Tube Brass; has Wire Wheel, 8 Inches High, with Tire 1¼ Inches Wide.

Each

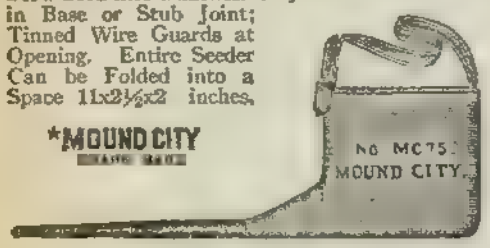
No. 1—8x5½ inches; Weight Each, 6 lbs. **$6.40**

One in a Box

SEED SOWERS

Sows Any Kind of Grass Seed or Grain and will Evenly Distribute Fertilizer Plaster, etc.

Distributes Seed by Swinging of Funnel. Gives Control Over Seed on a Circle of 8 feet Before it Leaves the Tube and the Wind Cannot Blow Seed into Bunches. Adjustable Feed Gate in Base or Stub Joint; Tinned Wire Guards at Opening. Entire Seeder Can be Folded into a Space 11x2½x2 inches.



Horn

Half Bushel White Duck Bag with 11 inch Duck Extension Funnel, Attached to Three Section Tin Distributing Tube 22 inches Long, 1¼ inches at Base, ¾ inch at Mouth; The Tin Funnel is Collapsible for Convenience in Storing or Carrying Back and Forth.

Per Dozen

No. MC75—Weight Each, ⅝ lb.; Weight per Dozen, 7½ lbs.....$16.00

One Dozen in a Wood Box

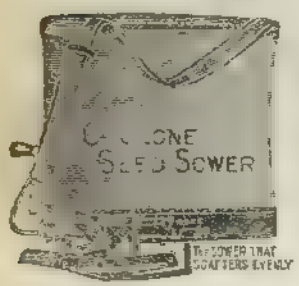
CYCLONE



Sows all Kinds of Seeds or Grain and Distributes Plaster, Fertilizer, etc., Evenly.

Points of Advantage are its Slope Feed Board with Oblong Hopper, Oscillating Feed Plate, which Does Not Allow Seed to Clog; Supplied with an Interlocking, Double Flange, Non-Solder Joint Distributing Wheel and a Self-acting Seed Adjustment to Shut Off Flow of Seed Instantly.

Hardwood Base, 15¾x6½ inches; with Cross Brace and Bent Supporting Arm, Pointed Rod; Four Section Riveted Tin Distributing Wheel, 10½ inch Diameter; Adjustable Feed with Spring Stop; Self Agitating Feed Plate; Regular Rotary Malleable Iron Gear Wheel, 3¼ inch Diameter, Steel Rod Crank; Hardwood Handle; Half Bushel White Duck Bag, with Wide Shoulder Strap.

Per Dozen

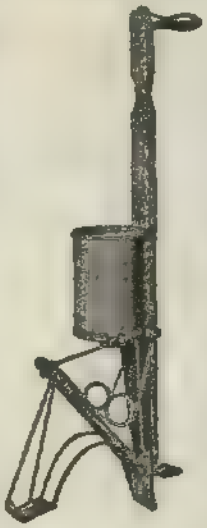
No. C—Weight Each, 3 lbs.; Weight per Dozen, 40 lbs.....$36 80

Third Dozen in a Carton

CORN PLANTERS

Hand Planting Produces Larger and Better Crops than Machine Planting; Every Bit of Available Soil is Planted and Seed Deposited More Safely and Without the Many Skips Incident to Machine Planting.

ACME ROTARY AUTOMATIC



The Corn is Dropped By a Rotary Disc, Containing Seven Pockets, Each Pocket Starts and Stops in the Corn Seven Times Before Discharging—It Has Seven Chances to be Filled Evenly and Regularly.

The Pockets in the Disc are Adjustable For Different Numbers and Sizes of Kernels, This Adjustment is Made by a Thumb Nut Under the Bottom of the Hopper; The Hopper is in Line With the Center; In Either Hand the Planter "Hangs" the Same. The Cover of the Hopper is an Ever Ready Cup to be Used in Filling; The Spring Steel Cut-off Assures Constant Regularity of Dropping; Every Part is Readily Removable and Accessible, Repairs May be Obtained at Any Time.

Length, 33½ inches; Hardwood Stock, Bolted Handles, Pressed Steel Hopper Size 4½x7 inches; Capacity, 2 quarts; Steel Conveyor Depth Gauge, Dump Foot and Cut-off, Cast Frame or Basket, Adjustable Cast Seed Plates, Clock Spring Steel Cut-off, Double Coil Main Spring.

Per Dozen

No. AR—Weight Each, 4⅞ lbs.....$45 00

Half Dozen in a Crate; Weight per Crate, 50 lbs.

ECLIPSE ROTARY

Has a Positive Feed With Four Changes of Discs; Extremely Simple and Easy Working. Discs are Marked Nos. 1, 2, and 3 For Planting One, Two or Three Grains at a Time; Also One Marked No. S For Planting Broom Corn.

Length, 33 inches; Stamped Sheet Steel Sides, Natural Oiled Finish, Bolted Handles, Sheet Metal Hopper 4x9 inches; Capacity, 2 quarts, Sheet Metal Conveyor Tube, Steel Foot Iron, Metal Parts Black Japanned, Coppered Steel Wire Spring.

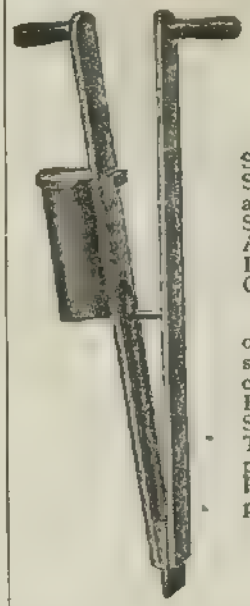
Per Dozen

No. 2—Weight Each, 7½ lbs.....$39 00

Half Dozen in a Crate; Weight per Crate, 60 lbs.

CORN PLANTERS

Hand Planting Produces Larger and Better Crops than Machine Planting; Every Bit of Available Soil is Planted and Seed Deposited More Safely and Without the Many Skips Incident to Machine Planting.



PIONEER

Pressed Steel Slide, Spring Steel Cut-off, Stamped Steel Hopper, and Hardwood Sides. The Steel Spring Cut-off Assures Regularity in Dropping of Seed, it Never Cracks a Kernel.

Conveyor Tube is Made of One Piece Steel Formed so That it Cannot Become Loose; The Hopper Has Rounded Edges (The Strongest and Best Form); The Cover of The Hopper is a Deep Cup, Made For the Purpose in Dipping Up The Seed.

Length Over All, 34 inches; Finish Natural Varnish; Size of Hopper, 3x3¼x8 inches High; Capacity, 1 quart of Corn.

Per Dozen

No. P—Weight Each, 5 lbs.....$28.00

Weight per Crate, 38½ lbs.

Half Dozen in a Crate;

ACME IMPROVED

The Acme Has A Pressed Steel Slide, Spring Steel Cut-off, Stamped Steel Hopper and Hardwood Sides Accurate and Durable, The Steel Slide is Strong, Smooth and Absolutely Unvarying; The Tempered Steel Spring Cut-off is Non-wearing, Unchanging and Reliable; The Hardwood Sides Make the Planter Light Stiff and Handy; The Conveyor Tube Where the Slide Goes Through, is Formed in One Piece. The Hopper Has Rounded Edges and Its Deep Cover Which Cannot Get Loose, Form a Convenient Cup For Dipping up Seed

Length, 34 inches; Bass Wood Sides, ½x2½ inches; Bolted Handles, Sheet Steel Hopper, 3¼x8 inches; Capacity, 2 quarts; Steel Conveyor Tube, Steel Jaws Bolted on, Pressed Steel Side, Spring Steel, Cut-off Bright Vermilion Wood Parts, Green Steel Parts Varnished.

Per Dozen

No. A—Weight Each, 3⅝ lbs.....$20 50

DESIGN H

DIETZ LANTERNS

LITTLE WIZARD

THE LITTLE LANTERN WITH A BIG LIGHT

FEATURE Cold Blast "Little Wizard" Lanterns for Midsummer Sales to Campers and Cottagers. Handy size, fine appearance and a big, cheerful light make Little Wizards the outstanding choice for camp service.

Little Wizards with red globes are also widely used by municipal engineers and road building contractors for night warning duty. Get your share of this quantity business!

R. E. DIETZ COMPANY
NEW YORK

Largest Makers of Lanterns in the World—Founded 1840
Output Distributed Exclusively Through the Jobbing Trade

DIXON'S Graphite SEAL

A new and improved graphite sealing paste that fills the need for a compound especially prepared for use on screw thread, flange and gasket joints, and valves of pipe lines carrying hot or cold mineral, vegetable and animal oils, gasoline, benzine, creosote, tar, etc.

INSOLUBLE IN GASOLINE OR OILS

It quickly provides a permanently tight connection on all gasketed, threaded and flanged connections. Heat cannot burn it out—nor cold affect it.

Easy Separation

An element of lubrication is furnished by graphite content—permitting a connection to be loosened as easily as it is tightened and without damage to tools or fittings.

Safe—Easy and Economical

Simply thin with water—Free of skin irritating chemicals and acids—will not destroy nor oxidize materials to which applied. Does not discolor—contaminate—flavor or ferment.

Dixon's Graphite Seal has many applications—in the general industrial field—for automobiles—and the petroleum industry.

Your stock is not complete without this exceptional pipe joint compound. It will prove to be a ready seller and satisfy your customers' requirements.

Write for Circular No. 40-DS and also free sample for your own test.

REGULAR AND LIGHTWEIGHT SAWS IN NEW DISSTON LINE

With the new line of Disston Hand Saws you can please every customer, whether he wants a regular pattern (standard width) saw or a lightweight (ship) pattern saw.

For in the new line there are eight regular pattern saws and seven lightweight saws, all of which are illustrated here.

Because consumers are demanding both regular and lightweight patterns of the new Disston Saws, you will want to have both styles in stock.

Make up your order from this list, to insure getting the new saws in the right numbers, lengths and points.

Then send your order to your jobber, who can make prompt shipments.

D-15 Lightweight, Straight Back

Improved pattern rosewood handle. New grip, roomy and comfortable. New carving, new weatherproof finish, nickel-plated screws. Disston true-taper grind. This and D-115 are the finest hand saws on earth. Blades 24" and 26", cross-cut, 7, 8, 9, 10 and 11 point; rip made in 26" length, 5½ and 6 point.

D-115 Regular Pattern, Skew Back

Carved rosewood handle with new weatherproof finish; nickel-plated screws. True-taper grind. Blades, cross-cut, most four-point tapers. 20", 11 point only; 22", 10 point only; 24", 10 and 11 point; 26", 7, 8, 9, 10 and 11 point. Rip made in 26" length only, 5½ and 6 point.

D-12 Regular Pattern, Straight Back

Blade made narrower. Improved pattern of applewood handle, carved new weatherproof finish. Nickel-plated screws. More beauty. Disston true-taper grind. Blades, cross-cut, 20", made with 10 and 11 points, 22", 8, 9, 10 and 11 point, 24", 7, 8, 9, 10 and 11 point, 26", 6, 7, 8, 9, 10 and 11 point, 28", 7 and 8 point. Rip, 24", 5½, 6 and 7 point, 26", 5, 5½ and 6 point, 28", 5½ point.

D-12 Lightweight, Straight Back

Improved pattern of applewood handle, carved; new weatherproof finish. Nickel-plated screws. Greater beauty. Disston true-taper grind. Blades, cross-cut, 24", 7, 8, 9, 10 and 11 point; 26", 7, 8, 9, 10 and 11 point. Rip, 24", made 7 point only; 26" in 5½ and 6 point.

D-23 Lightweight, Straight Back

Improved pattern of applewood handle, carved; new grip, roomy and comfortable; new weatherproof finish. Brass screws. Greater beauty Disston true-taper grind. Cross-cut made in these lengths and points: 20", 10 and 11 point; 22", 9, 10 and 11 point; 24", 7, 8, 9, 10 and 11 point; 26", 7, 8, 9, 10 and 11 point. Rip made in 24", 7 point, and 26", 5, 5½, 6 and 7 point.

D-20 Lightweight, Skew Back

Same as D-23, except that it has skew back instead of straight back. Improved pattern of applewood handle, carved; larger hand-hole; new grip; new weatherproof finish Disston true-taper grind. Cross-cuts, 20", 10 and 11 point; 22", 10 and 11 point; 24", 8, 9, 10 and 11 point; 26", 7, 8, 9, 10 and 11 point. Rip made in 26" length, 5½ and 6 point.

D-16 Regular Pattern, Straight Back

Blade made narrower. Improved pattern of applewood handle; new weatherproof finish, brass screws. Higher polish, greater beauty. Disston true-taper grind. Cross-cuts made in these lengths and points: 20", 10 point; 22", 10 point; 24", 9 point; 26", 7, 8, 9, 10 and 11 point. Rip made only in 26" length, 5½ and 6 point.

D-16 Lightweight, Straight Back

Improved pattern of applewood handle, new weatherproof finish. Brass screws. Higher polish; more beautiful. Disston true-taper grind. Cross-cut made only in 26" length, 7, 8, 9, 10 and 11 point. Rip made 26", 5½ point.

D-8 Regular Pattern, Skew Back

Higher polish; greater beauty Applewood handle, with new weatherproof finish Brass screws. Disston true-taper grind Cross-cuts 18", 9 and 10 point, 18", 9, 10 and 11 point, 20", 8, 9, 10 and 11 point; 22", 8, 9, 10 and 11 point; 24", 7, 8, 9, 10 and 11 point; 26", 5, 6, 7, 8, 9, 10 and 11 point; 28", 5, 6, 7 and 8 point. Rip made 22", 7 point; 24", 5½, 6, 7 point; 26", 4½, 5, 5½, 6 point; 28", 4½, 5, 5½ and 6 point.

D-8 Lightweight, Skew Back

Differs from D-8 Regular Pattern in width of blade only. Higher polish, more beautiful. Applewood handle; new weatherproof finish; brass screws. Disston true-tapered grind. Made in 26" length only, 7, 8, 9, 10 and 11 point. Rip, 26", 5½ point.

D-7 Regular Pattern, Straight Back

Improved pattern of beechwood handle, new weatherproof finish; brass screws. Higher polish; greater beauty Disston true-taper grind. Cross-cut made in all lengths from 16 to 28", 16", 9, 10 point; 18", 9, 10, 11 point; 20" and 22", 8, 9, 10, 11 point; 24", 7, 8, 9, 10, 11 point; 26", 5, 6, 7, 8, 9, 10 point; 28", 6 and 7 point. Rip made in 22", 7 point; 24", 5½, 6, 7 point; 26", 5, 5½, 6, 7 point; and 28", 5 and 5½ pt.

D-7 Lightweight, Straight Back

Differs from D-7, Regular Pattern, in width of blade only. Improved pattern of beechwood handle, new weatherproof finish; brass screws. Higher polish, greater beauty. Disston true-taper grind. Made in 24" and 26" lengths only; Cross-cut, 7, 8, 9 and 10 point. Rip, 24", 7 point only; 26", 5½ point only

D-112 Regular Pattern, Skew Back

Blade made narrower, with higher polish, greater beauty. Improved pattern of applewood handle; new weatherproof finish; brass screws. Disston true-taper grind. Cross-cuts, 20", 10 point; 22", 10 point; 24", 9 and 10 point; 26", 7, 8 and 10 point. Rip made in 26" length, 5½ point only.

D-120 Regular Pattern, Skew Back

Hollow ground for clearance; no set required. Blade made narrower. Shape of teeth changed, easier to file. Disston Special Extra Slim Blunt Saw File should be used in sharpening. High in temper Carved applewood handle; new weatherproof finish; nickel-plated screws. Made in 26" length only Cross-cut 7, 8, 9, 10 and 11 point Rip, 5½ point

D-17 Regular Pattern, Skew Back

Double-duty saw; used for both ripping and cross-cutting. Also cuts well diagonally across grain. Blade made narrower. Improved pattern of beechwood handle; brass screws, new weatherproof finish. Disston true-taper grind. Higher polish, greater beauty. Made in one length of blade only—26 inches.

THESE FEATURES MEAN MORE SALES

Every saw in the new Disston line is a masterpiece of saw making—new in every feature:

Greater beauty.
Lighter blades.
Narrower blades.
True-taper grinding.
Thin, yet stiff.
Higher polish.
Striped backs on all saws.
New handle designs.
Weatherproof finish handles.
New handle tags.
Better boxes; new labels.

Display them now—they are the most beautiful hand saws ever made . . . the easiest saws to sell.

The well-known American Boy Saw is retained in the standard 20-inch length, either straight-back or skew-back, 9 points.

Published by HENRY DISSTON & SONS, INC. *Makers of "The Saw Most Carpenters Use,"* PHILADELPHIA, U. S. A., Canadian Factory, Toronto

"Baby Smiles"

A darling new baby with live rubber arms.

'Nearest to a Live Baby'

BABY SMILES! Here's a brand new kind of a doll—a smiling, chubby baby with soft rubber arms that feel so real and a pacifier for contentment. SMILES' has those marvelous eyes that flirt and go to sleep, sucking her thumb, just like a real baby; her cunning little thumb just fits into her rosy baby mouth. She wears a real pacifier to soothe her when she cries. She can clasp her hands as in prayer, she cries at the will of her mother; her face and arms are the color of real skin; her head is unbreakable, and her little hands and fingers are soft like a real baby's. She is dressed elegantly in a white dress with stockings, moccasins, and even real rubber panties. Every little girl will love "Baby Smiles" more than any other doll she has ever had. She is a big size doll nearly seventeen inches in height. She will be sent postpaid to any address on receipt of our very low price.

No. 6640. "Baby Smiles Doll." Price postage paid $5.00

"Ideal" Sleeping, Winking Doll

The Surprise Baby

She Cries, She Talks, She Sleeps, She Walks, She Winks, She Blinks.

A SENSATIONAL doll hit. If you cry, the doll commences to cry also. She will talk and say "Mamma" or cry with a real baby voice. If you hold her, she will walk with you. She winks and blinks, she will go to sleep, in fact she seems to be able to do everything except eat and drink. She is just a big, fine, darling doll, nearly eighteen inches tall, that every girl's heart is hungry for. She wants a mother to walk with her, sing to her when she cries, rock her to sleep, etc. She is quite big, too, has jointed arms and legs, real curly mohair wig, lovely dress of colored organdie material tastefully trimmed with lace, bonnet to match. Composition legs; removable shoes and stockings. Winking, blinking and sleeping eyes, and a good strong crying voice. This doll was originally intended to sell at a much higher price, but by special arrangement with the manufacturers we are enabled to offer it to our customers at a price that is an undoubted bargain.

No. 6641. "IDEAL" Sleeping and Winking Doll. Price postage paid to any address $2.50

DOMEC DOLLS

Full composition head, arms and legs. Moving eyes with lashes, sewed mohair wig, open mouth showing teeth, [illegible] organdy trimmed with ecru lace and panel insert, bonnet to match. Assorted colors. Shoes and socks.

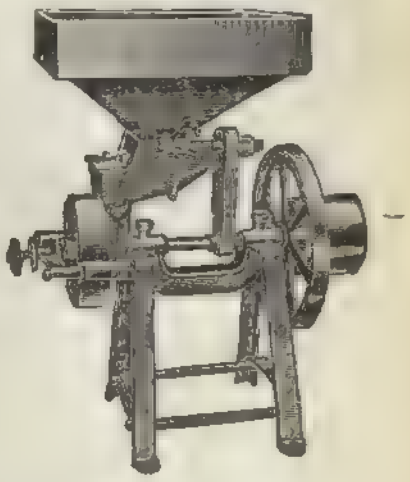
GRINDING MILLS

Power

For Grinding Stock Feed Only; Will Not Grind Grain for Flour Nor Cut Green Bone



Belt Power Grinder

A Solid Frame Supports the Shaft That Carries the Running Ring, the Ring Being at One End and Easy to Get at, and the Fly Wheel and Pulley at the Other; Grain is Admitted to the Grinding Rings by Means of a Shaker Spout that Delivers Fast When the Motion is High and Decreases as the Speed Diminishes, Which Permits the Power to Recover Itself in Case of an Overload.

This Principle Commends Itself More Especially When Mill is Operated by Irregular and Limited Power, Such as Gasoline Engine, Tread Power, etc.; There is One Stationary and One Running Ring Made of White Iron, Which is Hard and Serviceable; The Grinding Rings are Adjusted and Can be Regulated to Grind as Desired by Turning a Hand Wheel; The Head of Mill is Equipped with Safety Springs to Avoid Damage in Case Foreign Substances Accidentally Enter the Mill.

Grinding Rings—No. 6 has 5 inch, No. 7 has 7 inch, No. 8 has 8 inch Grinding Rings; A Coarse and Fine Set Go with Each Mill.

Speed—800 to 1,200 Revolutions per Minute.

Power—No. 6 Mill, 2 to 4 Horsepower; No. 7 Mill, 3 to 6 Horsepower; No. 8 Mill, 4 to 8 Horsepower.

Pulley—No. 6, 5 inch Diameter, 5 inch Face; 8 inch Diameter, 6 inch Face for Both No. 7 and No. 8 Mills.

Capacity—Grinds Shelled Grain Only at the Rate of 4 and 6 Bushels an Hour, per Horsepower; the Amount Each Mill Can Grind Depends Upon the Size of the Engine, Speed and Grade of Seed.

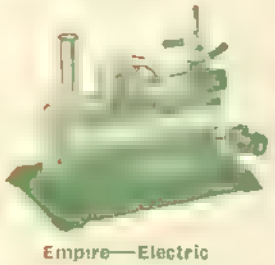
MINIATURE ENGINES

STEAM



Empire—Electric

A regular steam engine, horizontal type, with an electrical heating element to create steam. Equipped with throttle for varying speeds and a real steam whistle. Safety valve and water gauge prevent excess steam pressure. Its assembly is a seamless drawn copper boiler, a heavy cast base, strong brass running parts and steel connections and highly nickel plated. Operates on any standard light socket without transformer.

LEATHER GOODS.

ENGER-KRESS.

COIN PURSE AND BILL FOLD ASSORTMENTS.

Realizing that the average dealer is more or less handicapped by lack of space in giving the leather goods line the prominent place which it deserves, and also to display the articles in a conspicuous and attractive manner, we have decided that this can be overcome by furnishing the retailer with a counter display cabinet which will display leather goods prominently.

The display cabinet is a very neat and rich looking mahogany finished cabinet, with a glass front and has a display space of 15x15 inches on which are mounted eleven numbers of our most popular and best selling styles.

The articles displayed in the Enger-Kress display cabinet are neatly and attractively mounted and show the number and price directly below each article. The contents of the assortment are carried in the back of the cabinet and do not require any additional storage space. Each article is packed in neat individual boxes.

Enger-Kress Counter Display Cabinet FREE with contents listed below.

Here is the Lantern
that is
Out-Selling
all others
in
EUROPE!

No. 701/7". Burning time, 44 hours. Height, 15½ in. Weight, with chimney, 2.94 lbs.; without chimney, 2.27 lbs. Tinned.

THE famous Feuerhand (Firehand) Lantern—known all over Europe as the best hurricane lantern ever made—is destined to be the fastest-selling lantern in America. Customers quickly recognize the superior Feuerhand features. Feuerhand Lanterns have a thicker tin coating than any other make—are warranted *rust-proof*. Storm-proof and shock-proof. *One-piece* oil container—guaranteed not to leak. Let Feuerhand—the finest and fastest-selling lantern on the market—increase your lantern profits. Write today for information about complete line of styles and sizes. A. H. Lebmann & Co., Inc., 132 Front Street, New York

PEWTER

FLAGG & HOMAN BRAND

Established 1847

These fine old Pewter pieces are, most of them, actual revivals from the designs and tools developed by **Asa F. Flagg** and **Henry Homan more than 80 years ago**, and now reproduced by their successor, **The Homan Manufacturing Co.** The remainder are inspired by the work of early American pewterers or by English models

The Pewter productions of **Flagg and Homan** have long been sought by collectors of Pewter, and are now placed within reach of the general public with all the charm of the original designs and the sentiment connected with quaint old processes of manufacture

This is the Finest Pewter Line in America Today

Fly Fishing

A Word to Anglers

This department has, under our close and careful attention, reached an unusual degree of excellence. Our thorough knowledge of angling and fly tying enables us to present not only the best and most serviceable flies, but to make them in the proper way. In late years there has been a tremendous increase in the number of sportsmen that have taken up fly fishing for Trout, Bass, Salmon, etc.

Fly Tying as an Art

Did you ever consider the thought, skill and time involved in putting the lure and lifelike appearance in artificial Trout, Bass and Salmon flies?

(Figure 1)

(Figure 2)

(Figure 3)

(Figure 4)

To start the construction of a fly, all feathers must be sorted, such as hackle, wings and tippets. Next the body must be put on. This is done with silk on most patterns and tinsel is put on over the body in rib like fashion to give it the appearance of a real fly. See fig. 1 and 2.

Next the hackle is tied in position and then the wings are tied to the fly. See fig. 3.

The hackle is now taken up and tied. Next a waterproof solution is used to fasten the head down. This completes the operation. See fig. 4.

Then the fly is inspected and packed.

EXTRA SPINNER FLIES

*DIAMOND BRAND

TRADE MARK REGISTERED ◇ IN THE U. S. PAT. OFFICE

New "Brownie" Automatic Pistol

.22 Caliber Four Shots

Absolutely Safe and Reliable

The Simplest and Handiest Automatic Pistol Made

HERE is an Automatic Pistol that fires 22 Caliber cartridges, the cheapest standard cartridges obtainable. It is the most marvelous value we have ever presented for the money. A RAPID LOADER, CLOSE SHOOTER, HARD HITTER, it is considered by many to be superior to pistols costing more than twice the price. It is finely finished in blue steel, with black walnut grips, [illegible] It lies fine in the hand, [illegible] is [illegible] one view of simple [illegible] to [illegible] with ordinary usage. The smaller illustration on the right will show you the four bores that accommodate the four cartridges, and enable you to get a better idea of the extreme simplicity of the mechanism. There is no revolving cylinder to jam or get out of order as with an ordinary revolver. It is automatically safe. There are no external safety devices to forget, but it cannot possibly be fired except by a full stroke of the trigger, one full stroke being necessary to fire each of the four cartridges. The pistol can be loaded in but a few moments. To load, just break open the pistol by pressing on rear end of barrel catch, as in illustration, insert the four cartridges, and close by snapping barrel back into position. Nothing could be simpler. The pistol is now ready for instant use. It may be carried loaded with perfect safety. [illegible] Caliber Cartridge, long or short, may be used. [illegible] Pistol is 7½ inches long, has a 3 inch barrel, the weight is about 10 ounces. Owing to the [illegible] recoil is light and heavy enough to make shooting [illegible] pleasure. It gives all the effect of a [illegible] and it is just the thing [illegible] for [illegible] protection.

No. 8047. HOLSTER, CLOSED TOP, WITH FLAP, FOR "BROWNIE" PISTOL 1.50

THE "FOUNTAIN PEN" PISTOL

The Very Latest in Firearms. SURE, SAFE, RELIABLE.

Uses Standard .22 Caliber Cartridges.

THE "FOUNTAIN PEN" PISTOL is our latest offer to the American public. As our illustration shows, it is exactly like a pointed fountain pen in appearance, even to the clip to fasten in the pocket. Yet although small in size it is just as effective as the most expensive arm you can buy. There is no complicated mechanism to get out of order. It is simplicity itself. To load you merely unscrew the barrel and insert a cartridge. Screw the barrel on again and the pistol is ready for use. To shoot, pull trigger, and stroke on top of the pistol with the thumb. It engages the trigger. Firing is accomplished by pressing on the button just below the knob. Uses .22 Caliber short cartridges. Blank cartridges can also be used. The pistol is strongly made of the finest steel, 7 inches long, 3 inch rifled barrel, weighs but 2½ ounces, blue steel finish. Can be sent only by Express.

No. 9075. "FOUNTAIN PEN" PISTOL, Price, by Express only $6.00
No. 9052. .22 CAL. CARTRIDGES. Price per 100 1.00

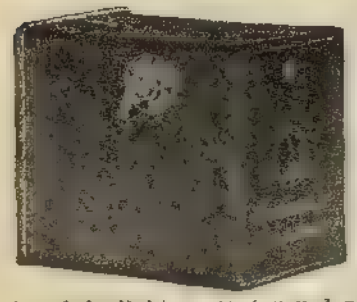
NOW BOYS—HERE'S YOUR CHANCE!

GENUINE BINGO CAMERA FOR ONLY $1.55!

TAKES PICTURES 1⅝x2½



Daylight Loading **Automatic Shutter**

Excellent Meniscus Lens View Finder

Though this apparatus is so marvellously cheap, it is quite efficient, and just the thing for beginners in photography. It is not a toy, but a genuine **Bingo Camera,** made by the well-known Ansco Company, that can be depended upon to take good pictures, and to produce the very best and pleasing results. It takes a picture 1⅝x2½ inches, is fitted with the best quality **Meniscus Lens, an Automatic Shutter,** and **View Finder.** It uses the standard size roll film cartridge containing eight exposures, and this may be put in the camera and taken out in broad daylight, so that you don't have to go into a dark room every time you want to load the camera. Anybody can make good pictures with this camera. It is so small and compact it is just the thing to carry with you to "snap" pictures of your friends, sports, etc. with. Sent by **Prepaid Parcel Post,** packed in a strong box, with book of instructions on receipt of amount.

No. 2528. Bingo No. 0 Camera (Size of Picture 1⅝x2½). Price, Postpaid... $1.55

Here Are Two More of the Popular Bingo Cameras!

THESE TWO SIZES FOR 2¼x3¼ AND 2½x4¼ PICTURES

The Simplest Type of Camera to Operate. **Any Child Can Produce Good Pictures.**

No. 2 Bingo—$2.50

No. 2A Bingo—$4.00

This is a Marvellously Cheap Photographic Camera, manufactured by the famous Ansco Company. There are two sizes, the larger one taking pictures 2½x4¼ and the smaller one 2¼x3¼ inches. They load in the daylight with Films of 6 Exposures each. Just open the back of the Camera, drop in the Roll film; arrange the picture with the horizontal or vertical View Finder and press the Shutter Lever. Nothing could be simpler. As the Lens is of the fixed focus type, no focussing is necessary. The Lens is of the best quality Meniscus. The Shutter is Rotary Automatic, with diaphragm Stop for use under varying light conditions. The Shutter is arranged for Snapshots or for Time Exposures. There are two View Finders for use when taking horizontal or vertical pictures. With this Camera you can take wonderfully clear portraits of your friends as well as places of interest you may visit, and snapshots of curious occurrences.

The Only Play Gun

that shoots "real shells"

ONE of the most attractive features of the Fox Play Gun—one of the points that carry a big appeal—is the realistic "shells" from which the small wooden balls are "fired."

These shells resemble, in size and shape, real shot gun shells. They load into the breech of the gun, as in a big gun.

This is an exclusive Fox feature. The shell is patent-protected. None of the various imitations of "The Only Double Barrel, Breech-Loading Harmless Play Gun" includes this ingenious attraction.

NEW PRICE
$3.00
LIST
including two shells, ammunition and bell target

Fox developed the market for the double-barrel play gun—and the Fox Play Gun is the unanimous choice of dealers who know where the real profits are in that market.

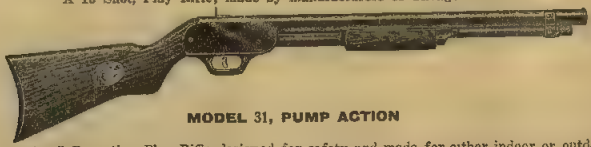
SAVAGE REPEATING PLAY RIFLES

A 15 Shot, Play Rifle; made by manufacturers of Savage Firearms



MODEL 31, PUMP ACTION

It is a "pump action" Repeating Play Rifle designed for safety and made for either indoor or outdoor use. This is not an air gun and no powder is used. It shoots a ⅞ in., light weight, red bakelite ball, propelled by a simple coil spring. The action is of the sliding forearm type. Magazine capacity fifteen balls. The range of accuracy, for target practice, is from 12 to 15 ft.

Safety Trigger Lock—One of the most important features of the Savage Play Rifle is a trigger lock. To release the trigger the forearm handle must be pushed to its forward position and so held while the trigger is pulled. If the forward pressure on the forearm handle is released, the trigger automatically locks.

Target and Game—A shot retaining target is packed with each Play Rifle. The target is designed to hold the balls, shot within an 8 in. circle, and to classify the value of each shot. This adds to the interest of indoor target practice and provides a quick and simple method of recovering the balls.

No. C8000—Complete with a bag of balls and a shot retaining cardboard target, w't per doz. 30 lbs..per dozen $88.00

ONE IN A BOX; TWELVE IN A CARTON

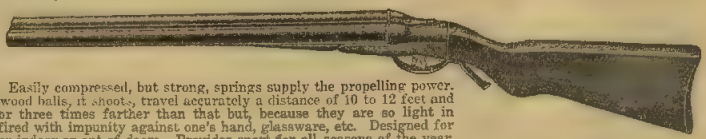
EXTRAS FOR PLAY RIFLES

No. C8001—Bakelite Balls, 20 in a bag.....per dozen bags $2.65

No. C8003—Cardboard Shot-retaining Targets.....per dozen $4.45

FOX DOUBLE BARREL PLAY GUNS

Breech-loading; made by the manufacturers of the Fox Shotguns; a junior model of "The finest gun in the world"



No powder. Easily compressed, but strong, springs supply the propelling power. Harmless. The wood balls, it shoots, travel accurately a distance of 10 to 12 feet and will reach two or three times farther than that but, because they are so light in weight, may be fired with impunity against one's hand, glassware, etc. Designed for a boy's use, either indoor or out of doors. Provides sport for all seasons of the year. Salable everywhere, in the city or country, by any merchants who handle guns, air rifles, pop guns, hardware, toys or general merchandise. It looks and operates like a real, hammerless, double barrel shotgun, every lover of sporting arms will want this boy to have one of these.

Take down, barrels made of steel tubing, finished in black Duco, metal fore-end, frame and action, metal working parts hardened and processed to prevent rusting, hardwood stock nicely finished, length overall 28¾ in.

Each gun packed in a cardboard box, complete with directions for use, a bag of 50 balls, 2 spring shells and a cardboard easel target including a metal bell.

No. C6000—W't per doz. 31 lbs.....per dozen $62.20

ONE IN A BOX. SIX IN A CARTON

EXTRAS FOR PLAY GUNS

No. C6001—Wood Balls, 50 in a bag, per dozen bags $2.65

No. C6002—Spring Shells.....per dozen $8.90

No. C6003—Cardboard Easel Targets, including metal bell.....per dozen $3.55

WINDOW DISPLAY RACKS

No. C6004—Window Display Stands, One stand will be furnished upon request, without charge, to each dealer who orders, or has in stock, six or more Fox Play Guns.

CROSMAN .22 CALIBER AIR RIFLES

SINGLE SHOT

Pneumatic, Operated Entirely by Air; Not a Spring Gun, Solid Frame

Accurate—Each rifle is individually sighted and will group six shots, under a dime, at 150 yards. No powder fouling to deflect flight.

Powerful—Will penetrate one-half inch of solid pine board, at 150 feet.

Noiseless—Excellent for indoor as well as outdoor shooting.

A Real Rifle. It weighs 5½ lbs. Not an ordinary air rifle, but one of the strongest shooting air arms on the market. It has a barrel which is rifled like .22 caliber firearms but shoots .22 caliber spool shaped lead pells.

Self Cleaning—It is not necessary to clean the bore after shooting for each shot carries a little oiling through the barrel.

Economical—Contrast the cost of spool shaped lead pells with that of cartridges. Five shots for a penny; 100 rounds for 20c. The force and penetration of each shot is controlled by the number of times the pump lever is operated. Three pumps will give maximum compression. The rifle may be used for every purpose that a .22 caliber firearm is used for. Suitable for home shooting galleries. Crosman's destroy rats, cats, crows, sparrows, woodchucks, squirrels, etc.

No. C4001—.22 caliber, adapted to any standard, .22 caliber, spool-shaped pells; 19¾ in. round, rifled, blued steel barrel, pistol grip walnut stock, steel butt plate, blade front and rear peep sights, length overall 36 in., w't each 5¾ lbs. ..... each $23.35

ONE IN A BOX. TEN IN A CASE

CROSMAN .22 CALIBER LEAD PELLS

ROUND NOSE

Spool-shaped with rounded end, ungreased. Will give more shocking and killing power than pointed nose pells.

No. C4002—.22 caliber, w't per 1000 about 2 lbs., per thousand $3.00

POINTED NOSE

Spool-shaped with pointed end, ungreased. Tests show that this new shape pell will give more accuracy and penetration than the round nose style.

No. C4012—.22 caliber, w't per 1000 about 2 lbs., per thousand $3.00

50 IN AN ENVELOPE; 1000 IN A PACKAGE. WE DO NOT BREAK PACKAGES

FOX.

A real double-barrel breech-loading shot-gun.

Harmless amusement for the youngsters.

Stock is of hardwood, handsomely finished. Steel barrels are finished in black Duco.

Gun shoots with sufficient accuracy and force to enable real target practice across the width or length of an ordinary room. Each shell contains a durable coil spring, and the gun is loaded by compressing these springs, inserting a small ball in the end of each shell, and putting the shells in the chambers. The gun is then ready to fire. Each trigger fires one barrel, as in any shot-gun.

An attractive target is furnished with each gun, together with two shells and a quantity of extra balls, which of course, can be used over and over.

Each

50—Toy Guns; weight each, 2 lbs. **$5.00**

PLAY RIFLES.

SAVAGE.

A toy rifle for indoor or outdoor target practice. It shoots a small ⅜-inch light weight Bakelite ball, propelled by a coil spring. Magazine capacity, 15 balls. The range of accuracy is from 12 to 15 feet; safety trigger lock. To release the trigger the slide forearm must be pushed all the way forward and held in that position. When the forward pressure on the slide forearm is released the trigger automatically locks again. To shoot the play rifle it is necessary to use two hands and exercise intentional effort.

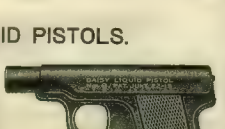
Target and game. A ball-retaining target is packed with each play rifle. The target is designed to retain the balls shot within an 8-inch circle and to classify the value of each shot.

Each

No. S-31—Play Rifles; length over all, 31 inches; weight each, 2 lbs. **$6.66**

LIQUID PISTOLS.

DAISY.



Built along the lines of an automatic pistol. Has no rubber bulb to get out of order. Well made throughout of heavy gauge sheet steel.

Per Dozen

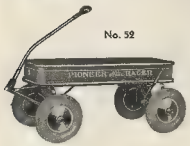
A MARVELOUS NEW VELOCIPEDE

No. 97

● A NEW MODEL BY THE GREATEST NAME IN WHEEL GOODS

No. 899



No. 52

THIS month Gendron takes great pleasure in officially announcing the most beautiful velocipede in the history of children's vehicles — a sensation in design prophetic of a new era of popularity. Deluxe equipment as shown, with fenders front and rear, and finished in new and beautiful colors. Your stock is no longer up-to-date unless it includes this marvelous new Pioneer velocipede deluxe — number ninety-seven. Wire for samples today. The Gendron Wheel Co. Factory, Toledo, Ohio.

There is no dull season with the Gendron Pioneer Line. The two numbers shown above are moving particularly fast at this time.

Gendron "Pioneer Line" Vehicles for Children

The big Gendron Catalog for 1929 is a veritable encyclopedia of the wheel goods world. Your copy will be sent on request.

MAIL PLANE

No. 899

with full ball-bearing high speed chain-and-sprocket drive, and revolving propeller.

More than Ever Before! AEROPLANES

are in the selling spotlight!

Aeroplanes are running away with the honors this spring. The demand is seemingly inexhaustible. With the whole country alive to the interests of aviation, is it any wonder that the youngsters are clamoring for 'planes of their own?

Gendron Pioneer 'planes are stars in the selling spotlight, because they are beautiful, sturdily built, realistic reproductions. And yet they are popularly priced—insuring quick turnover. Every Pioneer 'plane you display this spring is going to be a money-maker for you.

No. 892
Black-Hawk

No. 894
Southern Cross

If you haven't stocked these 'planes we strongly advise you to. Wire for samples before it slips your mind.

Hangar With Two Airplanes

N94040—HANGAR WITH TWO FRICTION AIRPLANES—Two airplanes are equipped with high speed friction motors and the propellers revolve when in motion. These planes are high speed and can climb up an incline. A big value toy that any child will love. Size of hangar, 19x8x5¾ inches. There are lithographed signs on the hangar, and two gas pumps in front. The two airplanes, 4½x4¼ inches 3.00

Per doz.

Air Plane

N94234—Z-65 AIRPLANE—A light, well balanced plane of highly polished aluminium. Has automatic propeller which causes droning sound of motor like a real motor as plane is pulled swiftly along. Geometrical painted designs on body and wings in bright colors. Fabricated wooden wheels. This is a single motored plane. Length, 12¾ inches. Wing spread, 12¾ inches 1.40

Per doz.

Construction Set

N93450—TRI-MOTOR PLANE—Carefully constructed metal plane made in Germany. Has realistic green tail light and two red wing lights. Pulley on top of wings so that airplane can run along taut string when wound up. Movable wings making it possible to look into motor. Realistically painted. Size length, 11 inches wing spread, 10 inches 2.00

Each

Whirl-Ring Monoplane

N92058—WHIRLRING MONOPLANE—Made of wood lithographed in silver, red, blue, and yellow. The four blade colored propeller revolves and rings bell as the plane is pulled along. Length, 10½ inches 1.00

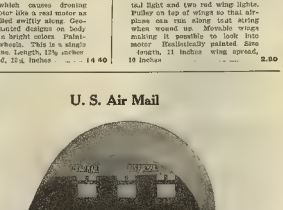
Each

Dual Motored Sea Plane

N93846—DUAL MOTORED LIBERTY SEA PLANE—This plane will have both air and water appeal for the modern boy. Equipped with propellers on each side lower wing tips so that when plane is pulled along as it glides through the water spring picture will drive it for 100 to 200 feet along the surface. Attractively finished in blue, red and natural wood finishes. Length, 20 inches. Spread, 22 inches. Packed, semi assembled, in individual cartons 6.66

Each

U. S. Air Mail



N94180—U. S. AIR MAIL HANGAR—Made entirely of stivered metal, large enough to hold any plane listed here. Size, 9¼x18x16 inches 4.00

Each

Pull-Toy Air Planes

N80390—AEROPLANE PULL-TOY—Body and wings made of tin. The body is decorated with red, white and blue stripes. The tandem wheels are painted red and the propeller is of wood. Attached to the simple arrangement the aeroplane is wobbled to imitate the sound made by a real motor. Length, 15 inches. Width, 5¾ inches. Packed one dozen in a box, not broken 1.00

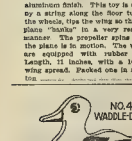
Per doz.

New York to Paris Monoplane

N94407—NEW YORK TO PARIS MONOPLANE—Made of metal, aluminium finish. This toy is driven by a string along the floor turning the wheels, tips the wing so that the plane "banks" in a very realistic manner. The propeller spins when the plane is in motion. The wheels are equipped with rubber tires. Length, 11 inches, with a 16-inch wing spread. Packed one in a carton 16.00

Per doz.

Gibbs Toys



N94563—WADDLE DUCK—A clever Gibbs toy that waddles like a real duck. Made of wood and painted in bright, chief colors. Has long pull cord and strong metal feet. Length, 7 inches. Height, 6 inches. Packed one dozen in a box, not broken 1.68

N94542—HAY CART—Side, end inches. Packed one dozen in a box, not broken 1.32

A TOY WITH LOTS OF ACTION

N94543—TEETER KIDS—Strongly made of metal with wood base; painted in bright colors. Great when set in motion will keep one busy for hours. Size, 12x6 inches at end of arms. Height 6½ inches. One dozen in a box, not broken 4.00

Per doz.

N94544—CART WITH HORSE—When drawn over floor horse paces. Length, 12 inches; ¾ dozen in a box, not broken 7.80

Per doz.

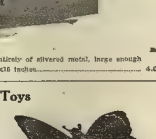
N94545—DAISY EXPRESS WAGON—Lithographed in white, iron wheels, with 24-inch twisted iron handle. Size of wagon, 24½x9¾ inches; ¾ dozen in a box, not broken 7.80

Per doz.

Hoop-EE Game

N94586—HOOP-EE—This attractive and durable wooden toy is brightly enameled in six pleasing colors. There are four hoops, 4 inches in diameter, 4 inches in diameter, 3½ inches in diameter, and 3 inches in diameter. Packed one in an attractive five color box, 7½ inches square. Instructions included 6.70

Per box



N94547—BUTTERFLY PUSH TOY—Moving of wheels causes wings and two wings. Full length, 24 inches ¼ dozen in a box, not broken 7.80

Per doz.

N94548—DERBY RIDER—Ornamented in eight colors; the horse when pushed along steps off at a lively pacing gait. ¾ dozen in a box, not broken 7.80

Per doz.

N94546—HAY WAGON—Painted in colors. Length, 10½ inches. ¾ dozen in a box, not broken 7.60

Per doz.

N94549—KITTEN PUSH TOY—The kitten is gray and white, and made out of wood and partly tin. It is mounted on two red wheels, and has a white handle 12 inches long. When pushed, the kitten looks as though it were running. Length, 10 inches. ¾ doz. in a box, not broken. 6.70

Per doz.

Bunny Push Toy

N94564—BUNNY PUSH TOY—This lively little creature moves legs, head and tail when pushed. Strikingly decorated in six colors, in various combinations. Length, 11 inches. Height, 9 inches. Length of handle, 12 inches. Packed ¾ dozen in a carton, not broken 6.70

Per doz.

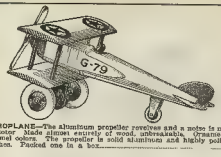
GIBBS TOY

Per doz.

N94850—ROOSTER PUSH TOY—This rooster is white, with a red comb and tail feathers colored red, yellow and green. Top mounted of wood and metal. Top measures two red wheels. The handle is 20 inches long, and when the toy is pushed the rooster looks as though it were walking. Length, 14 inches, ¼ dozen in a box, not broken 9.70

Per doz.

N94865—PRETTY POLLY—This is a most attractive polly that both wings, and legs are all movable. Decorated in six colors. Complete with a pull cord. Length, 10 inches. Height, 9 inches 16.00



Per doz.

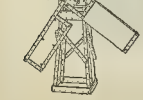
Arkitoy Play Lumber

THIS new construction material is made of fresh, clean Wisconsin lumber, smoothly finished and accurately cut. Real, rust-proof machine screw bolts are provided to fit the drilled holes. The small combination wrench and screw driver included with each set is the only tool necessary.

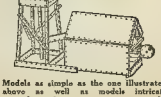
One of the Many Models Arkitoy Builds

THIS toy makes an unusually effective window display. A show card announcing that a $100 prize is awarded every year will attract the attention of children and parents, and a few sample models can easily be put together to be displayed with the boxed sets. Show them early in the season!



Any of the Arkitoy models, such as the one illustrated above can be varnished and kept as a permanent toy.

Contents of Sets	Per set
G5860—50 pieces of lumber and 3/4 dozen bolts	1.25
G5864—125 pieces of lumber and 1 dozen bolts	2.50
G5865—195 pieces of lumber and 12 dozen bolts	4.66
G5866—295 pieces of lumber and 15 dozen bolts	6.66
(Each set packed in a durable, colored box)	



Models as simple as the one illustrated above as well as models intricate enough to interest grown-ups can be built with Arkitoy.

GILBERT WOOD SPLIT PULLEYS

Style "C."
Sizes 8 to 12 Inches.

Made entirely of thoroughly seasoned maple and finished with two coats of shellac varnish. By using different bushings, the same pulley may be made to fit different sizes of shafting.

Style "B" Pulley—Rim is both nailed and glued.

Each spoke is securely dovetailed into and glued in the rim, and is set in a line running direct from the center of shaft to the rim—thus affording its utmost support. Perfectly balanced and cannot get out of round. Furnished with the only bushing that gives a perfect bearing on the entire circumference of the shaft.

Style "C" Pulley—Bolted together—nuts on the clamping bolts being covered with sectional blocks which cannot get out of place. When putting the pulley on a shaft, all its parts are accessible from the face.

Sizes 12 to 48 Inches.

Standard List of Styles "B" and "C." In ordering state—style, width of face, exact size of shaft, kind of face—crown or flat—unless otherwise specified, crown face will be sent.

Maple presents a better surface than any other wood adaptable for pulleys. Face of a maple pulley soon takes a high polish, giving more perfect contact to belt, transmitting the same power with less tension.

Reducing tension prolongs life of belt, effects great saving in power reducing friction. Gilbert pulleys cannot get out of round, and must excel all other kinds of wooden pulleys in correctness of balance and trueness of running.

Meet with little atmospheric resistance, as spokes are set to cut air, not to fan it and collect dust. This makes a great difference in power required. Can be put on or taken off shaft very easily, simply and quickly. Withstand a greater degree of heat or moisture than other wood pulleys, on account of material used and way in which they are built and finished. Will also withstand more severe shocks and greater compression than other pulleys. They have the only perfect compression shaft fastening. Wood takes a tighter hold on shaft than set screws, but unlike them, does not injure shaft. On all pulleys over 14 inches diameter, plates are used instead of washers for the nuts on hub-clamping bolts, thus distributing compression over entire length of hub.

Wood bushings for wood split pulleys are always furnished with pulleys when shaft size is given.

NEW IMPROVED GILLETTE SAFETY RAZORS

Here is an invention of intense interest to every man who shaves, a unique principle in Razor—not merely a new style.

As a result of the new patented features, the NEW IMPROVED Gillette Safety Razor is the finest shaving instrument ever produced. It uses the well known Standard Gillette Blades and greatly increases their effectiveness. The Fulcrum Shoulder and overhanging Cap provide straight edges acting on the blades to produce an Adjustable Short Fluxure, which results in a straight and extremely rigid shaving edge in all positions of adjustment. The Channeled Guard underlying the adjustable blade edge enables the adjustment to be changed without sensibly altering the angle at which the razor is held in shaving, and also leaves the entire edge free to the beard while guarded from the face.

All parts are made with Micrometric Precision in strict conformity with measurements determined by Gillette technical experts after exhaustive research and thousands of shaving tests.

The distinctive Diamond Knurling is used exclusively on the New Improved Gillette Safety Razor.

NEW STANDARD

Black genuine leather covered case, purple velvet and satin lined, 3⅜×2¼×1⅛ in., complete with New Improved razor and 12 double edged blades, (24 shaving edges.)

ONE IN A CARTON

NEW IMPROVED SCHICK REPEATING RAZOR

A new safety razor that is the "TALK OF THE TOWN" wherever shown. Attractive, unique type, self-contained single unit razor, that occupies a minimum space in traveling bag or toilet case. Can be carried in vest pocket, as does not take up more room than a fountain pen.

No loose parts to put together and take apart at every shaving operation.

Blade Storage—20 super-sharp blades are stored in handle. No other razor possesses a like feature or service.

Instant Blade Replacement—A new blade is instantly placed in the shaving head by simply pulling and pushing the plunger. Blade is never touched by users hand—another time and patience saver.

Blade Quality—The edge of Schick blades is incomparable. The razor held in correct position will afford ease and perfection of shaving heretofore unknown.

Rigid Blade—Blade is firmly and solidly gripped in shaving head eliminating vibraton of blade or blade edge and the beard is shaved off smoothly and squarely at the skin line.

Balance—Through excellence of design and correct distribution of weight the "HANG" and BALANCE of the Schick is ideal. The "man's" handle gives a firm and comfortable grip.

Care—Simply rinse in flowing water and wipe—Do not remove blade as edge will be impaired in doing so. The blades and edges are highly polished and dranched with fine oil, and will not rust during their useful life.

Special Notice—Dealers and clerks are requested "NOT TO USE SHARP BLADES FOR DEMONSTRATION PURPOSE" as the edges will be injured by careless handling.

We will include 2 packages of unsharpened Dummy blades with each order for razors to be used by Dealer in demonstrating razor.

NOT SOLD TO THE CUT RATE CHAIN CIGAR STORES

GOLDSMITH FIELDER'S GLOVES

Here's a glove which is entirely different in design and construction, a glove which contains the pet ideas of many of the leading players in the big leagues. The sole leather finger tips, the adjustable ball holding pocket web (Pat. applied for), the new type balloon back, the webbed fingers and the adjustable pad have made this glove an exceptional favorite with professional players. Made of genuine oiled horsehide with genuine horsehide lining. Large firmly padded adjustable heel with deep ball pocket. Special seam reinforcement between thumb and palm. Diverted seams in fingers. The new adjustable ball holding pocket web between the thumb and forefinger is a decided improvement and makes easier the snaring of line flies. All fingers joined with leather webs. Molded leather finger tips for protecting the tops of the fingers. New V type back. Laced wrist with leather strap and buckle. Model BL Gloves are used by such leading players as Wilson, Pinelli, Tearney, Loftus and Moore.

No. C1BL—Big Leaguer Glove.....each *$10.00*

No. C8GW—Glenn Wright Model. A large ready broke model made of best quality Golden Brown horsehide. Patented adjustable pocket web between thumb and forefinger. Full horsehide leather lined. Correctly padded with ready broke pocket. Leather welted seams and binding.....each *$9.00*

No. C2KB—Double Play Model. A good roomy full sized glove, favored by professional players in Major and Minor Leagues. Improved design, with specially constructed and patented lacing feature between thumb and forefinger, heavy reinforcement between thumb and palm, wrist strap and buckle, has made it exceedingly popular. Diverted seams in finger. The special pad is shaped to make a deep natural ball-holding pocket. Leather is soft, flexible, oiled tan horsehide, with full horsehide lining. Leather welted seams and binding, leather lacing at wrist.....each *$9.00*

No. C33L—Adolfo Luque Model. Used by Adolfo Luque of the Cincinnati "Reds." Improved in design, built on new lines with the patented adjustable pocket web between thumb and forefinger, extremely soft oiled tan horsehide front and back. Pearl sheep lining. Correctly padded in thumb and heel. A very popular and easy fitting glove made on the long-fingered model, each *$8.00*

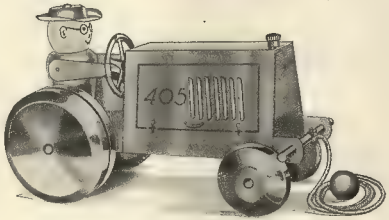
THE GONG BELL MFG. CO.

EAST HAMPTON, CONN.



BELL TOWN TRACTOR 405

Here is a mammoth toy tractor with beautiful plated bells for wheels which loudly ring as the toy is pulled along. It is a husky toy for indoors or out, carefully constructed and beautifully finished and decorated. Ten inches long.

ROCKET RACER 410

This racer is a pull toy which is different and has many novel features. The brake handle on the side may be moved to throw on or off the sound imitating a racing motor. The tires are real Firestone Pneumatic Balloon. The spare when revolved rings a bell.

BLUE ARROW RACER 420

A handsome big racing pull toy with four bells which ring as it is pulled along.

RINGING RACER 425

A popular priced pull toy with four bells which ring as it is pulled along.

Grotesque Modernistic Pottery Is Now in Demand

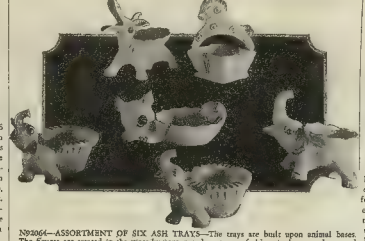
This imported German pottery strikes a modern note of humor and color that will make it popular during the holiday season and after.

N92063—CANDLESTICKS— Amusing animal figures, such as a talico cat, a fawning dog, and a prancing wild horse, form the bases of these novelty candlesticks. Height, 4 inches. Packed ½ dozen in a box, not broken.....Per doz. 10.80

Made of light weight china, it comes in a variety of shapes, such as candleholders, ash trays, sugars and creamers.

N92065—BRIDGE SET OF THREE PIECES —An elephant figure serves as a combination cigarette holder and ash tray. His saddlebags are the holders. On his back he supports the ash tray. Height, 5½ inches. The card container is a white china box, the lid of which is firmly held by a figure in red peaked cap, red gown and boots. Height, 5½ inches. The handle of the second ash tray is effectively formed by a red capped jockey astride a leaping horse. Height, 6 inches. In packages of ¼ dozen, not broken.

.....Per doz. 16.00



N92064—ASSORTMENT OF SIX ASH TRAYS—The trays are built upon animal bases. The figures are treated in the most humorous and grotesque fashion, both as to shape and coloring. Height, 2 to 4½ inches. Packed ½ dozen in a box, not broken.....Per doz. 10.80

N92066—SUGAR AND CREAMER.—One elephant sits on his haunches; his trunk forms the spout of the creamer. The other elephant is squat and fat; he forms an effective sugar bowl. His saddle is the cover of the bowl. Height of creamer, 3½ inches. Height of bowl, 4 inches. ¼ dozen in package, not broken.....Per doz. sets 24.00

Teplitz Ware

An utterly new creation in the field of pottery. Modern in tendency, they are yet sufficiently conservative in both design and color to fit harmoniously in any home. Finished in a warm ivory color applied in a mottled pattern to resemble marble. The necessary amount of color is supplied by the cardinal red decorations.

Vases

N91854—GROUP OF THREE VASES—Graceful oval-shaped vase with side handles in red. The long mouth and foot of this vase are red; the body is in marble finish. Length, 8 inches. Height, 3½ inches. Barrel shaped jardiniere with body of marble finish and six upright lines in red topped by six handles. Height, 5 inches. Diameter, 5½ inches. Globe shaped vase with an insert of bright red in the form of a pelican. Height, 3½ inches. In packages of ¼ dozen, not broken.

.....Per doz. 24.00
